Huntington—J. H. Neff, Alexandria.
Indiana—J. F. Chapman, Indiana.
Jefferson—John H Hughes, Brookville.
Juniata—Samuel McClure, Port Royal.
Lackawanna—Thomas Francis, Scranton.
Lancaster—Arthur P. Mylin, Lancaster.

Lawrence—John C. Sykes, New Castle.
Lebanon—Harry C. Moyer, R. F. D., Lebanon.
Lehigh—Mervin J. Wertman, R. F. D. 3, Allentown.
Luzerne—A. P. Cope, Wilkes-Barre.
Lycoming—Sylvester R. Dunlap, Williamsport.
McKean—C. W. Lillibridge, Smethport.
Mercer—William N. Johnson, Mercer.
Mifflin—E. E. Sipe, Burnham.
Monroe—John H. Kunkle, East Stroudsburg.
Montgomery—A. M. Kulp, Norristown.
Montour—Fred W. Diehl, Danville.
Northampton—George A. Grim, Nazareth.
Northumberland—George L. Swank, Sunbury.
Perry—D. A. Kline, New Bloomfield.
Pike—C. B. Dreisinger, Milford.
Potter—A. P. Mekeel, Coudersport.
Schuylkill—I. A. Seltzer, Pottsville.
Snyder—Irvin Sunder, Middleburg.
Somerset—W. H. Kretchman, Somerset.
Sullivan—Harry R. Hemming, Dushore.
Susquehanna—F. H. Taylor, Montrose.
Tioga—J. G. Marsh, Wellsboro.
Union—Frank P. Boyer, Millmburg.
Venango—L. H. Potter, Franklin.
Warren—C. S. Knapp, Warren.
Washington—S. V. Kimberland, Washington.
Wayne—A. H. Howell, Honesdale.
Westmoreland—Clark L. Maxwell, Greensburg.
Wyoming—I. E. Morgan, Tunkhannock.
York—William P. Wilson, York.

PHILIPPINE ISLANDS

Abra—Carmelo P. Quintero, Bangued.
Agusan—Archer B. Parkins, Butuan.
Albay—Harry L. Cobb, Legaspi.
Antique—Jose V. Aguilar, San Jose.
Bataan—Celerino Pascua, Balanga.
Batanes—Victor de Padua, Basco.
Batangas—Fernando [illegible], Batangas.
Bohol—Bruce M. Bower, Tagbilaran.
Bukidnon—Rowe A. Oliver, Malaybalay.
Bulacan—Arthur C. Willcox, Malolos.
Cagayan—John H. M. Butler, Lallo.
Camarines Norte—Vernon Neff, Daet.
Camarines Sur—John I. Brown, Nueva Caceres.
Capiz—Esteban R. Abada, Capiz.
Cavite—Randel H. Williamson, Cavite.
Cebu—Charles V. Cline, Cebu.
Cotabato—John D. Rhinehart, Cotabato.
Davao—Urban L. Cobb, Davao.
Ilocos Norte—Jesus A. Millan, Laoag.
Ilocos Sur—Quirino P. Roque, Vigan.
Iloilo—John H. McIlreith, Jr., Iloilo.
Isabela—Apolonio M. Ramos, Ilagan.
Laguna—Leon C. Graves, Santa Cruz.
Lanao—Edward M. Kuder, Dansalan.
La Union—Salustiano Vibar, San Fernando.
Leyte—Orville A. Babcock, Tacloban.
Manila—H. A. Bordner, Manila.
Marinduque—Federico Pardo, Boac.
Masbate—Vicente Garcia, Masbate.
Mindoro—Alvan Jones, Calapan.
Mountain—Alexander Mackie, Bontoc.
Nueva Ecija—Fruto de Leon Arellano, Cabanatuan.
Nueva Vizcaya—J. W. Haight, Bayombong.
Occidental Negros—Eric E. Schaffer, Bacolod.
Oriental Misamis—Albert Hawkins, Cagayan.
Oriental Negros—William R. Hearne, Dumaguete.
Palawan—Martin Aguilar, jr.,[1] Puerto Princesa.
Pampanga—H. Fielden Nutter, San Fernando.
Pangasinan—O. H. Charles, Lingayen.
Rizal—Celedonio Salvador, Pasig.
Romblon—Estanislao R. Lopez, Romblon.
Samar—Venancio Trinidad, Catbalogan.
Sorsogon—Pedro T. Orata, Sorsogon.
Sulu—King W. Chapman,[1] Jolo.
Surigao—M. A. Mapes, Surigao.
Tarlac—Benito Pangalinan, Tarlac.
Tayabas—Leodegario Victorino, Lucena.
Zambales—Gregorio Hernando, Iba.
Zamboanga—Raymond H. Stevens,[1] Zamboanga.

[1] Head teacher.
[2] Acting.

DISTRICT AND DISTRICT SUPERINTENDENT

PUERTO RICO

Adjuntas, Jayuya—Daniel R. Nase.

Hunt—Mrs. Ruby Moran, Greenville.
Hutchinson—Ona Mannahan, Stinnett.
Irion—R. J. Atkinson, Sherwood.
Jack—W. A. Ham, Jacksboro.
Jackson—Mrs. Verna K. Harper, Edna.
Jasper—J. J. Miller, Jasper.
Jeff Davis—P. H. Fowlkes, Fort Davis.
Jefferson—Mrs. Lillian Planchard, Beaumont.
Jim Hogg—W. A. Dannelley, Hebbronville.
Jim Wells—P. P. Price, Alice.
Johnson—I. G. Kennon, Cleburne.
Jones—B. T. Beaver, Anson.
Karnes—J. L. Hardy, Karnes City.
Kaufman—S. B. Dickson, Kaufman.
Kendall—Maurice J. Lehmann, Boerne.
Kenedy—J. S. Thornham, Sarita.
Kent—H. W. Davis, Clairemont.
Kerr—Charles Real, Kerrville.
Kimble—R. R. King, Junction.
King—O. W. Cross, Guthrie.
Kinney—John H. Stadler, Brackettsville.
Kleberg—J. F. Ellis, Kingsville.
Knox—Mrs. Ethie Lee P. Pool, Benjamin.
Lamar—Mary J. Lindsay, Paris.
Lamb—L. D. Rochelle, Olton.

Lampasas—J Tom Higgins, Lampasas.
La Salle—G. A. Welhausen, Cotulla.
Lavaca—Frank Schoppe, Hallettsville
Lee—R. J. Hejtmancik, Giddings.
Leon—Mary J. Reed, Centerville
Liberty—Mrs. B. B Sapp, Liberty.
Limestone—Jim Barfield, Groesbeck
Lipscomb—C. A. Dickenson, Lipscomb.
Live Oak—Lydell Lewis, George West
Llano—J W Currie, Llano
Loving—J. C. Ramsey, Mentone
Lubbock—Mae Murfee, Lubbock.
Lynn—H P Caveness, Tahoka
Madison—Lizzie F Grissett, Madisonville.
Marion—Mrs M C. Dannelly, Jefferson.
Martin—J. S Lamar, Stanton
Mason—Otis Shearer, Mason
Matagorda—Mrs Claire F Pollard, Bay City
Maverick—W. O. Fitch, Eagle Pass
McCulloch—Hugh Braly, Brady
McLennan—J E Batson, Waco
McMullen—L A. Martin, Tilden
Medina—W N Saathoff, Hondo.
Menard—J W. Matthews, Menard.
Midland—M. R. Hill, Midland
Milam—Mrs. K K. Robbins, Cameron.
Mills—Roy Simpson, Goldthwaite.
Mitchell—Ruby McGill, Colorado.
Montague—J J. Haralson, Montague
Montgomery—F R. Blackman, Conroe
Moore—F S. Makeig, Dumas.
Morris—J. H Wilkinson, Daingerfield.
Motley—W. R. Cammack, Matador.
Nacogdoches—Etta Strickland, Nacogdoches.
Navarro—Dan D Hanks, Corsicana.
Newton—B. E Ramsey, Newton.
Nolan—Joe A Stewart, Sweetwater.
Nueces—D. D Snow, Corpus Christi.
Ochiltree—Oscar C. Flowers, Perryton
Oldham—W. A. Pulliam, Vega
Orange—J F. Hammers, Orange.
Palo Pinto—J. E. Maddox, Palo Pinto.
Panola—Mrs Ada Jordan, Carthage
Parker—C. C Corkern, Weatherford.
Parmer—Jno Aldridge, jr., Farwell.
Pecos—C E Casebier, Fort Stockton.
Polk—A. L Lunsford, Livingston
Potter—Laura V. Hamner, Amarillo
Presidio—W. T Davis, Marfa.
Rains—J. H. Foster, Emory.
Randall—S. B Orton, Canyon.
Reagan—J. W Taylor, Big Lake.
Real—Ed A Kelly, Leakey.
Red River—Sam Giddens, Clarksville.
Reeves—H. N McKellar, Pecos.
Refugio—Jos A Steele, Refugio.
Roberts—J A. Mead, Miami.
Robertson—E L. Reynolds, Franklin.
Rockwall—Claude Isbell, Rockwall
Runnels—R. E. White, Ballinger
Rusk—Gip Hudson, Henderson.
Sabine—Maggie B. Weatherred, Hemphill.
San Augustine—W E Mathews, San Augustine.
San Jacinto—Maggie Lee Trapp, Cold Springs.
San Patricio—H T. Beckworth, Sinton.
San Saba—E. G Hillman, San Saba.
Schleicher—F M. Bradley, El Dorado.
Scurry—A. A. Bullock, Snyder.
Schackelford—F. L. Kuykendall, Albany.
Shelby—R B Smith, Center.
Sherman—Forest Mullins, Stratford.
Smith—J. E. Billingsley, Tyler
Somervell—O. J. Covey, Glen Rose.
Starr—Mrs. Florence J. Scott, Rio Grande City.
Stephens—Mrs. Millie Blackburn, Breckenridge.
Sterling—B. F Brown, Sterling City.
Stonewall—S L. Stewart, Aspermont.
Sutton—Alvis Johnson, Sonora.
Swisher—W. A. Graham, Tulia.
Tarrant—John T. White, Fort Worth.
Taylor—M A Williams, Abilene.
Terrell—G. J Henshaw, Sanderson.
Terry—Jay Barrett, Brownfield
Throckmorton—E D Condron, Throckmort
Titus—H G Smith, Mount Pleasant.
Tom Green—T W Parker, San Angelo.
Travis—Mrs. George Feller, Austin
Trinity—W B. Mills, Groveton
Tyler—S. B Owens, Woodville
Upshur—O. J Beckworth, Gilmer
Upton—Mahurin L. Harris, Rankin.
Uvalde—James Maddux, Uvalde
Val Verde—Mrs Marie Gronde Adams, Del R
Van Zandt—A O Longhmiller, Canton
Victoria—William E. Davies, Victoria
Waller—Bettie Mitchell, Huntsville
Waller—Lisle McPherson, Hempstead.
Ward—J. Lee Bilberry, Barstow.
Washington—M. H. Fihlert, Brenham
Webb—B Richardson, Laredo
Wharton—Mae Hopper, Wharton
Wheeler—O. B. Miller, Wheeler
Wichita—J. A. Hood, Wichita Falls.
Wilbarger—Mrs. E. C Christian, Vernon.
Willacy—C. P. Hilbun, Raymondville.
Williamson—B. J. Bruton, Georgetown.
Wilson—J E. Swift, Floresville.
Winkler—G. C. Olsen, Kermit
Wise—Mrs. Onna Cartwright, Decatur.
Wood—Ola Sims, Quitman
Yoakum—J. B. Hassell, Plains.
Young—L. G. Cook, Graham.
Zapata—A. V. Navarro, Zapata
Zavala—N. H Hunt, Crystal City

District and District Superintendent

Utah

Beaver—S. Melvin Wittwer, Beaver
Box Elder—Hervin Bunderson, Brigham.
Cache—J W. Kirkbride, Logan
Carbon—W. W. Christensen, Price.
Daggett—Niels Pallesen, * Manila
Davis—H. C. Burton, Farmington
Duchesne—Charles Iverson, Duchesne.
Emery—James Nuttall, Huntington.
Garfield—F. G. Gardiner, Panguitch
Grand—M J. Andrews, Moab.
Iron—N. J. Barlow, Cedar City.
Juab.
Juab district—Owen Burnett, Nephi.
Tintic district—T. E. Bartlett, Eureka
Kane—J. G. Smith, Kanab
Millard—W. A Paxton, Fillmore.
Morgan—J. R. Tippetts, Morgan.
Piute—Douglas Q. Cannon, Junction.
Rich—Reuben D Law, Randolph.
Salt Lake
Granite district—Calvin Smith, Salt Lake C
Jordan district—D. C. Jensen, R F D Sandy
San Juan—H. Lloyd Hanson, Monticello.
Sanpete
North district—A. E. Jones, Mount Pleasa
South district—E. T. Reid, Manti.
Sevier—A J. Ashman, Richfield.
Summit
North district—H A. Pace, Coalville.
South district—E. M. Reid, Kamas.
Tooele—P. M. Nielson, Tooele.
Uintah—Heber S. Olson, Vernal.
Utah.
Alpine district—David Gourley, Amer Fork.
Nebo district—Melvin Wilson, Spanish For
Wasatch—Ralph Nilsson, Heber City.
Washington—Milton E. Mously, St. George
Wayne—Anne Snow, Bicknell.
Weber—B. A. Fowler, Ogden

* Clerk of board.

Supervision District and District Superintendent or Supervising Principal

VERMONT[1]

[I.=incorporated school district; T.=town, I. D.=independent district]

Addison County

PRINCIPAL CITY SCHOOL OFFICERS

CITY, POPULATION, SUPERINTENDENT OR SUPERVISING PRINCIPAL, BUSINESS MANAGER, AND RESEARCH DIRECTOR

ALABAMA

Alabama City (8,544). (*See* Gadsden.)
Albertville (2,710)—S. J. Chandler.
Alexander City (4,519)—J. M. Pearson.
Andalusia (5,154)—C. L. Martin.
Anniston (22,345)—S. E. Alverson.
Athens (4,238)—J. M. Cannon.
Atmore (3,035)—A. C. Moore.
Attalla (4,585)—R. L. Clements.
Auburn (2,800)—J. A. Parrish.
Bessemer (20,721)—J. E. Bryan.
Birmingham (259,678)—C. B. Glenn; D. E. McKinley, B. M.; W. E. Putnam, R. D.
Brewton (2,818)—Robert K. Weber.
Carbon Hill (2,519)—James S. Brown.
Cullman (2,786)—R. P. Johnston.
Decatur (15,593)—W. W. Benson.
Demopolis (4,037)—J. W. Watt.
Dothan (16,046)—C. C. Moseley.
Elba (2,523)—James C. Dixon.
Enterprise (3,702)—Ivison L. Boles.
Eufaula (5,208)—Thomas G. Wilkinson.
Fairfield (11,059)—B. B. Baker.
Florala (2,580)—E. C. Palmer.
Florence (11,729)—F. T. Appleby.
Fort Payne (3,375)—W. W. Hill.
Gadsden (24,042)—C. A. Doneboo.
Greenville (3,985)—Mittie Wright.
Guntersville (2,826)—C. W. Hyatt.
Homewood (6,103)—J. M. Ward.
Huntsville (11,554)—W. G. Hamm.
Jacksonville (2,840)—C. W. Daugette.
Jasper (5,813)—W. P. Snuggs.
Lanett (5,204)—C. E. Lunceford.
Leeds (2,529)—W. L. Davis.
Mobile (68,202)—W. C. Griggs; W. P. Davidson, B. M.; Arnold H. Edmonds, R. D.
Montgomery (66,079)—W. R. Harrison; T. L. Head, B. M.
Opelika (6,156)—J. W. Watson.
Opp (2,918)—H. N. Lee.
Ozark (3,103)—Mrs. Grover C. Flowers.
Phenix City (13,862)—Lucien P. Stough.
Piedmont (3,668)—Dexter L. Hovater.
Prichard (4,580)—Elizabeth Flock.
Roanoke (4,372)—L. L. James.
Russellville (3,146)—R. C. Thomas.
Selma (18,012)—P. M. Munro
Sheffield (6,221)—L. E. Creel.
Sylacauga (4,115)—C. S. Crowther.
Talladega (7,596)—Judson Snead.
Tarrant (7,341)—W. A. Parker.
Troy (6,814)—L. D. Bynum.
Tuscaloosa (20,659)—J. M. Burnett.
Tuscumbia (4,533)—R. E. Thompson.
Tuskegee (3,314)—H. O. Holstun.
Union Springs (2,875)—E. S. Pugh.

ARIZONA

Bisbee (8,023)—R. E. Souers.
Douglas (9,828)—J. E Carlson, jr.
Flagstaff (3,891)—J. Q. Thomas.
Glendale (3,665)—Harold W. Smith.
Globe (7,157)—H. E. Stevenson.
Jerome (4,932)—J. O. Mullen.
Mesa (3,711)—H. E. Hendrix.
Miami (7,693)—C. K. Davis.
Nogales (6,006)—A. J. Mitchell.
Phoenix (48,118)—John D. Loper; Everatt Johnson, R. D.
Prescott (5,517)—Edward F. Honn.
Tucson (32,506)—C. E. Rose.
Winslow (8,917)—Theodore G. Grieder.
Yuma (4,892)—C. W. McGraw.

ARKANSAS

Arkadelphia (3,380)—L. M. Goza.
Batesville (4,484)—Ury McKenzie.
Benton (3,445)—O. H. Wilkerson.
Blytheville (10,098)—Crawford Greene.
Brinkley (3,046)—John Baumgartner.
Camden (7,278)—F. W. Whiteside.
Clarksville (3,031)—G. B. King.
Conway (5,534)—W. D. Jeter.
Crossett (2,811)—D. C. Hastings.
De Queen (2,938)—Pearl Williamson.
Dermott (2,942)—P. H. Herring.
El Dorado (16,421)—Charles E. Dicken.
Fayetteville (7,394)—F. S. Root.
Fordyce (3,206)—J. D. Clary.
Forrest City (4,594)—M. S. Smith, jr.
Fort Smith (31,429)—J. W. Ramsey; J. C. Gibson, B. M.; C. C. Smith, R. D.
Harrison (3,626)—O. G. Holmes.
Helena (8,316)—J. F. Wahl.
Hope (6,008)—Beryl Henry.
Hot Springs (20,238)—Harvey H. Haley.
Jonesboro (10,326)—Fred Keller.
Little Rock (81,679)—R. C. Hall; John G. Pipkin, B. M.

---

Malvern (5,115)—J L. Pratt.
Marianna (4,314)—O. T. Conner.
Mena (3,118)—J. E Bishop.
Monticello (3,076)—W. C. Whaley.
Morrilton (4,043)—V. L Boren.
Newport (4,547)—L. P. Mann.
North Little Rock (19,418)—W. E. Phipps.
Osceola (2,573)—George Doyle
Paragould (5,966)—J. Will Pierce
Paris (3,234)—Will S. Morgan.
Pine Bluff (20,760)—J. R. Allen.
Prescott (3,033)—J. I. McClurkin
Rogers (3,554)—Birch Kirksey.
Russellville (5,628)—Edgar W. Bass.
Searcy (3,387)—J L. Taylor.
Smackover (2,544)—G. A. Dodson.
Springdale (2,763)—G. A Stubblefield.
Stamps (2,705)—T. M Stinnett.
Stuttgart (4,927)—J. E. Howard.
Texarkana (10,764)—P. N. Bragg.
Trumann (2,995)—W. P. Tuggle.
Van Buren (5,182)—D. M. Riggin.
Warren (2,523)—Oscar C. Landers.
West Helena (4,489)—G. E. Cromwell.
Wynne (3,505)—J. H Andrews.

CALIFORNIA

Alameda (35,033)—William G. Paden.
Albany (8,569)—John F. West
Alhambra (29,472)—Forrest V. Routt.
Anaheim (10,995)—M. A. Gauer.
Antioch (3,563)—Roger S. Phelps.
Arcadia (5,216)—Homer F. Aker.
Auburn (2,661)—Benton Welty.
Azusa (4,808)—Charles C. Carpenter.
Bakersfield (26,016)—Lawrence E. Chenoweth.
Banning (2,752)—R. A. Coverdale.
Benicia (2,913)—H P. Short.
Berkeley (82,109)—Lewis W. Smith; J. L. Poulsen, B M.; Virgil E. Dickson, R. D.
Beverly Hills (17,429)—Edward J. Hummel.
Brawley (10,439)—Geo. R. McIntire.
Burbank (16,662)—Curtis E Warren.
Burlingame (13,270)—Lester D. Henderson.
Calexico (6,299)—Daniel P. Choisser.
Chico (7,961)—Charles H Camper
Chino (3,118)—Leonard F. Collins.
Chula Vista (3,869)—J. Calvin Lauderbach.
Claremont (2,719)—Earl Thompson.
Coalinga (2,851)—C. L Geer.
Colton (8,014)—John H. Waldron.
Compton (12,516)—J. William Gastrich.
Corona (7,018)—Glen D. Wight.
Coronado (5,425)—F. A. Boyer.
Covina (2,774)—Ben S. Millikan.

[1] Classified as 41 colleges and universities, 4 independent professional schools, 11 teachers colleges, 13 normal schools, and 13 junior colleges.

PART III

COLLEGES AND UNIVERSITIES *

(Including all institutions of higher education)

Arrangement of the 1933 directory is by *States*. Each institution, comprising in some instances one or a group of professional schools, is listed ONLY ONCE, under the State in which it is located.

Under each State, institutions are classified as follows:

1. Universities and colleges.
2. Independent professional and technological schools (not connected with a university).
3. Teachers colleges.
4. Normal schools
5. Negro institutions.
6. Junior colleges.

The PRESIDENT'S name is listed after that of the institution. Names of DEANS OR DIRECTORS of professional schools maintained by universities are also listed.

The abbreviations in the parentheses following the name of an institution indicate three facts:

1. The association, if any, by which the institution is accredited.
2. The control, support, or affiliation of an institution—State, city, county, denomination, etc.
3. Whether the UNDERGRADUATE WORK is coeducational, exclusively for men, or exclusively for women.

The symbol preceding the name of a professional school indicates that the school is accredited by its professional association. The asterisk (*) means that the institution is fully accredited; the dagger (†) that it is accredited as Class B; the double dagger (‡) that it is provisionally accredited.

KEY TO ABBREVIATIONS AND SYMBOLS

Accrediting:

A—Accredited by Association of American Universities.
S—Accredited by Association of Colleges and Secondary Schools of the Southern States.
M—Accredited by Middle States Association of Colleges and Secondary Schools.
N—Accredited by North Central Association of Colleges and Secondary Schools.
W—Accredited by Northwest Association of Secondary and Higher Schools.
T—Accredited by American Association of Teachers Colleges.

---

* The Educational Directory is released in four parts as rapidly as the data become available: Part I, Principal State and County School Officers; Part II, Principal City School Officers and Catholic Parochial School Superintendents; Part III, Colleges and Universities, Including All Institutions of Higher Education; Part IV, Educational Associations, Boards and Foundations, Research Directors, and Educational Periodicals. Parts can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C.

Accrediting—Continued.

J—Four-year colleges accredited by regional associations as junior colleges.

*—Accredited by respective professional associations, including—

American Association of Colleges of Pharmacy
American Association of Collegiate Schools of Business
American Association of Schools and Departments of Journalism.
American Bar Association, Council on Legal Education and Admissions to the Bar
American Library Association
American Medical Association.
American Osteopathic Association
Association of Collegiate Schools of Architecture.
Dental Educational Council of America.
National Association of Schools of Music

†—Accredited by respective associations as Class B.

‡—Provisionally accredited, or admitted on probation.

Support or control or affiliation:

St.—State.
C.—City.
Ter.—Territorial.
Dist.—District
Co —County.
Natn'l —National.
Twp.—Township
P.—Private.

Denominational affiliation:

Ad.—Adventist.
A. M A —American Missionary Association.
A. M. E.—African Methodist Episcopal.
Ad. Chris.—Adventist Christian.
Bapt.—Baptist.
Breth —Brethren
Chris —Christian.
Chris. Ref.—Christian Reformed.
Ch. of God.—Church of God.
Ch. of Christ.—Church of Christ.
Ch. of N. Jeru.—Church of New Jerusalem.
Cong.—Congregational
Disc.—Disciples.
Evan —Evangelical.
Evan Luth.—Evangelical Lutheran.
F. Bapt.—Free Baptist.
F. Meth.—Free Methodist.
Fr.—Friends.
Jewish.
K. of C.—Knights of Columbus.

Support or control or affiliations—Con.

L. D. S —Latter Day Saints.
Luth.—Lutheran.
Menon.—Mennonite.
M E.—Methodist Episcopal
M. E So.—Methodist Episcopal Church South.
M. P —Methodist Protestant.
Morav —Moravian.
Naz.—Nazarene.
No. Bapt.—Northern Baptist.
Pilg. Hol.—Pilgrim Holiness.
P. E.—Protestant Episcopal.
Presb.—Presbyterian.
Ref.—Reformed.
R. C —Roman Catholic.
S. D. Ad.—Seventh Day Adventist.
S. D. Bapt.—Seventh Day Baptist.
Swed'b.—Swedenborgian.
Swed. Evan.—Swedish Evangelical.
U. Breth.—United Brethren.
U. Luth.—United Lutheran.
U. Presb.—United Presbyterian.
Unit.—Unitarian.
Undenom. — Undenominational.
Wes. Meth.—Wesleyan Methodist.
Y. M. C. A.—Young Men's Christian Association.

Undergraduate student body:

Coed.—Coeducational.
Men.
Wo.—Women.

Institutions included in this part of the directory

A. Universities, colleges, and teachers colleges:
   1. Accredited by the following agencies—
      (a) Association of American Universities.
      (b) Association of Colleges and Secondary Schools of the Southern States
      (c) Middle States Association of Colleges and Secondary Schools.
      (d) North Central Association of Colleges and Secondary Schools.
      (e) Northwest Association of Secondary and Higher Schools
      (f) American Association of Teachers Colleges.
      (g) State universities and State departments of education.
      NOTE.—The United States Office of Education does not accredit or approve any educational institutions
   2. All State-supported institutions.
   3. Four-year institutions which are not accredited by any agency but which enroll 100 or more resident college students in regular session and graduate at least 10 students annually.

B. Independent professional and technological schools:
   1. Accredited by professional associations or approved by State universities or State departments of education.
   2. Not accredited by any agency but which enroll 25 or more resident students of college grade in regular session and graduate at least 5 students annually.

C. Junior colleges and normal schools:
   1. Accredited by the agencies listed under A–1 (above).
   2. Which—
      (a) Require high-school graduation for entrance;
      (b) Offer two years of work of college grade;
      (c) Enroll 50 or more resident students of college grade in regular session.

The Office of Education has on file information on other institutions not included in this directory.

ALABAMA

UNIVERSITIES AND COLLEGES

Alabama College, Montevallo (S., St., wo.).
Oliver C. Carmichael.
Arts and sciences—T. H. Napier.
Education—H. W. James.
Music—H. D. LeBaron.

Guy H. Snavely.
Howard College, Birmingham (A., S., Bapt., coed.).
T. V. Neal.
Summer school—William E. Bohannon.
Judson College, Marion (S., Bapt., wo.).
L. C. Cleverdon.
Spring Hill College, Spring Hill (S., R. C., men).
John Druhan.
Arts and sciences—Edward Cummings.
Summer school—Edward Cummings.
University of Alabama, University (A., S., St., coed.).
George H. Denny.
Arts and sciences—Charles H. Barnwell
Graduate—Albert B. Moore.
*Law—Albert J. Farrah
*Medicine—Stuart Graves.
Education—James J. Doster.
Engineering—George J. Davis.
*Commerce and business—Lee Bidgood.
Home economics—Agnes E. Harris.
Mines—J. R. Cudworth
Summer school—John R. McLure.
Woman's College of Alabama, Montgomery (S., M. E. So.).
Walter D. Agnew.
Arts and sciences—L. E. Williams.
‡Music—O. J. Borchers.

San Francisco Theological Seminary, San Anselmo (Presb., coed)
William H. Oxtoby.
Southwestern University School of Law, Los Angeles (P, coed).
Rollin L McNitt.

TEACHERS COLLEGES

Broadoaks School of Education, Whittier. (See Whittier College)
Humboldt State Teachers College, Arcata (St, coed.).
Arthur S. Gist.[1]
State Teachers College, Chico (St, coed).
Aymer J Hamilton[1]
State Teachers College, Fresno (T, St., coed.).
Frank W. Thomas
Summer school—W. B Givens
State Teachers College, San Diego (W., T, St., coed)
Edward L Hardy.
State Teachers College, San Francisco (St, coed).
Alexander C. Roberts[1]
State Teachers College, San Jose (St., coed).
T. W. MacQuarrie.
State Teachers College, Santa Barbara (St, coed.)
Clarence L Phelps

NORMAL SCHOOLS

Miss Fulmer's School, Los Angeles (P., wo.)
Grace Fulmer.

JUNIOR COLLEGES

California Polytechnic School, San Luis Obispo (St., men)
Ben R. Crandall
Central Junior College, El Centro (C., coed).
J. L House
Chaffey Junior College, Ontario (St., coed.)
Gardiner W. Spring.
Citrus Junior College, Azusa (St, coed).
F. S Hayden.
College of Notre Dame, Belmont (R. C, wo)
Sister Julia[1]
Compton District Junior College, Compton (St & dist, coed.).
O Scott Thompson.
Cumnock College, Los Angeles (P., coed).
A. A. Macurda and M O. Drisko
Holmby College, Los Angeles (P., wo).
S Vance and Frederica de Laguna.
Junior College, Bakersfield (St., coed.).
Grace V. Bird.
Junior College, Brawley (St, coed.).
Percy E. Palmer.[1]
Junior College, Fullerton (St, coed.).
Louis E Plummer.
Junior College, Glendale (St., coed.).
Charles A. Nelson.
Junior College, Hollister (St, coed.).
James P. Davis.
Junior College, Long Beach (St & C., coed).
John L. Loundsbury.
Junior College, Los Angeles (St, coed.).
William H Snyder.
Junior College, Modesto (St., coed.).
D. O. Baker.
Junior College, Pasadena (Dist., coed.).
John W. Harbeson.
Junior College, Pomona (St, coed.).
H. P. Reynolds.
Junior College, Porterville (St., coed.).
B. H. Grisemer.
Junior College, Reedley (St., coed)
J. T. McRuer.
Junior College, Riverside (St, coed.).
A. G. Paul.
Junior College, Sacramento (St. & C., coed.).
J. B. Lillard.
Junior College, Salinas (St. & dist., coed.)
Melrowe Martin.
Junior College, San Bernardino (St, & dist coed.)
John B. Griffing.
Junior College, San Mateo (St. & C., coed.).
Charles S Morris.
Junior College, Santa Ana (St & C, coed.).
D K Hammond[1]
Junior College, Santa Maria (St., coed.).
A A Bowlay, jr.
Junior College, Santa Monica (C., coed.).
Ralph H. Bush.
Junior College, Santa Rosa (St. & dist, coed.)
Floyd P Bailey
Junior College, Taft (Dist., coed)
W T. Walton.
Junior College, Ventura (St, coed).
D R. Henry
Junior College, Visalia (St., coed).
I. D Steele
Lassen Union Junior College, Susanville (St., coed.).
Robert M Fulton
Los Angeles Pacific College, Los Angeles (F. Meth, coed).
Byron S Lamson.
Menlo School and Junior College, (Ltd.), Menlo Park (P., men)
Lowry S Howard
Southern California Junior College, Arlington (S D Ad., coed.).
E E Cossentine
Williams Institute, Berkeley (P., coed.)
Cora L. Williams
Yuba County Junior College, Marysville (St, C., & Co., coed.). Pedro Osuna.

COLORADO

UNIVERSITIES AND COLLEGES

Colorado Agricultural College, Fort Collins (N., St., coed)
Charles A. Lory
Science—L. A. Moorhouse.
Agriculture—Alvin Kezer.
Engineering—L. D. Crain.
Music—Alexander Emslie.
Veterinary medicine—George H Glover
Home economics—Inga M. K. Allison
Summer school—George T Avery
Colorado College, Colorado Springs (A., N, P., coed.)
Charles C Mierow.
Arts and sciences—Charlie B. Hershey.
Music—E D. Hale
Loretto Heights College, Loretto (N, R C., wo.).
Sister Mary Edmond.
Regis College, Denver (J., R. C., men)
Joseph A Herbers.
University of Colorado, Boulder (A., N., St., coed.).
George Norlin.
Arts and sciences—Jacob Van Ek.
Graduate—Oliver C. Lester.
*Law—Robert L. Stearns, acting.
*Medicine—Maurice H. Rees.
Nursing—Louise Kieninger.
*Pharmacy—Homer Washburn
Education—Harry M Barrett.
Engineering—Herbert S Evans.
*Music—Rowland W. Dunham.
Business administration—Elmore Petersen.
Summer school—Milo G. Derham.
University of Denver, Denver (A, N., M. E., coed)
Frederick M. Hunter, chancellor.
Liberal arts—Rolland J. Walters.
Graduate—D. Shaw Duncan.
*Law—Roger H. Wolcott.
Engineering—Wilber D. Engle.
Art—Cyril Kay-Scott.
*Commerce—George A. Warfield
Library science—Malcolm G. Wyer.
Summer school—Wilber D. Engle.
City College—Rolland J. Walters

INDEPENDENT PROFESSIONAL AND TECHNOLOGICAL SCHOOLS

Colorado School of Mines, Golden (A., N., St., men).
Melville F. Coolbaugh.
Summer school—J. R. Morgan.
Iliff School of Theology, Denver (M. E., coed).
Westminster Law School, Denver (P., coed.).
Hamlet J. Barry.[1]

[1] From directory for 1932.

TEACHERS COLLEGES

Adams State Teachers College, Alamosa (St , coed).
Ira Richardson.
Colorado State Teachers College, Greeley (N , T., St., coed)
George W. Frasier.
Graduate—F. C. Jean.
Summer school—George W. Frasier.
Western State College of Colorado, Gunnison (N , T., St , coed).
C. C. Casey

NORMAL SCHOOLS

Colorado Vocational School, Denver (P., coed).
Rolland M Shreves
General training school

JUNIOR COLLEGES

Colorado Woman's College, Denver (N., P).
S J Vaughn [1]
Denver Junior College, Denver (Y. M. C. A., coed.).
Norman A. Sandberg
Fort Lewis School of the Colorado Agricultural College, Hesperus (St , coed.).
G F. Snyder, dean.
Grand Junction State Junior College, Grand Junction (St., coed.).
O G. Houston
Junior College, Trinidad (St., coed.).
Russell R. Brown.

CONNECTICUT

UNIVERSITIES AND COLLEGES

Albertus Magnus College, New Haven (R. C., wo).
Sister M. Isabel.
Connecticut Agricultural College, Storrs (St., coed.).
Charles C. McCracken.
Arts and sciences—Howard D. Newton.
Education—Charles B. Gentry.
Agriculture—George C. White.

FLORIDA

UNIVERSITIES AND COLLEGES

Bob Jones College, College Point (P , coed.).
Robert R Jones.
Florida State College for Women, Tallahassee (A., S , St).
Edward Conradi.
Arts and sciences—William G Dodd.
Education—Nathaniel M Salley.
*Music—Ella Schoble Opperman
Home economics—Margaret R. Sandels
John B Stetson University, Deland (Bapt., coed.)
Lincoln Hulley.[1]
Rollins College, Winter Park (S , P., coed).
Hamilton Holt.[1]
Southern College, Lakeland (M E So., coed.).
Ludd M Spivey.
Arts and sciences—Carl S. Cox.
Summer school—J. C. Peel.
University of Florida, Gainesville (A., S , St., men).
John J. Tigert.
Arts and sciences—W. H. Wilson.
Graduate—J. N. Anderson.
*Law—H. R Trusler.
*Pharmacy—T R. Leigh.
Education—J W. Norman.
Agriculture—W. L. Floyd
Engineering—B. R. Van Leer.
Art—Rudolph Weaver.
*Commerce—W J. Matherly.
Journalism—W J. Matherly.
Summer school—J W. Norman.
University of Miami, Miami (P., coed.).
Bowman F. Ashe.
Liberal arts and education—Henry S. West.
Law—Russell A. Rasco
Music—Bertha Foster.
Commerce—John T. Holdsworth.
Summer school—Henry S. West.

NEGRO INSTITUTIONS

Bethune-Cookman College, Daytona Beach (†S., P., wo.).
Mary McL Bethune.
Junior college.
Florida Agricultural and Mechanical College for Negroes, Tallahassee (†S., St , coed.).
J. R. E. Lee.
Arts and sciences—R. O'Hara Lanier.
Nursing—L. H. B. Foote.
Agriculture—B. L. Perry.
Mechanic arts—W. T. Reed.
Home economics—Ethel M. Griggs
Summer school—R. O'Hara Lanier.

JUNIOR COLLEGES

Junior College, St. Petersburg (A , C. & P , coed.).
George M. Lynch.
Palmer College and Academy, DeFuniak Springs (Presb., coed.).
P W DuBose.

GEORGIA

UNIVERSITIES AND COLLEGES

Agnes Scott College, Decatur (A , S., P., wo).
James R. McCain.
Berry College, Mount Berry (P., coed.)
Gardner L. Green
Arts and sciences—Samuel Henry Cook.
Bessie Tift College, Forsyth (Bapt , wo).
Aquila Chamlee
Brenau College, Gainesville (†S., P., coed.).
H J Pearce, sr.
Emory University, Emory University (A , S., M E., men).
Harvey W. Cox.
Arts and sciences—Goodrich C White
Graduate—Goodrich C. White.
*Law—Charles J. Hilkey.
*Medicine—Russell H. Oppenheimer.
Nursing—Carrie M. Spurgeon.

Emory University—Continued.
Harvey W. Cox—Continued.
Theology—Franklin N Parker.
Commerce—Edgar H Johnson
*Library science—Clara E. Howard.
Summer school—Ralph E. Wagner.
Emory Junior College, Valdosta—Harvey W. Cox
Georgia State College for Men, Tifton (St.).
Frank G Branch
Summer school—J C. Simmons
Georgia State College for Women, Milledgeville (S., T , St)
Jasper L Beeson
Arts and sciences—W T Wynan.
Education—Edwin H Scott.
Summer school—Edwin H. Scott
LaGrange College, LaGrange (M. E., So., wo.).
W. E. Thompson
Arts and sciences—E. A. Bailey.
Mercer University, Macon (S , Bapt , coed.).
Spright Dowell
Arts and sciences—John B Clark.
Graduate—John B. Clark
*Law—J. A. McClain, jr.
Education—Peyton Jacob
Theology—John G. Harrison
Commerce—C B Wray.
Summer school—Peyton Jacob
North Georgia College, Dahlonega (St , coed).
John W West.
Summer school.
Oglethorpe University, Oglethorpe (P., coed.).
Thornwell Jacobs
Arts and sciences—G. F. Nicolassen.
Summer school—Mark Burrows
Piedmont College, Demorest (P , coed).
Henry C. Newell
Arts and sciences—Jonathan C. Rogers.
Shorter College, Rome (A , S., Bapt., wo.).
W. D. Furry.
University of Georgia, Athens (A., S., St., coed.).
Steadman V. Sanford [2]
Arts and sciences—L. L. Hendren
Graduate—R. P. Stephens.
*Law—H. N. Edmunds.
*Pharmacy—R C. Wilson
Education—Jere M Pound, president.
Agriculture—A. M. Soule, president.
*Commerce—R. P. Brooks.
Journalism—John E. Drewry.
Summer school—J. S. Stewart
Wesleyan College, Macon (A., S , M. E. So., wo.)
Dice R. Anderson.
Music and art—Joseph Maertz.

INDEPENDENT PROFESSIONAL SCHOOLS

Atlanta Law School, Atlanta (P., coed.).
Hamilton Douglas.[1]
*Atlanta-Southern Dental College, Atlanta (P., coed.).
S. W. Foster.
Columbia Tehological Seminary, Decatur (Presb., men).
Milton Clark, acting.[1]
Georgia School of Technology, Atlanta (A., S., St., men).
Marion L. Brittain.
Summer school—A. B. Morton.

TEACHERS COLLEGES

Bowdon State Normal and Industrial College, Bowdon (St., coed.).
George W. Camp.
Georgia State Woman's College, Valdosta (S., T., St.).
R. H. Powell.[1]
South Georgia Teachers College, Collegeboro (T., St., coed.).
Guy H. Wells.

NEGRO INSTITUTIONS

John Hope.
Clark University, Atlanta (†S., M. E , coed).
M. S Davage
Arts and sciences—James P Brawley
Gammon Theological Seminary (M E , coed)
John R. Van Pelt, acting
Georgia Normal and Agricultural College, Albany (St., coed).
J. W. Holley
Georgia State Industrial College, Savannah (St., coed).
B. F Hubert.[1]
Normal school
Morehouse College, Atlanta (†S., Bapt , men).
Samuel H Archer
Theology—Charles D Hubert
Summer school—John Phillip Whittaker.
Morris Brown University, Atlanta (A. M. E , coed.).
William A Fountain, jr.
Arts and sciences—Edward C. Mitchell
Theology—David R Fobbs.
Paine College, Augusta (†S , M E So., coed.).
Edmund C. Peters
Spelman College, Atlanta (†S., Bapt , wo.)
Florence M. Read.

JUNIOR COLLEGES

Andrew College, Cuthbert (S , M. E , So , wo.).
S C Olliff.
Burke County Junior College, Waynesboro (C., coed)
W T. Knox.
Emory Junior College, Valdosta (See Emory University)
Junior College of Augusta, Augusta (S , co., coed.).
J. L. Skinner
Lucy Cobb Institute, Athens (P., wo.).
James Brooks [1]
Reinhardt College, Waleska (P , coed.).
W. M. Bratton.[1]
South Georgia State College, Douglas (St , coed.).
J. M. Thrash
Young L. G. Harris College, Young Harris (P., coed.).
T. Jack Lance [1]

HAWAII

UNIVERSITIES AND COLLEGES

University of Hawaii, Honolulu (A., Ter., coed.).
David L. Crawford.
Arts and sciences—William H. George.
Education—B. O Wist.
Engineering—Arthur R. Keller.
Graduate School of Tropical Agriculture—R. N. Chapman.
Summer school—T. M. Livesay.

IDAHO

UNIVERSITIES AND COLLEGES

College of Idaho, Caldwell (W., Presb., coed.).
William J. Boone.
Summer school—Orma J Smith.
Gooding College, Wesleyan (M. E., coed).
Charles W. Tenney.
Arts and sciences—M. Gladys Hayden.
Summer school—M. Gladys Hayden.
Northwest Nazarene College, Nampa (W., Naz., coed.).
R. E. Gilmore, acting.
University of Idaho, Moscow (A W., St., coed).
Mervin G Neale.
Letters and science—J. A. Kostulek.
Graduate—C. W Hungerford.
*Law—W E. Masterson.
Education—J. F. Messenger.
Agriculture—E. J. Iddings.
Engineering—I. C. Crawford.
Business administration—Ralph H. Farmer.
Mines—John W. Finch.
Forestry—F. G. Miller.
Summer school—J. F Messenger.
Southern Branch (junior college), Pocatello (W., coed.)—John R. Dyer.
Summer school.

[1] From directory for 1932.
[2] The chief administrative officer of the University System of Georgia, which includes all of the State higher education institutions and a number of schools of secondary grade, is chancellor Charles M. Snelling, Atlanta, Ga.

NORMAL SCHOOLS

Albion State Normal School, Albion (W., St., coed.).
C E Bocock
Summer School
Lewiston State Normal School, Lewiston (W., St., coed.)
John E. Turner.
Summer school

JUNIOR COLLEGES

Ricks College, Rexburg
Hyrum Manwaring[1]
Southern Branch, University of Idaho. (See University of Idaho)

ILLINOIS

UNIVERSITIES AND COLLEGES

Augustana College and Theological Seminary, Rock Island (N., Luth., coed.).
G. A Andreen.
Arts and sciences—Arthur Wald.
Theology—Conrad Bergendoff.
Music—Sven Lekberg.
Summer school—Arthur Wald.
Aurora College, Aurora (Adv. Chris., coed.).
Orrin R Jenks
Arts and sciences—Stanley H. Perry.
Bradley Polytechnic Institute, Peoria (A., N., P., coed.)
Frederic R Hamilton
Summer school—Albert F. Siepert.
Carthage College, Carthage (A., N., U. Luth., coed.).
Jacob Diehl
DePaul University, Chicago (N., R. C., coed.).
Francis V Corcoran
Arts and sciences, uptown division, E. L. Gaffney; downtown division, Howard E. Egan
Graduate—A. P Schorsch
*Law—William F. Clarke
‡Music—Arthur C Becker.
Commerce—J. A. Losty
Summer school
Elmhurst College, Elmhurst (J., Evan., coed.).
Timothy Lehmann
Arts and sciences—T. W. Mueller.
Eureka College, Eureka (A., N., Disc., coed.).
Clyde L. Lyon.
Arts and sciences—S. G. Harrod.
Greenville College, Greenville (F Meth., coed.).

PREFACE

STATISTICAL SUMMARY OF EDUCATION 1931–32

INTRODUCTION

THIS SUMMARY brings together data from the various statistical chapters of the Biennial Survey of Education, 1930–32, each of which deals with a segment only of the educational system. Each has been published separately as chapters in Bulletin, 1933, No. 2, as follows:

Chapter I. Statistics of State School Systems, 1931–32.
Chapter II. Statistics of City School Systems, 1931–32.
Chapter III. Statistics of Higher Education, 1931–32.
Chapter IV. Statistics of Nurse-Training Schools, 1930–31.
Chapter V. Statistics of Private Elementary Schools, 1930–31.
Chapter VI. The Education of Exceptional Children, 1931–32.

While these do not cover all schools, a large enough portion of all educational enterprises is included to give a general picture of the entire situation.

HOW MANY SCHOOLS ARE THERE?

A school as defined for the statistics of this Office is a 1-room school employing only 1 teacher, or a school of 2 or more rooms usually housed in the same building and having an administrative head. An elementary school, a high school, and a junior college all in the same building are counted as three schools.

Table 1 shows 276,555 schools of different types about which this Office receives information. Individual reports are received from more than 40,000 of these schools. The rest are reported in State totals by the 48 State departments of education.

It is necessary to estimate the number of public elementary schools from the number of buildings. The estimate of 232,750 for 1932 is 5,556 fewer schools than in 1930, due to the closing of 1-room schools. With actual decreases taking place in the number of elementary school pupils and increases in the number of high-school pupils, coupled with consolidation of small schools, it is to be expected that the number of elementary schools will continue to decrease and the number of high schools to increase. There are 26,409 public high schools listed in the records of this Office for 1933–34. In 1930 there were only 23,930, including junior high schools.

TABLE 1.—*Total number of schools of various types, 1931–32*

State	Elementary schools		High schools [1]		Universities, colleges, and professional schools [2]		Teachers colleges and normal schools [2]		Schools for deaf, blind, feeble-minded, and delinquent [3]		Private commercial schools	Nurse-training schools

[1] Number of cards in file, including junior high schools.
[2] Number reporting to Office of Education.
[3] Not including public city-school classes.
[4] Does not include 1 school in Puerto Rico.

HOW MANY PUPILS ARE ENROLLED?

About a fourth of the total population of the United States is attending school daily. More than 30,550,000 students were enrolled in full-time day schools in 1931–32, of which 88.5 percent were in schools under public control. In 1929–30 only 88.3 percent of the students were in public institutions. About 27,000,000 students were in public schools and 3,500,000 in private.

About 23,570,000 pupils are on the elementary school level, 5,590,000 on the secondary school level, and 1,150,000 on the college level. About 67,600 handicapped children are enrolled in State and private residential schools for exceptional children. More than 56,000 Indians and 4,600 natives of Alaska are enrolled in Federal Government schools.

At intervals of 4 to 6 years the Office of Education gathers data for nurse-training schools and private commercial schools. The latest figures, 1930–31, show about 100,000 students in each of these types of schools.

Table 2 does not include the enrollments in night and summer schools, correspondence and extension and short courses of 4 days or more in colleges. In the public-school system there were 1,064,000 people in night schools, 485,500 in summer schools, and 257,000 in part-time and continuation schools.

Table 3 shows more than 850,000 students enrolled in summer schools or extension and correspondence courses conducted by colleges, in 1931–32.

[1] 168,148 noncollegiate students omitted.
[2] 4,724 noncollegiate students omitted.
[3] 2,049 noncollegiate students omitted
[4] 174,921 noncollegiate students omitted.

Since there is some duplication between students in the regular year and the summer session of colleges, and between those in the summer session and extension and correspondence work, it is not possible to show the exact total number of different persons taking some form of college work; but *including* the duplicates there were 1,834,238 enrollments in some form of college education in 1932. This may represent about one and three-quarter million different persons. In addition, 174,296 persons were taking noncollegiate correspondence and extension courses offered by colleges and universities.

Comparisons between enrollments at different educational levels at different periods from 1890 to 1930 can be made from table 4.

The latest complete tabulation of private kindergarten enrollment was made in 1924, but from data on a partial study of private elementary schools for 1930–31, a kindergarten enrollment of 62,269 pupils has been estimated. The economic situation, however, affected kindergarten enrollments earlier than other types of public schools and therefore there were fewer children in kindergarten in 1932 than in 1930.

It should be noted that there was a constant increase of about 13 or 14 percent in elementary school enrollment each decade[1] from 1890 to 1930, but that there was a drop in the actual number of pupils enrolled of 138,936 in these schools from 1930 to 1932.

Enrollments of secondary students[1] have continued to increase. The number of such students doubled from 1890 to 1900, dropped to

[1] The same grades have been included each decade.

a 60-percent increase from 1900 to 1910, and has doubled again each decade since. In the past biennium the increase was 793,005 students, or 6.5 percent.

The number of college students has continued to increase especially at the level of graduate education. The 50-percent increase in the number of college students each decade from 1890 to 1910 reached 68 percent from 1910 to 1920 and 82 percent from 1920 to 1930. In the last biennium the increase was 68,782 students, or 6.3 percent.

HOW MANY STUDENTS GRADUATE?

It is estimated that more than 833,000 students graduated from high school in 1931–32, and reports show 138,000 graduating from first-degree courses in colleges. The rapid increase in the number of graduates from high school from 1920 to 1930 continued the past biennium with more than 25-percent increase. There were 12.7 percent more students graduated from colleges in 1932 than in 1930.

High-school and college graduates

Year	High school	College	Year	High school	College
1890	43,731	14,306	1924	498,006	82,783
1900	94,884	25,324	1926	561,469	96,956
1910	156,429	34,178	1928	596,655	111,161
1920	311,266	48,622	1930	665,223	122,484
1922	357,000	61,668	1932	833,252	138,063

Latest data available (1929) on the percentage of high-school graduates continuing their education the year following their graduation shows that a little more than a third went directly to college and about an eighth, in addition, went to some other type of institution.

High-school graduates continuing their education, 1921–29 [1]

Year	Percent attending college the next year after graduation			Percent attending some other institution

1921	39.8	22.5	31.4	9.2	15.5	14.4

[1] Most recent data available

It is estimated that in 1932 there were 1,900,000 living college graduates, and 8,100,000 living high-school graduates who had not continued their education through college. Therefore, out of every 1,000 persons 21 years of age and over in 1932, there were about 25 with college degrees and 109 with high-school diplomas but not a college degree, making 134 who have gone through high school or beyond.

HOW MANY TEACHERS ARE THERE?

There are approximately 1,063,000 teachers in all types of schools in the United States. About 700,000 of these are in elementary schools, about 250,000 in secondary schools, and about 90,000 in colleges.

[6] Figures for 1927.
[7] Figures for 1931.
[8] Does not include 1,832 men and 817 women, duplicates, in universities, colleges, and professional schools.
[9] Does not include 1,000 men and 502 women, duplicates, in universities, colleges, and professional schools
[10] Does not include 800 men and 254 women, duplicates, in universities, colleges, and professional schools

Although there was a decrease in the number of teachers in public elementary schools from 1930 to 1932, the increase in the number of high-school and college teachers has more than counteracted this loss. There were 25,371 more teachers in 1932 than in 1930. The gain was 12,563, or 5.8 percent, for men, and 12,808, or 1.6 percent, for women. About 21.6 percent of all teachers were men as compared with 20.93 percent in 1930.

WHAT IS THE INCOME FOR SCHOOLS?

The estimated total income for all education from kindergarten through college, public and private, reporting to this Office in 1931–32 was $3,083,808,785. Of this amount $2,459,000,000 was for elementary and secondary education, about $567,000,000 for colleges, and about $58,000,000 for residential schools for exceptional children.

About 82 percent of the income was for schools under public control. About 80 percent was from public sources. However, in public institutions 97.5 percent of the funds came from public sources, while private institutions received only 2.2 percent of their income from these sources.

Including income from auxiliary enterprises for comparisons with 1929–30, the income for 1931-32 was $272,297,863, or 7.9 percent less than in 1929–30.

TABLE 6.—*Source of income, 1931–32*

Schools	Public treasury					Student fees for educational purposes	Gifts	Other local sources	Total
	Federal	State	County	Local	Total

[3] Not reported separately.
[4] $85,104,373 receipts for auxiliary enterprises and activities (board, room, etc.) omitted
[5] $738,643 receipts for auxiliary enterprises and activities (board, room, etc.) omitted.

WHAT IS THE AMOUNT OF SCHOOL EXPENDITURES?

Including the schools in Alaska and Government schools for Indians, the expenditure for all levels of education, public and private, reporting to this Office in 1931–32 was $2,968,010,400. Of this, approximately $1,700,000,000 was spent for elementary education, $700,000,000 for high-school education, and $544,000,000 for colleges. This does not include the Federal Government schools and residential schools for special classes.

All publicly supported education can be paid for by 9 cents a day by each person of voting age in 1932. It cost 10 cents a day 2 years before. About 2 cents in addition will pay the bill for private education. Thus the 74,114,268 persons of voting age in 1934, for 11 cents a day could educate 27,000,000 students in public institutions and 3,500,000 more in private institutions. The annual cost per adult for public education was $32.95 and for private education $7.10 in 1931–32. This is a total of $40.05 as compared with $44.34 in 1929–30.

TABLE 7.—*Expenditures for schools reporting, 1931–32 (includes capital outlay)*

Schools	Public	Private	Total
1	2	3	4
Elementary schools (including kindergarten)	$1,512,819,042	$171,490,015	$1,684,309,057
High schools and academies	[1] 661,831,513	58,073,687	719,905,200
Universities, colleges, and professional schools (including preparatory departments)[2]	201,227,057	292,830,831	494,057,888
Teachers colleges and normal schools [3]	47,426,251	2,371,415	49,797,666
Schools for delinquents (1931)[4]	1,794,763	240,222	2,034,985
Schools for deaf (1931) [4]	2,270,431	490,013	2,760,444
Schools for blind (1931)[4]	840,798	222,854	1,063,652
Schools for mentally deficient (1931)[4]	595,574	149,147	744,721
Government schools for Indians	11,790,147		11,790,147
Government schools for natives in Alaska	841,652		841,652
Other public schools in Alaska	704,988		704,988
Total expenditures	2,442,142,216	525,868,184	2,968,010,400

[1] Includes $13,480,495 for night and summer schools reported separately from day school expense.
[2] $25,831,616 public, $56,704,225 private, and $82,535,841 total expenditures for auxiliary enterprises and activities not included.
[3] $7,789,661 public, $571,795 private, and $8,361,456 total expenditures for auxiliary enterprises and activities not included.
[4] State and private residential schools only, city public schools not included.

The total expenditures for the schools reporting these data for 1931–32 were $2,968,010,400, which was $266,628,167, or 8.2 percent less than the schools spent in 1929–30, although there were 719,380, or 2.42 percent, more students enrolled in 1932 than 2 years before.

WHAT IS THE VALUE OF SCHOOL PROPERTY?

School plants were worth approximately $758,000,000 more in 1931–32 than in 1929–30, but endowments increased only about $300,000. The total value of these two types of property was $11,974,782,000.

While the approximate investment of $10,000,000,000 in educational plants and the $2,000,000,000 in endowments in 1932 seems a large amount of money, it is only 3.6 percent of the total national wealth for that year, estimated unofficially by the National Industrial Conference Board at $329,700,000,000. Since about a fourth of our population is enrolled in schools, an investment of only 3.6 percent of our wealth in education seems small.

TABLE 8.—*Estimated value of property and endowments, 1931–32*

[Thousands of dollars]

Schools	Land, buildings, and equipment	Endowment funds	Total
1	2	3	4
Public elementary and secondary schools	$8,581,540	$463,118	$7,044,658
Private elementary schools (estimated)	400,000		400,000
Private high schools	625,672	79,469	705,141
Universities, colleges, and professional schools	2,249,942	1,365,635	3,615,577
Teacher-training institutions	202,692	6,714	209,406
Total	10,059,846	1,914,936	11,974,782

CHANGES IN THE STATISTICAL PROGRAM IN 1932

The 10-year program for the collection of educational statistics under which these data were collected and the changes which have been made in the statistical forms for collecting data from institutions for higher education have limited the number of tabulations presented and the number of figures obtainable which are comparable with those for previous years.

Since reports from public high schools are to be requested once in 4 years, these will be collected next for 1933–34. The abridged tabulations for city school systems every other biennium include totals for all important items but details by level of education (kindergarten, elementary, etc.) will be included in the full report for 1933–34 and every 4 years thereafter.

Therefore, the chief data for secondary education in 1931–32 are those available from reports by State departments of education. The statistics on private elementary schools are available for the first time this biennium and the statistics on facilities for the education of exceptional children are more complete than in past years.

CHAPTER I

STATISTICS OF STATE SCHOOL SYSTEMS, 1931–32

Prepared by EMERY M. FOSTER, Chief of the Statistical Division; and DAVID T. BLOSE, Assistant Statistician; and W. S. DEFFENBAUGH, Chief, Division of American School Systems

THE STATISTICS PRESENTED in this report on State school systems relate entirely to the public elementary and secondary schools. In no case have the statistics of colleges, universities, and professional schools been included. A few figures are, however, included for kindergarten and private elementary and secondary schools. The information contained herein has been furnished by the State offices of education in 48 States, the District of Columbia, and the 8 outlying parts of the United States, in 1932. Since one State, Mississippi, replied on only a few items for 1932 most of the data used for that State were for 1930. The statistics for the outlying parts are given in several of the tables, but they are not included in the totals.

This chapter includes the combined statistics for all the school districts within each of the States. However, in one section of the report an attempt has been made by subtracting from the totals the corresponding numbers found in chapter II, Statistics of City School Systems, to obtain statistics for places having a population of less than 2,500 or for what is generally regarded as rural territory. The statistics in this chapter include both white and Negro pupils. In a few tables the schools wholly for Negro children have been treated separately.

When the terms "elementary" and "secondary" (or "high schools") are used without qualification, they refer to grades 1 to 8 and 9 to 12, respectively, in systems having 12 grades, and to grades 1 to 7 and 8 to 11, respectively, in systems having 11 grades. In order to present data which are comparable with previous years it is necessary to separate the data according to the traditional 8–4 or 7–4 plans, since comparatively few States have been reporting complete data on the various types of reorganized secondary schools. Several tables, however, contain data for reorganized and 4-year high schools to the extent to which State departments are able to report on such schools. Totals for these schools have purposely been omitted in these tables, since only about half of the States supplied data on the reorganized high school.

Attention may be called to the fact that it has been found impossible to issue the biennial chapter on statistics for State school systems

until more than a year after the close of the biennium. The usual process is for district school trustees to compile information for the county superintendent's office. He in turn must compile the data for all the districts in his county. In some States, by the time all the county superintendents have reported to the State office the greater part of a year has elapsed. The State departments, after receiving the reports of the county and city superintendents, must compile the State reports which requires several months' work. Most of the returns for the year 1931–32 were, however, made to the United States Office of Education with greater promptness than usual.

The text that follows has been prepared to show changes in enrollments, length of school term, average attendance, income, expenditures, per capita costs, etc., during the biennium 1930–32 to indicate significant trends and the variations that exist among the States.

ENROLLMENT

The total number of pupils enrolled in the public elementary and secondary day schools during the year 1931-32 was 26,275,441. Of this number 13,337,769 were boys and 12,937,672 were girls. From 1930 to 1932 the total enrollment increased 597,426; that of boys 2.93 per cent, and that of girls 1.71 percent. Within the biennium the decreases in enrollment ranged from 0.1 percent in North Carolina to 5.7 percent in Arizona. The increases in enrollment ranged from 0.1 percent in Iowa to 10 percent in Nevada, and 11.3 percent in the District of Columbia.

TABLE A.—ENROLLMENTS AND AVERAGE DAILY ATTENDANCE BY STATES IN 1930 AND 1932

State	Enrollments			Average daily attendance		
	1930	1932	Percent of increase or decrease	1930	1932	Percent of increase
1	2	3	4	5	6	7
Continental United States	25,678,015	26,275,441	+2.3	21,264,886	22,245,344	4.6
Alabama	622,988	639,836	+2.7	473,553	508,837	7.5
Arizona	103,806	97,900	−5.7	75,969	80,962	6.6
Arkansas	456,185	446,151	−2.2	330,825	338,909	2.4
California	1,068,683	1,123,550	+5.2	908,765	967,776	6.5
Colorado	240,482	247,074	+2.7	190,742	199,165	4.4
Connecticut	319,453	325,493	+1.9	274,482	285,206	3.9
Delaware	42,360	44,522	+5.1	36,255	38,784	7.0
District of Columbia	80,965	90,087	+11.3	68,312	73,470	7.6
Florida	346,434	367,758	+6.2	267,042	292,728	9.6
Georgia	713,290	742,756	+4.1	538,271	572,343	6.3
Idaho	120,947	119,123	−1.5	98,479	101,993	3.6
Illinois	1,395,907	1,415,553	+1.4	1,203,537	1,226,875	1.9
Indiana	667,379	687,629	+3.0	596,416	649,348	8.9
Iowa	554,655	555,341	+.1	465,051	478,370	2.9
Kansas	431,166	421,354	−2.3	364,801	383,920	5.2

The percent of the total population enrolled in the public schools ranges from 16.3 in New Hampshire to 28.6 in Mississippi, and the ratio of the total enrollment in these schools to children 5 to 17 years of age ranges from 70.7 in Maryland to 102.3 in Nevada. Since the total enrollment is compared with the number of children 5 to 17 years of age it is possible for the ratio to exceed 100.

Grade enrollment.—From 1930 to 1932 there was a decrease in enrollment in the kindergarten and in the first four grades, amounting to as much as 5.3 percent in the first grade. Of the other elementary school grades the greatest increase was in the eighth grade, amounting to 5 percent. The percentage of increase rises rapidly through the high-school grades to 24 percent in the fourth year.

ENROLLMENT BY GRADE, 1930 AND 1932

Grade or year	Enrollment		Number		Percent	
	1930	1932	Increase	Decrease	Increase	Decrease
1	2	3	4	4	5	6
Kindergarten	723,443	701,403		22,040		3 05
First	4,150,919	3,930,196		220,723		5.32
Second	2,802,914	2,776,378		26,536		0 95
Third	2,732,239	2,663,524		68,715		2.51
Fourth	2,599,229	2,589,098		10,131		.39
Fifth	2,382,491	2,462,563	80,072		3.36	
Sixth	2,256,249	2,277,913	21,664		0.96	
Seventh	2,029,736	2,052,825	23,089		1.14	
Eighth	1,601,373	1,681,520	80,147		5 00	
Total elementary	21,278,593	21,135,420		143,173		.67
First	1,626,823	1,777,608	150,785		9 27	
Second	1,192,185	1,387,331	195,146		16.37	
Third	879,525	1,066,755	187,230		21.29	
Fourth	700,889	871,786	170,897		24.38	
Postgraduate		36,541	36,541			
Total secondary	4,399,422	5 140,021	740,599		16.83	
Grand total	25,678,015	26,275,441	597,426		2.33	

The percentage of the total day-school enrollment in the kindergarten has remained practically the same since 1921 (table 2). The first grade shows a decrease from 1921 to 1926 and an increase for 1927 and 1928. Since the latter date the percentage enrolled in the first grade has decreased from 16.6 to 15. Each of the high-school grades shows a steady increase in the percentage of pupils enrolled in these grades.

In 1921 there were 4,248,745 pupils enrolled in the first grade and in 1922 there were 2,849,013 pupils enrolled in the second grade (table 2). By following the figures in italic from 1921 to 1932 a rough picture may be had of the eliminations from the first grade to the twelfth. It should be remembered that the great differences in the lower grades are due to retardation and not to elimination.

The contrasts between States in grade enrollments in 1932 (table 10a) are most marked in the matter of kindergarten enrollments. Among all the States Michigan has the highest percentage of such enrollments, a percentage which is surpassed within the State by no grades except the first and second. Three States report no kindergarten pupils and 17 others have less than 1 percent of their pupils in kindergarten classes. Comparison of columns 2 and 3 reveals that States having a low percentage in column 2 generally have a high percentage in column 3. A number of factors may be operative here, some of which are geographical, but it would appear that there is less retardation in the first grade in States which include provisions for kindergarten training in the school course.

The decrease in percentages through the successive grades is rather uniform until the eighth grade is reached. The discrepancies in this grade are due principally to the existence of numerous 7–4 systems, especially in Southern States. In these cases enrollments for the eighth school year have been counted in column 12, first year in secondary grades; consequently a low enrollment or none at all is reported in column 10 for some States.

The drop between the eighth grade and first year of high school is generally heavier in the more sparsely settled States than in States with large city populations. It is noticeable that the percentage usually drops very little between the eighth grade and the first year of the high school in States having one or more large cities; in a few cases there is an actual gain in percentage. The factor of density of population appears to be a potent influence in retaining pupils (table 10a).

The same factor of proximity to school, either because of a large urban population or because of large numbers of small high schools, is operative in those States showing a high percentage of pupils in high school as compared with the elementary school. The low percentage of pupils in high school for a number of Southern States is due to the presence of a large Negro population and consequent dropping out of school when the compulsory school age is passed.

Elementary school enrollment.—Although the total public-school enrollment increased by more than 13.1 percent from 1922 to 1932 there was within the decade an almost steady decline in the amount of increase in the elementary school enrollment (fig. 1). From 1926 to 1928 the increase in elementary school enrollment was greater than from 1924 to 1926, due in part to an increase in birth rate in 1921. From 1928 to 1930 the increase in the elementary school enrollment was less than from 1924 to 1926, and the decrease from 1930 to 1932 was greater than the increase from 1928 to 1930. The decline in the increase in enrollment follows very closely the decrease in birth rate from about 1923.

High-school enrollment.—From 1930 to 1932 the high-school enrollment increased from 4,399,422 to 5,140,021 pupils, or an increase of 16.8 percent. The number of boys enrolled increased from 2,115,228 to 2,530,790, or 19.6 percent; and the number of girls enrolled increased from 2,284,194 to 2,609,231, or 14.2 percent. The least increase was from 1926 to 1928. The increase from 1930 to 1932 exceeds that of 1928–30 by 252,456 pupils.

From year to year a larger and larger percentage of the total school population is being enrolled in high school, due largely to the fact that the American people have come to realize that a high-school education is none too much to meet present-day standards, and to the fact that the modern high school is attempting to meet the needs of the pupils and of society in general better than it did not so many years ago. It is of interest, therefore, to measure this increase. The proportion of pupils enrolled in the high school in 1880 was only 1.1 percent of the total school enrollment (table 1). There has been a gradual increase from that time to 19.6 percent in 1932.

While the percentage of public-school pupils enrolled in high school averages 19.6 for the country as a whole, there is considerable diversity among the States with respect to the percentage of pupils enrolled in the public high school. The percentages range from 9.9 in Mississippi to 27.6 in Washington (fig. 2). The State of Washington has, therefore, about three times as great a proportion of its school enrollment in high school as the State of Mississippi.

Night schools.—From 1930 to 1932 the number of night-school pupils decreased from 1,245,124 to 1,063,779. The largest enrollment in night schools was in California (table 13). California and New York were the only States enrolling more than 100,000 night-school pupils each in 1932. Each of the following States enrolled between 50,000 and 100,000 pupils in its night schools: Illinois, Massachusetts, Ohio, Pennsylvania, and Wisconsin. The decrease in the night-school enrollment has been due partly to the elimination or the curtailment of night-school work by many boards of education. The decrease has, however, not been as great as the figures indicate, since some part-time and continuation-school pupils were included in the 1930 figures, while none are included in those for 1932. The night-school movement was getting under way and had great promise of expansion in 1930, but during the depression night schools were among the first of the various types of schools to feel its effect.

Summer schools.—The public summer-school enrollment decreased from 520,874 in 1930 to 485,501 in 1932, or 6.8 percent. Several States, as may be noted in table 13, did not report any summer-school pupils. In no State did the enrollment reach 100,000. The highest was 73,144. This honor goes to New York. Only the following States had a summer-school enrollment of more than 25,000 each: California,

Illinois, Massachusetts, New Jersey, New York, Ohio, and Pennsylvania. Summer schools were also among the first to feel the effects of the depression; many boards of education having eliminated them entirely. These schools were offering great opportunities to children

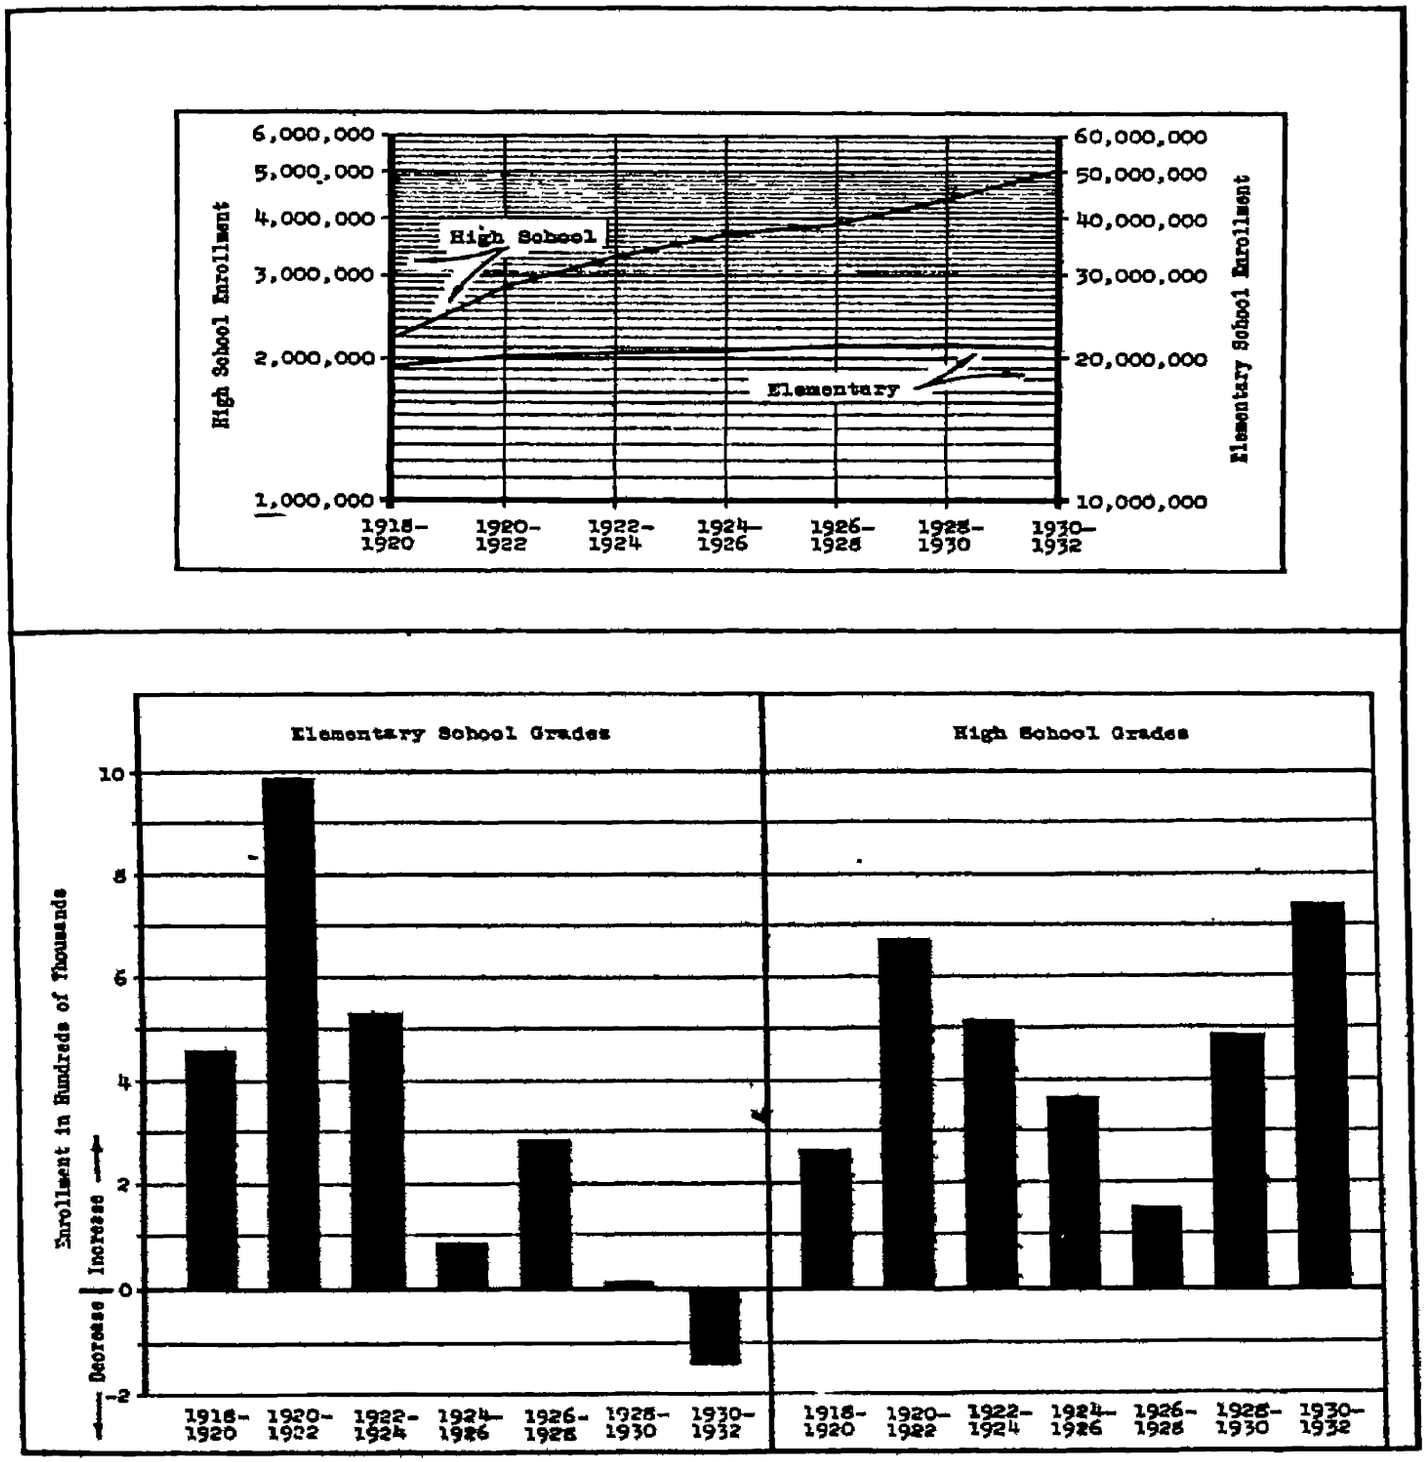

FIGURE 1.—Biennial changes in enrollments in elementary- and high-school grades, 1918–20 to 1930–32. (The logarithmic chart above shows rate of change; the arithmetic chart below shows the amount of actual change from the preceding biennium.)

to make up for lost time in school or to complete more work within a year.

Part-time and continuation schools.—This is the first time that statistics relating to part-time and continuation schools have been col-

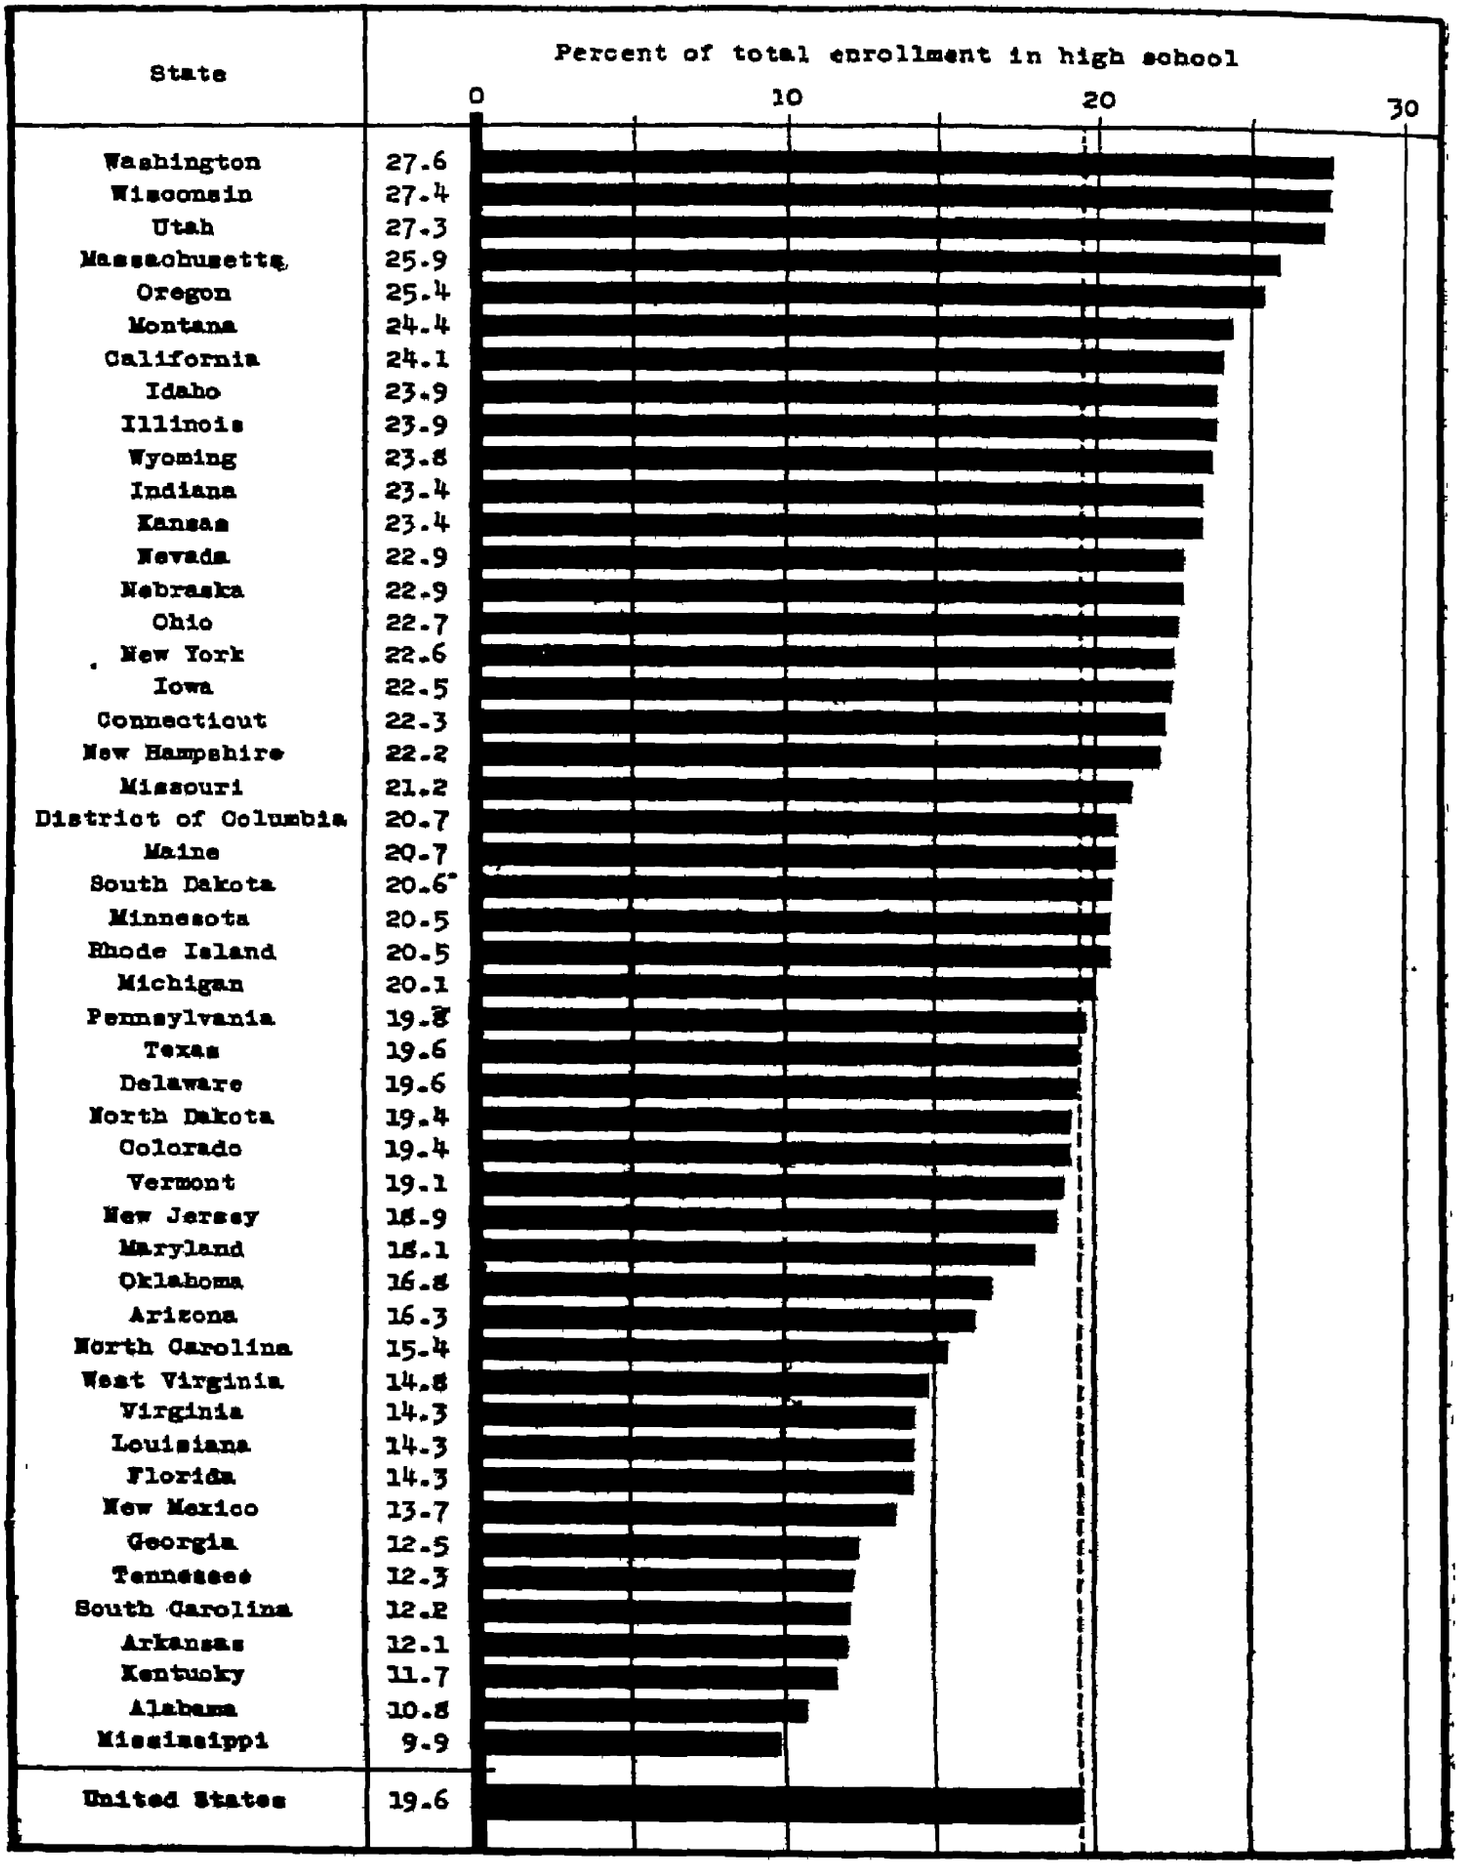

FIGURE 2.—Percentage of total enrollment in high school, by State, last 4 years of system, 1931–32.

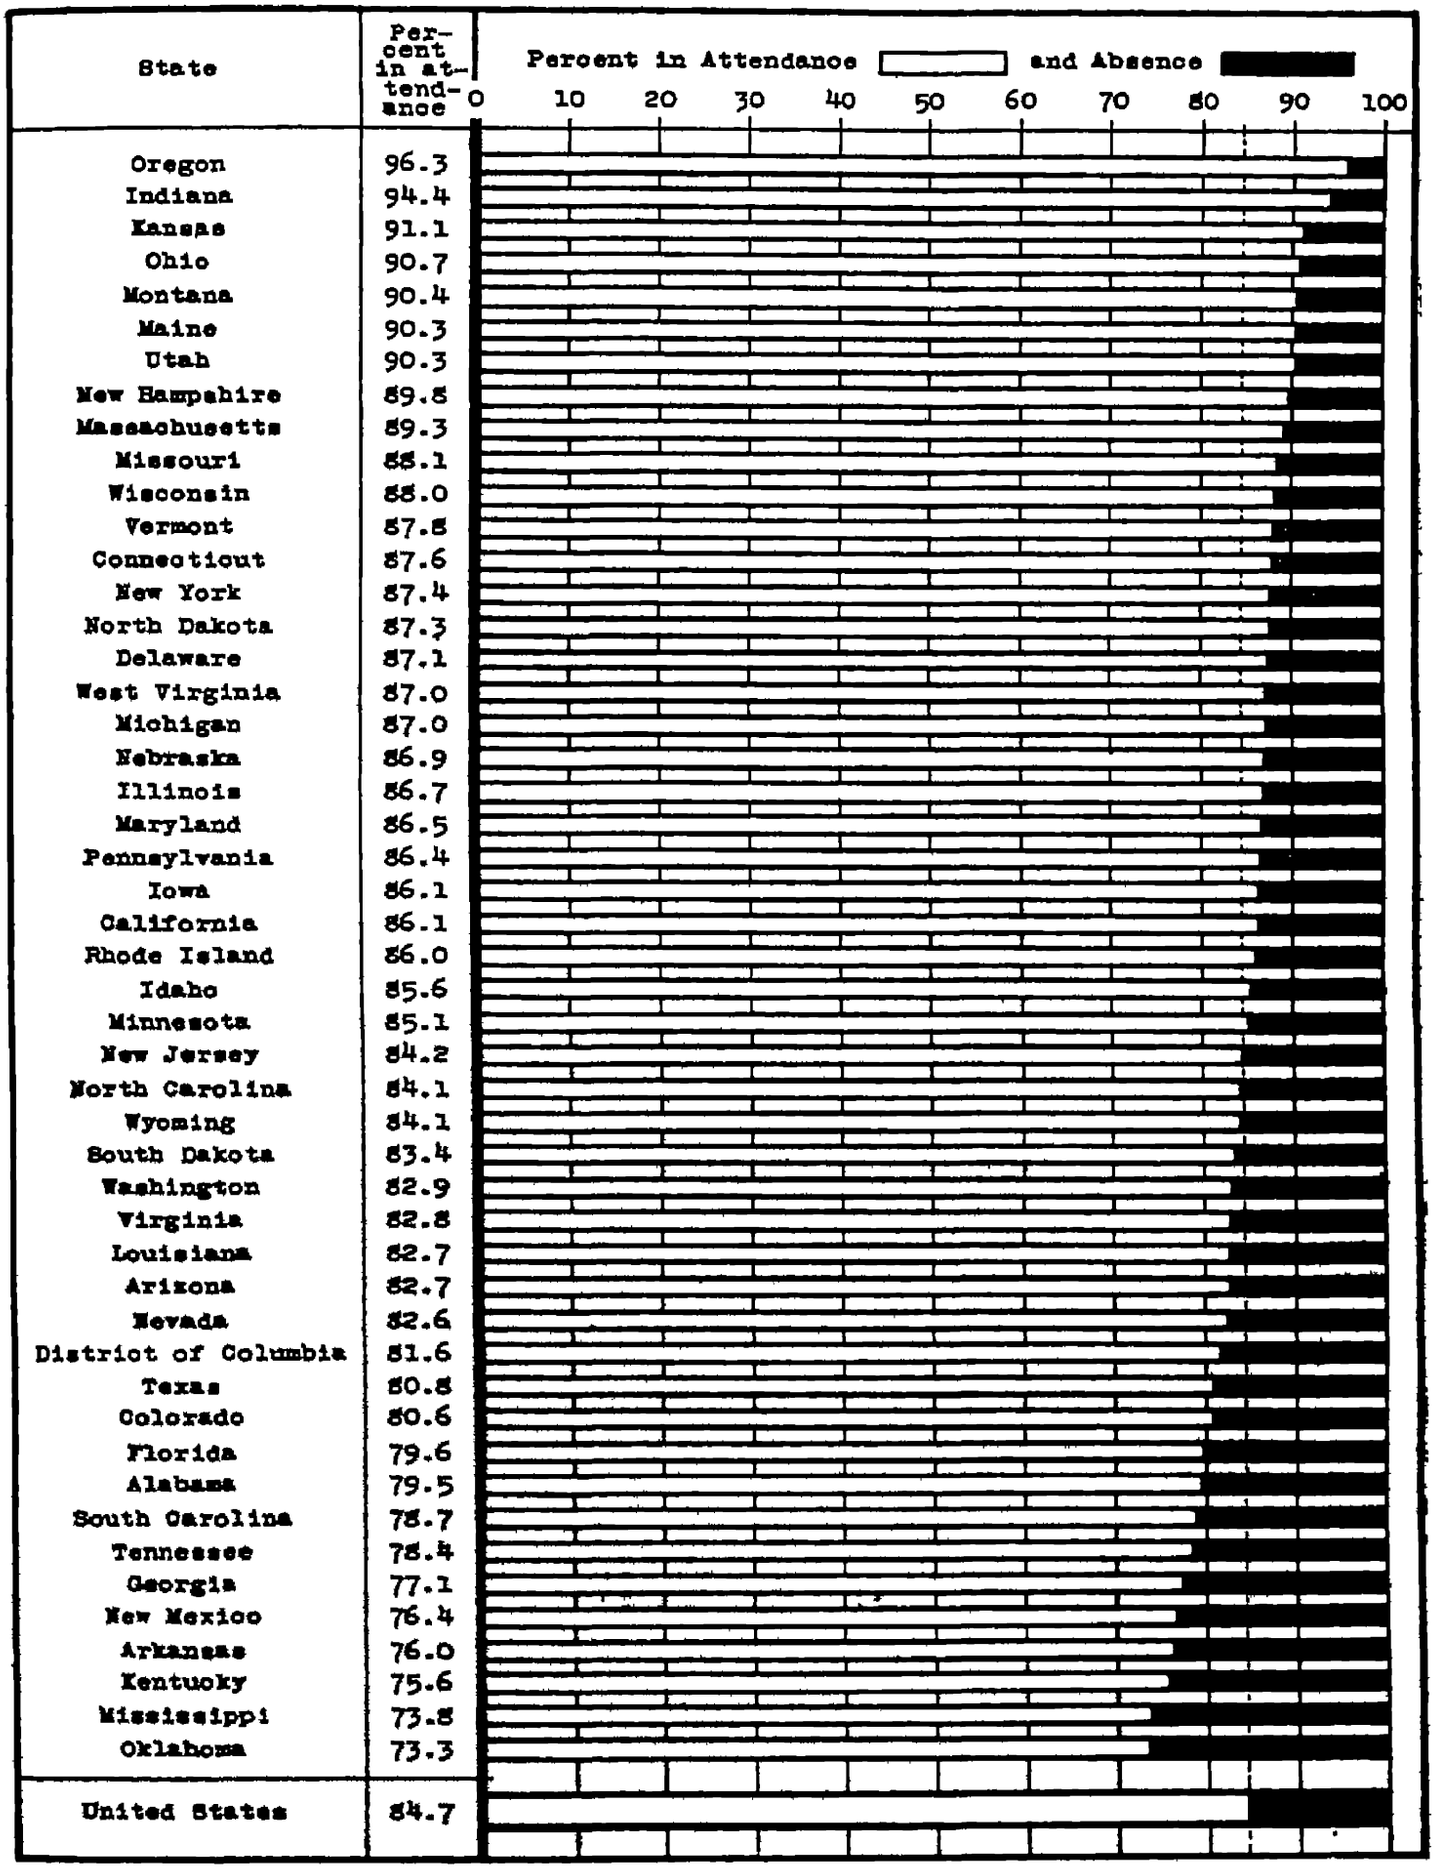

FIGURE 3.—Percentage of enrollment in average daily attendance and absence, by State, 1931–32.

lected on the blanks used by the Office of Education in collecting State school statistics. This first report shows that in the 27 States reporting there are 256,900 pupils and 4,151 teachers, and that the total cost of instruction is $7,947,701 (table 13). On the basis of enrollment the average cost per pupil is $30.95. New York reports the largest part-time and continuation-school enrollment, 84,866; and California the next largest, 80,557.

SCHOOL ATTENDANCE

The number of pupils in average daily attendance in the public elementary and secondary schools of the country in 1932 was 22,245,344. From 1930 to 1932 the number in average daily attendance increased 4.6 percent. Table 7, page 58, shows the number of pupils attending daily in each of the States by decades from 1870 to 1930, and for 1932. Table A shows the average daily attendance by States for 1930 and 1932 and the percentage of increase or decrease within the biennium. The greatest increase was in Oregon. In 23 States the increase was 5 percent or more.

Attendance in relation to enrollment.—From 1930 to 1932 the total enrollment in the public schools increased from 25,678,015 to 26,275,441, or 2.3 percent, and the average daily attendance from 21,264,886 to 22,245,344, or 4.6 percent. Of the 26,275,441 children enrolled in 1932, approximately 4,030,097 were out of school each day.

The children who enroll in school attend more regularly in recent years than they did several decades ago (table 1). In 1880 only 62.3 percent of the children enrolled attended each day, while in 1930 82.8 percent, and in 1932 84.7 percent of the children enrolled were attending each day. The increase in the percentage of school attendance is doubtless due to several causes. The compulsory school-attendance laws have become more effective not only by causing more children to enroll in school, but by compelling more regular attendance on the part of those who enroll. The function of the attendance officer as now conceived is not merely to get the pupils into school, but to seek the causes of nonattendance. Many of the compulsory school-attendance laws have been strengthened so as to require attendance for the full length of the school term. Better school attendance cannot be attributed entirely to improved attendance service. Teachers are now better trained than formerly and know better how to appeal to the interests of the children, thus making school a more desirable place than it was formerly. Courses of study have also been improved to meet more nearly the needs of the individual pupils, thus helping the school to hold the children in regular attendance. The transportation of pupils is also another means of helping secure better attendance. In many communities children who live some distance from school need no longer remain at home on account of inclement weather.

The extracurricular activities may also be another factor that should be noted in seeking the cause for better school attendance. The increased interest of parents in the education of their children should not pass unnoticed.

Although school attendance has been improving there is doubtless some room for further improvement. Just how many children out of every 100 enrolled might reasonably be expected to be in daily attendance is not a question easily answered; but it would seem that with better school facilities, better health supervision, and better enforcement of the school-attendance laws in many communities the average in most States could be raised to at least 90 out of every 100. Seven States; namely, Indiana, Kansas, Maine, Montana, Ohio, Oregon, and Utah have already reached this mark. Figure 3 shows percentage attendance and percentage absence by States.

Days attended and length of school term.—The average number of days that the schools were actually in session in 1932 was 171.2, or about 8½ months. In 10 States the average school term is 180 days or more; in 28, from 160 to 179 days; and in 8, from 140 to 159 days. In 3 States it is less than 140 days (table 9). For the country as a whole the school term decreased 1½ days from 1930 to 1932. The number of States in which the average school term was increased or decreased within the biennium and the number of days increased or decreased are as follows:

	Number of days [1]									
	0–2	2–4	4–6	6–8	8–10	10–12	12–14	14–16	20–22	Total number of States
1	2	3	4	5	6	7	8	9	10	11
Number of States increasing	10	2	2	2	------	------	2	1	------	19
Number of States decreasing	11	7	4	------	3	2	------	1	1	29

[1] No States reported either increases or decreases from 16 to 20 days.

Twenty-four States reported a distribution of enrollment according to the length of the school term provided in 1932. The results have been summarized in table 30 (p. 94). Of the 11,610,339 children represented in this tabulation 9.6 percent have a school term of 150 days or less, or a school term of not more than 7½ months; 6.1 percent have a term of not more than 6½ months; 3.5 percent a term of not more than 5½ months; and 1.7 percent a term of not more than 4½ months.

Table 9 (p. 60) shows the length of school term, exclusive of holidays provided in each of the States, but it does not show how many days each pupil attends school. The important question is, How well is

the school term provided taken advantage of by the children enrolled? While the average length of the school term in 1932 was 171.2 days the average number of days attended by each pupil was 144.9. The average number of days attended in 1932 ranges from 98.1 in Mississippi to 163.2 in Illinois. In only 6 States did the children enrolled attend 160 days or more; in 17 States from 151 to 160 days; in 12 States from 141 to 150 days; in 4 States from 131 to 140 days; and in 4 States from 121 to 130 days. In 6 States the children attended school an average of 120 days or less, or for not more than 6 months a year.

Within the biennium the average number of days attended increased from 143 in 1930 to 144.9 in 1932. The greatest increase in any State was 15.2 days.

The following distribution by days shows the number of States in which the number of days attended increased or decreased from 1930 to 1932:

	Number of days [1]															Total number of States
	0–1	1–2	2–3	3–4	4–5	5–6	6–7	7–8	8–9	10–11	11–12	12–13	13–14	14–15	15–16	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Number of States increasing	6	3	4	4	3	1	2	3	....	1	1	1	2	1	1	33
Number of States decreasing	2	2	2	5	1	1	1	....	1	.....	.....	.....	.....	.....	.....	15

[1] No State reported increases or decreases from 9 to 10 days

Another measure with respect to school attendance in relation to the school term provided is the percentage of the school term not attended. From 1910 to 1932 this percentage dropped from 27.5 to 15.3. In 7 States the comparative drop was much greater (table B). From 1930 to 1932 the percentage of the school term not attended fell from 17.1 to 15.3.

Since each State and each school district provide a certain amount of money for running the schools, they would cost no more if every pupil were to attend school every day of the school term.

TABLE B.—PERCENT OF TERM NOT UTILIZED, 1910–32

ADMINISTRATION, INSTRUCTION, PERSONNEL, AND RELATED ITEMS

Administrative officers and assistants.—Of the 20,672 administrative officers in 1932, 824 are State superintendents and other State administrative officers, 1,137 other personnel in the State departments, 5,143 county superintendents and assistants, 11,127 city superintendents and assistants, and 2,441 district and township superintendents in the States reporting such officers (table 18).

Supervisors and principals.—Only 24 States reported the number of supervisors of instruction for the elementary schools and 23 for the secondary schools. The number of elementary-school supervisors reported is 3,520 and of secondary-school supervisors 1,314, making a total of 4,834. In these States there are 452,132 teachers. The approximate average number of teachers per supervisor is therefore 94 for the States reporting.

Only 30 States reported the number of elementary-school principals, and only 30 the number of secondary-school principals. In the States reporting there are 11,592 principals of elementary schools and 10,573 principals of high schools, or a total of 22,165 principals. In these

States there are 599,449 teachers, thus there is a principal for every 27 teachers.

Number of teachers.—The total number of public elementary and secondary-school teachers employed in the United States in 1932 was 871,607 and the total number of teaching positions was 863,348. The difference in the two numbers is due to the fact that some of the teachers resign during the school term and others are employed to fill their positions.

TABLE C.—DISPARITY BETWEEN INCREASE IN TEACHING POSITIONS AND INCREASE IN AVERAGE DAILY ATTENDANCE, 1930–32, WITH NUMBER OF PUPILS IN AVERAGE DAILY ATTENDANCE PER TEACHER IN 1932

Montana	−63	−1.0	+2.3	18.0					

In 1932, there were 20,747 more teaching positions than in 1930, which represents an increase of 2.5 percent. The increase in the number of such positions may be accounted for by the increase in enrollments. The percentage increase in the number of teaching positions was, however, not as great as the percentage increase in

the number of pupils in average daily attendance, which amounted to 4.6 percent. In some States the percentage increase in the number of pupils in average daily attendance is very marked compared with the percentage increase in the number of teaching positions (table C).

From the data presented in table 12 (p. 68) it will be seen that the proportion of men teachers declined from 42.8 percent in 1880 to 14.1 percent in 1920, and increased to 16 6 percent in 1930 and to 17.7 percent in 1932. In the following States 25 percent or more of the teachers are men: Arkansas, Idaho, Indiana, Kentucky, Utah, and West Virginia. The States in which the percentage of men teachers is less than 10 are: Connecticut and Vermont. In 39 States there was a higher percentage of men teachers in 1932 than in 1930. In nine States the percentage of men teachers has decreased since 1930. The increase in the proportion of men teachers from 1920 to 1930 may probably be accounted for by the increase in teachers' salaries during that period, the salaries being such in many communities that they attracted more men.

Pupil-teacher ratio.—The number of pupils enrolled per teacher decreased from 30.5 in 1930 to 30.4 in 1932; the number of pupils in average daily attendance per teacher increased from 25.2 to 25 8. In 4 States the number of pupils in average daily attendance per teacher in 1932 was from 30 to 34.9; in 24 States and the District of Columbia from 25 to 29.9; in 13 States from 20 to 24.9; and in 7 States the number of pupils in average daily attendance per teacher was less than 20.

The small pupil-teacher ratio in some of the States may be accounted for by the fact that there are many 1-room schools that enroll very few pupils. For example, the average enrollment in the 1-teacher schools in Colorado is 12.5; in Iowa, 15.8; in Kansas, 15.9, in Minnesota, 11.9; and in North Dakota, 15.1, according to figures obtained from the latest published reports of the State departments of education in these States.

Since all of the States did not report the number of pupils and the number of teachers for elementary, junior and senior high school grades separately, such figures on these returns as were reported have been used to estimate the pupil-teacher ratio at various school levels. Using the data supplied by 23 States it is found that the pupil-teacher ratio in 1932 in the elementary school was 33; in the junior high school 28.8; in the junior-senior high school 26.9; in the senior high school 25.7; and in the regular high school 26.2.

Salaries of teachers, principals and supervisors.—The average annual salary of teachers, supervisors and principals combined was $1,417 in 1932. The average by States ranges from $593 in Arkansas to $2,494 in New York (table 18).

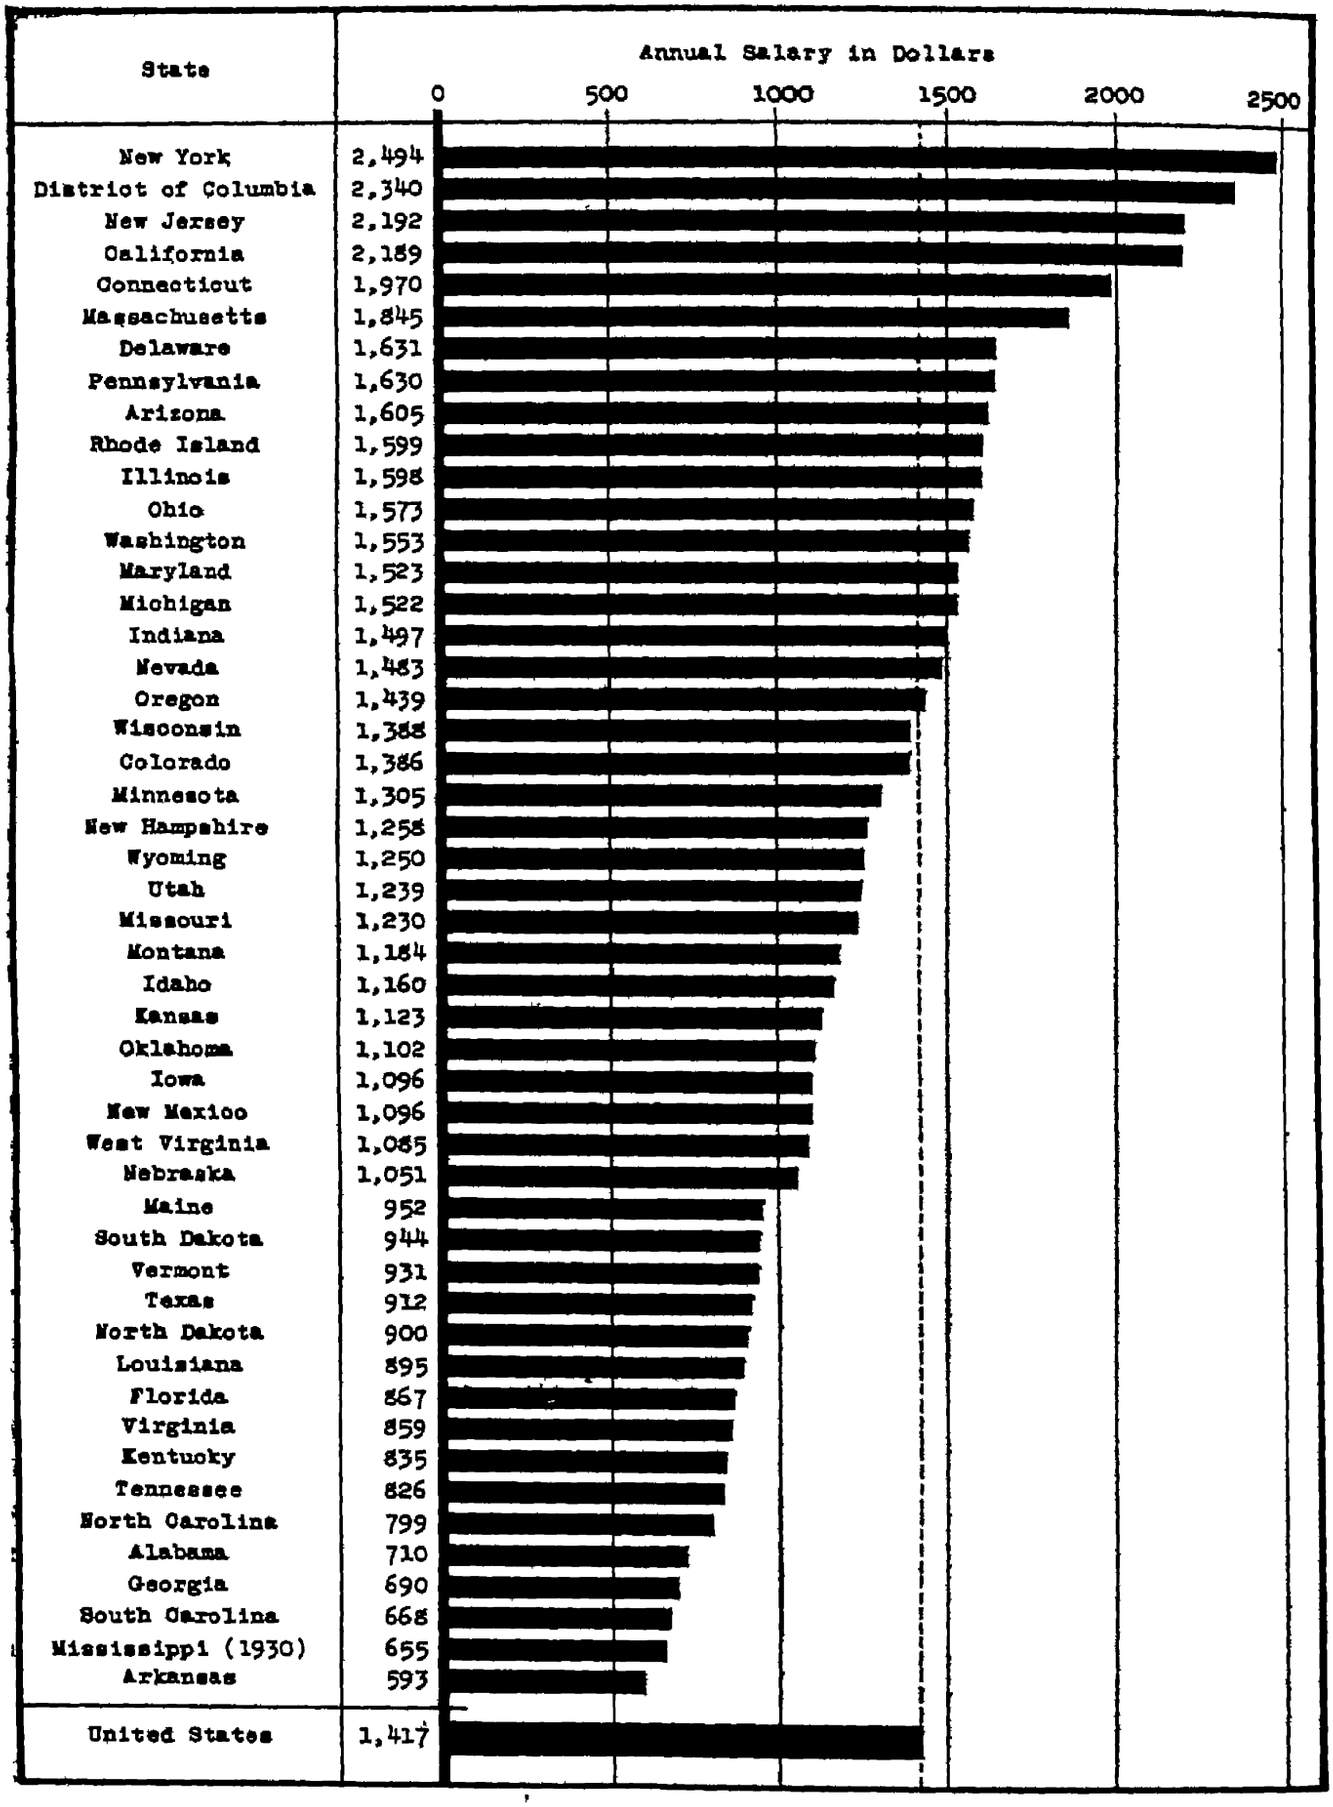

FIGURE 4.—Average annual salary of teachers, supervisors, and principals, by State, 1931–32.

Only a few States made a separation of expenditures for salaries of elementary teachers and of teachers in the various types of secondary schools. Such data as were supplied on these points are presented in table 29. The average salary paid teachers, supervisors, and principals of the elementary schools in the 23 States reporting was $1,192; of junior high schools in the 11 States reporting was $1,671; of junior-senior in 4 States, $1,245; of senior high schools in the 8 States reporting was $1,864; and of regular high schools in 18 States reporting was $1,780. The average elementary school salary varied from $2,031 in New Jersey to $495 in Arkansas; the average junior high school salary from $2,334 in New Jersey to $889 in Arkansas; junior-senior $2,291 in New Jersey to $874 in Arkansas; the average senior high school salary from $2,840 in New Jersey to $1,324 in Florida; and the average regular high-school salary from $2,747 in New Jersey to $772 in Arkansas.

FINANCIAL SUPPORT

The schools in most of the States are supported chiefly by local taxation as is shown in the following paragraphs devoted to revenue receipts.

Revenue receipts.—The total revenue receipts for public elementary and secondary schools in 1930 was $2,088,556,837 and in 1932 the amount was $2,072,396,907, or a decrease of 0.8 percent. Within the biennium Federal aid for vocational education increased 12.6 percent, subsidies from educational foundations decreased 37.2 percent, the funds derived from State sources increased 16.3 percent, from county sources they decreased 14.8 percent, and from local sources they decreased 2.8 percent. The total revenue receipts and the source of such are shown for each of the States in table 22.

Considering all revenue receipts the amounts and the percentage derived from Federal, State, county, and local sources in 1930 and 1932 were:

Source	1930		1932	
	Amount	Percent	Amount	Percent
1	2	3	4	5
Federal aid	$7,333,834	0 4	$8,262,137	0 4
State	353,670,462	16. 9	411,379,450	19 9
County	216,746,764	10 4	184,662,968	8. 9
Local	1,510,805,777	72. 3	1,467,092,352	70. 8
Total	2,088,556,837	100. 0	2,072,396,907	100 0

The proportionate amount of the total revenue receipts from Federal and State, county, and local sources is shown by States in table 19, page 76.

The amounts and the proportional amounts derived from taxation and other sources in 1930 and 1932 were:

Source	1930		1932	
	Amount	Percent	Amount	Percent
1	2	3	4	5
Permanent funds	$23, 707, 636	1. 1	$25, 793, 192	1 2
Lease of school lands	3, 748, 881	2	3, 142, 906	.2
Appropriation and taxation	1, 975, 000, 085	94 5	1, 978, 344, 542	95. 5
Federal aid	7, 333, 834	.4	8, 262, 137	4
All other revenue receipts	78, 706, 401	3. 8	56, 854, 130	2. 7
Total	2, 088, 556, 837	100 0	2, 072, 396, 907	100 0

The greatest amount of income for the public schools is derived from direct taxation for school purposes and from appropriations from general funds as is shown in above table.

Considering these two sources only, excluding income from permanent funds and leases of school land and Federal appropriation, 19 5 percent of the funds raised for school purposes comes from the State, 8.9 percent from the county, and 71.6 percent from local school districts. Thus the county and other local school districts provide 80.5 percent of the school funds. Table 19, page 76, and figure 5 show for each State the proportionate amounts of school revenue from appropriations and taxation derived from State, county, and local sources.

In only 2 States, Delaware and North Carolina, is 50 percent or more of the receipts from appropriations and taxation for school purposes derived from State sources. The percentage of school funds derived from State sources ranges from 88.8 percent in Delaware to almost nothing in Kansas.

In 29 States part of the school funds from taxation and appropriations is reported as coming from the county. In these States the proportion derived from the county ranges from 64.1 percent in Nevada to 0.9 in New Jersey. The States in which the county furnishes one third or more of the school funds are Alabama, Arizona, Idaho, Louisiana, Montana, Nevada, New Mexico, and Tennessee.

The proportion of school funds derived from units smaller than the county ranges from 98.2 in Kansas to 11 2 percent in Delaware. In 20 States these smaller units supply 75 percent or more of the school income; in 13 States from 50 to 74 percent; in 11 States from 25 to 49 percent; and in 6 States less than 25 percent. Taken together the county and local units within the county supply 75 percent or more of the school funds in 30 States, from 50 to 74 in 17 States, from 25 to 49 percent in 1 State, and less than 25 percent in 1 State.

State	Percent and Source			Percent

FIGURE 5.—Percentage of receipts from taxation and appropriation from State, county, and local sources, by State, 1931–32.

$2,469,311,376 in 1930 and $2,233,790,831 in 1932, a decrease of 9.5 percent. Considering both revenue and nonrevenue receipts for 1932, the proportion derived from various sources was: Federal, 0.37 percent; State, 18.42 percent; county, 8.98 percent; local, 72.21 percent; subsidies from educational foundations, 0.02 percent. The total amounts of revenue and nonrevenue receipts are shown for each State in table 23.

TABLE D.—COMPARISON OF RECEIPTS FROM LOANS AND BOND SALES—1930 AND 1932

[2] Statistics, 1930.

EXPENDITURES

The total expenditure for the public day schools in 1932 was $2,161,170,060, excluding payment of bonds. The amount spent for the same purpose in 1930 was $2,306,965,557. This was a decrease of 6.3 percent for the 2-year period. Tables 24, 25, and 26 show, by States, the amounts expended in 1932 for current expenses, capital outlay, and debt service, and table 27 gives a percentage analysis for each expense item for each of the States.

Current expenses.—The total current expenses, not including interest, decreased from $1,843,551,708 in 1930 to $1,809,939,016 in 1932, or 1.8 percent. The change from 1930 to 1932 ranges from a 21-percent decrease in South Carolina to a 12.8-percent increase in Delaware. Thirty-one States register a decrease from 1930 to 1932, ranging from 0.4 to 21 percent, and 17 States an increase ranging from 0.7 to 12.8 percent.

TABLE E.—COMPARISON OF CURRENT EXPENSES IN 1930 AND 1932, BY STATES

Virginia	20,026,944	19,955,247	− 4	44.25	41.35	−6 6
Washington	27,976,728	26,630,775	−4.8	100 45	92.56	−7 9
West Virginia	25,205,495	23,461,879	−7 1	72.18	63.82	−11.6
Wisconsin	44,566,798	44,168,709	−.9	94.17	86 56	−8.1
Wyoming	6,137,422	5,475,079	−11.1	128 59	114.89	−10.7

The following shows the amount expended and the cost per pupil for each of the several functions; and also the proportionate amounts devoted to each function in 1930 and 1932.

COMPARISON OF STATE SCHOOL EXPENSES IN 1930 AND 1932

Purpose	1930			1932			Percentage decrease in per capita cost
	Amount	Per capita cost on average daily attendance	Per cent of total	Amount	Per capita cost on average daily attendance	Per cent of total	
1	2	3	4	5	6	7	8
General control	$78,679,502	$3.70	4.3	$74,910,121	$3.37	4.1	8.9
Instruction:							
Salaries	1,250,427,194	58.80	67.9	1,265,443,910	56.89	69 9	3.2
Textbooks and supplies	67,300,039	3.17	3.6	67,887,916	3 05	3.8	3.8
Total instruction	1,317,727,233	61.97	71.5	1,333,331,826	59.94	73 7	3.3
Operation	216,072,433	10.16	11.7	198,905,327	8.94	11.0	12.0
Maintenance	78,810,238	3.71	4.3	58,518,348	2.63	3.2	29.1
Auxiliary agencies	101,992,622	4.80	5.5	98,707,181	4.44	5 5	7.5
Fixed charges	50,269,680	2.36	2.7	45,566,213	2.04	2.5	13.6
Total current expenses	1,843,551,708	86.70	100 0	1,809,939,016	81.36	100 0	6.2
Capital outlay	370,877,969	17.44	.....	210,996,262	9.48	.....	45.6
Interest	92,535,880	4 35	.....	140,234,782	6.30	.....	[1] [2] 44.8

[1] Increase.
[2] Mostly due to more States reporting interest charges. 38 States reported interest charges in 1930 while all States show interest charges for 1932.

A further analysis of the school expense dollar shows that 1.6 cents is for school board and business offices, 2.5 cents for superintendents and their offices, 69.9 cents for salaries of supervisors, principals, and teachers, 1.3 cents for textbooks, 2.5 cents for educational supplies, 6.2 cents for janitorial service, 4.8 cents for fuel, light, water, and janitors' supplies, 0.2 cents for public libraries under control of board of education, 0.6 cents for the promotion of health, 3.1 cents for transportation of pupils, 0.2 cents for compulsory attendance service, 1.4 for other auxiliary agencies, and 2.5 for fixed charges.

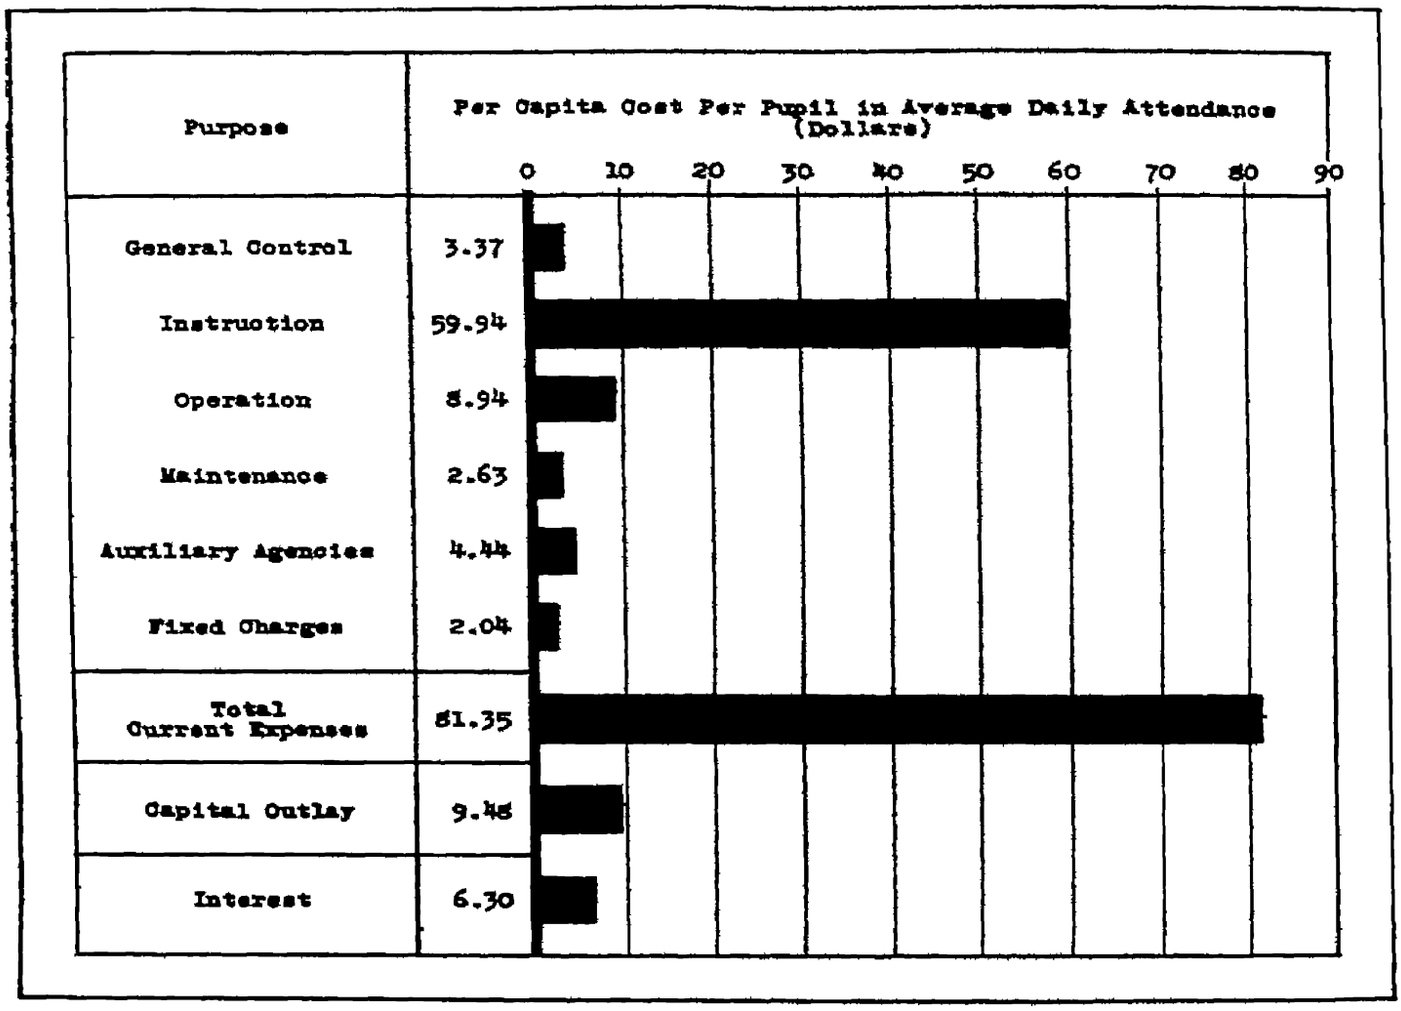

FIGURE 6.—Annual cost per pupil in average daily attendance for current expenses, capital outlay, and interest, 1931–32.

Table 27 shows for each State the percentage distribution of expenditures for each major current expense item. The percent devoted to general control ranges from 1.6 in Michigan and North Dakota to 8 in Arkansas; to instruction, from 64.7 in New Hampshire to 81.3 in South Carolina; to operation, from 3.6 in Alabama to 12.7 in Nevada; to maintenance, from 1.3 in Arkansas and South Carolina to 5.8 in Maine; to auxiliary agencies, from 3 in Nebraska to 15 in North Dakota; and to fixed charges, from 0.7 in New Jersey to 7.3 in Maryland. Since these percentages are State averages, the variation in the proportionate amounts spent for each current expense

item would vary considerably among the school districts of the country. These variations are partly due to climatic differences and to some extent to variations in accounting procedure.

Capital outlay.—The amount spent for capital outlay in 1930 was $370,877,969, and in 1932 the amount spent for this purpose was $210,996,262. Within the biennium there was, therefore, a decrease of $159,881,707, or 43.1 percent, in the amount spent for new buildings, grounds, and equipment. From 1920 to 1932 the peak for capital outlay was reached in 1925 when the amount expended for new buildings, sites, and new equipment was $433,584,559. The amount spent for capital outlay in 1932 was 33.6 percent below the average for these expenditures from 1920 to 1932 and 51.3 percent less than in 1925. Of the total expenditure in 1930, excluding payments of bonds, 16.1 percent was for capital outlay; in 1932, 9.7 percent was for this purpose. The proportionate amount for capital outlay varied considerably among the States, ranging from 2.1 percent in Georgia to 36.8 percent in Delaware.

Debt service and interest.—In 1930, payments on bonds and short-time loans amounted to $144,950,229, and in 1932 to $182,943,930, an increase of $37,993,701, or 26.2 percent. Between 1920 and 1932 the largest payment for these purposes was in 1932, the amount at this time being $182,943,930. The increase from 1920 to 1932 amounted to $123,809,038, or 209.4 percent.

In 1930, only 38 States reported the amount of interest paid, which was $92,535,880. In 1932, the interest payments in these same States was $110,273,108. This was an increase of $17,737,228, or 19.2 percent, in interest payments within the biennium, in these 38 States. Table F shows the expenditure for interest as reported for 1932 and the amount per pupil in average daily attendance.

Cost per pupil.—The average annual cost, based on current expenses (including interest) per pupil in average daily attendance decreased from $91.05 in 1930 to $87.67 in 1932, or $3.38 per pupil. Capital outlay decreased from $17.44 per pupil in 1930 to $9.48 in 1932, a decrease of $7.96. The average annual cost per pupil for current expenses (including interest) and capital outlay combined decreased from $108.49 in 1930 to $97.15 in 1932, making a decrease of $11.34 per pupil. Figure 8 shows per capita costs for 1932.

Based upon enrollment the per-pupil cost for current expenses (including interest) decreased from $75.40 in 1930 to $74.22 in 1932, and the cost per pupil for capital outlay within the biennium decreased from $14.44 in 1930 to $8.03 in 1932, a difference of $1.18 and $6.41, respectively.

As shown in table 28 and in figure 9 there is much variation among the States in the cost per pupil. Considering the cost per pupil in average daily attendance, based on current expenses, the cost ranges

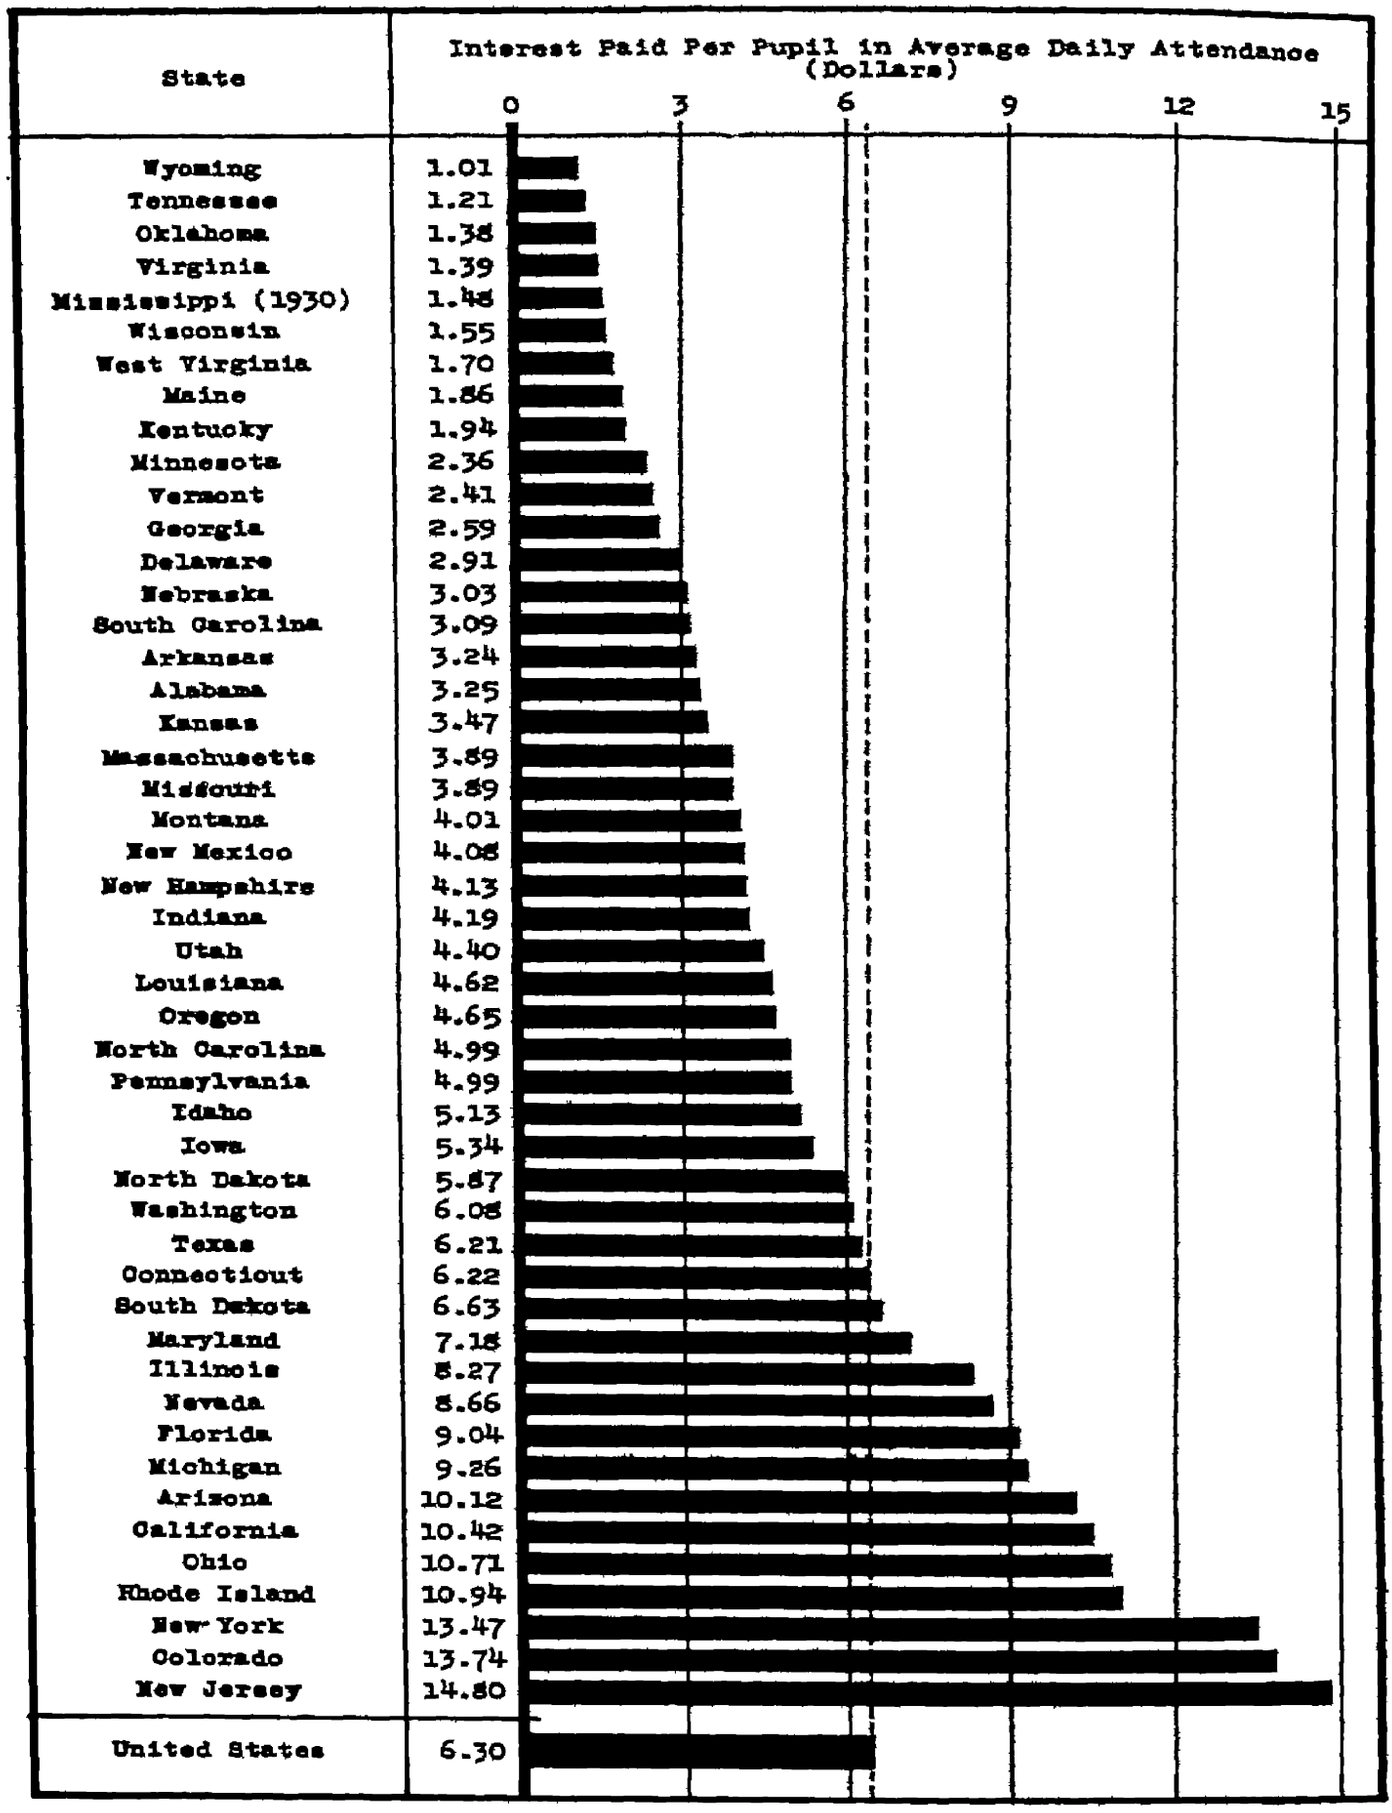

FIGURE 7.—Interest paid per pupil in average daily attendance, by State, 1931–32.

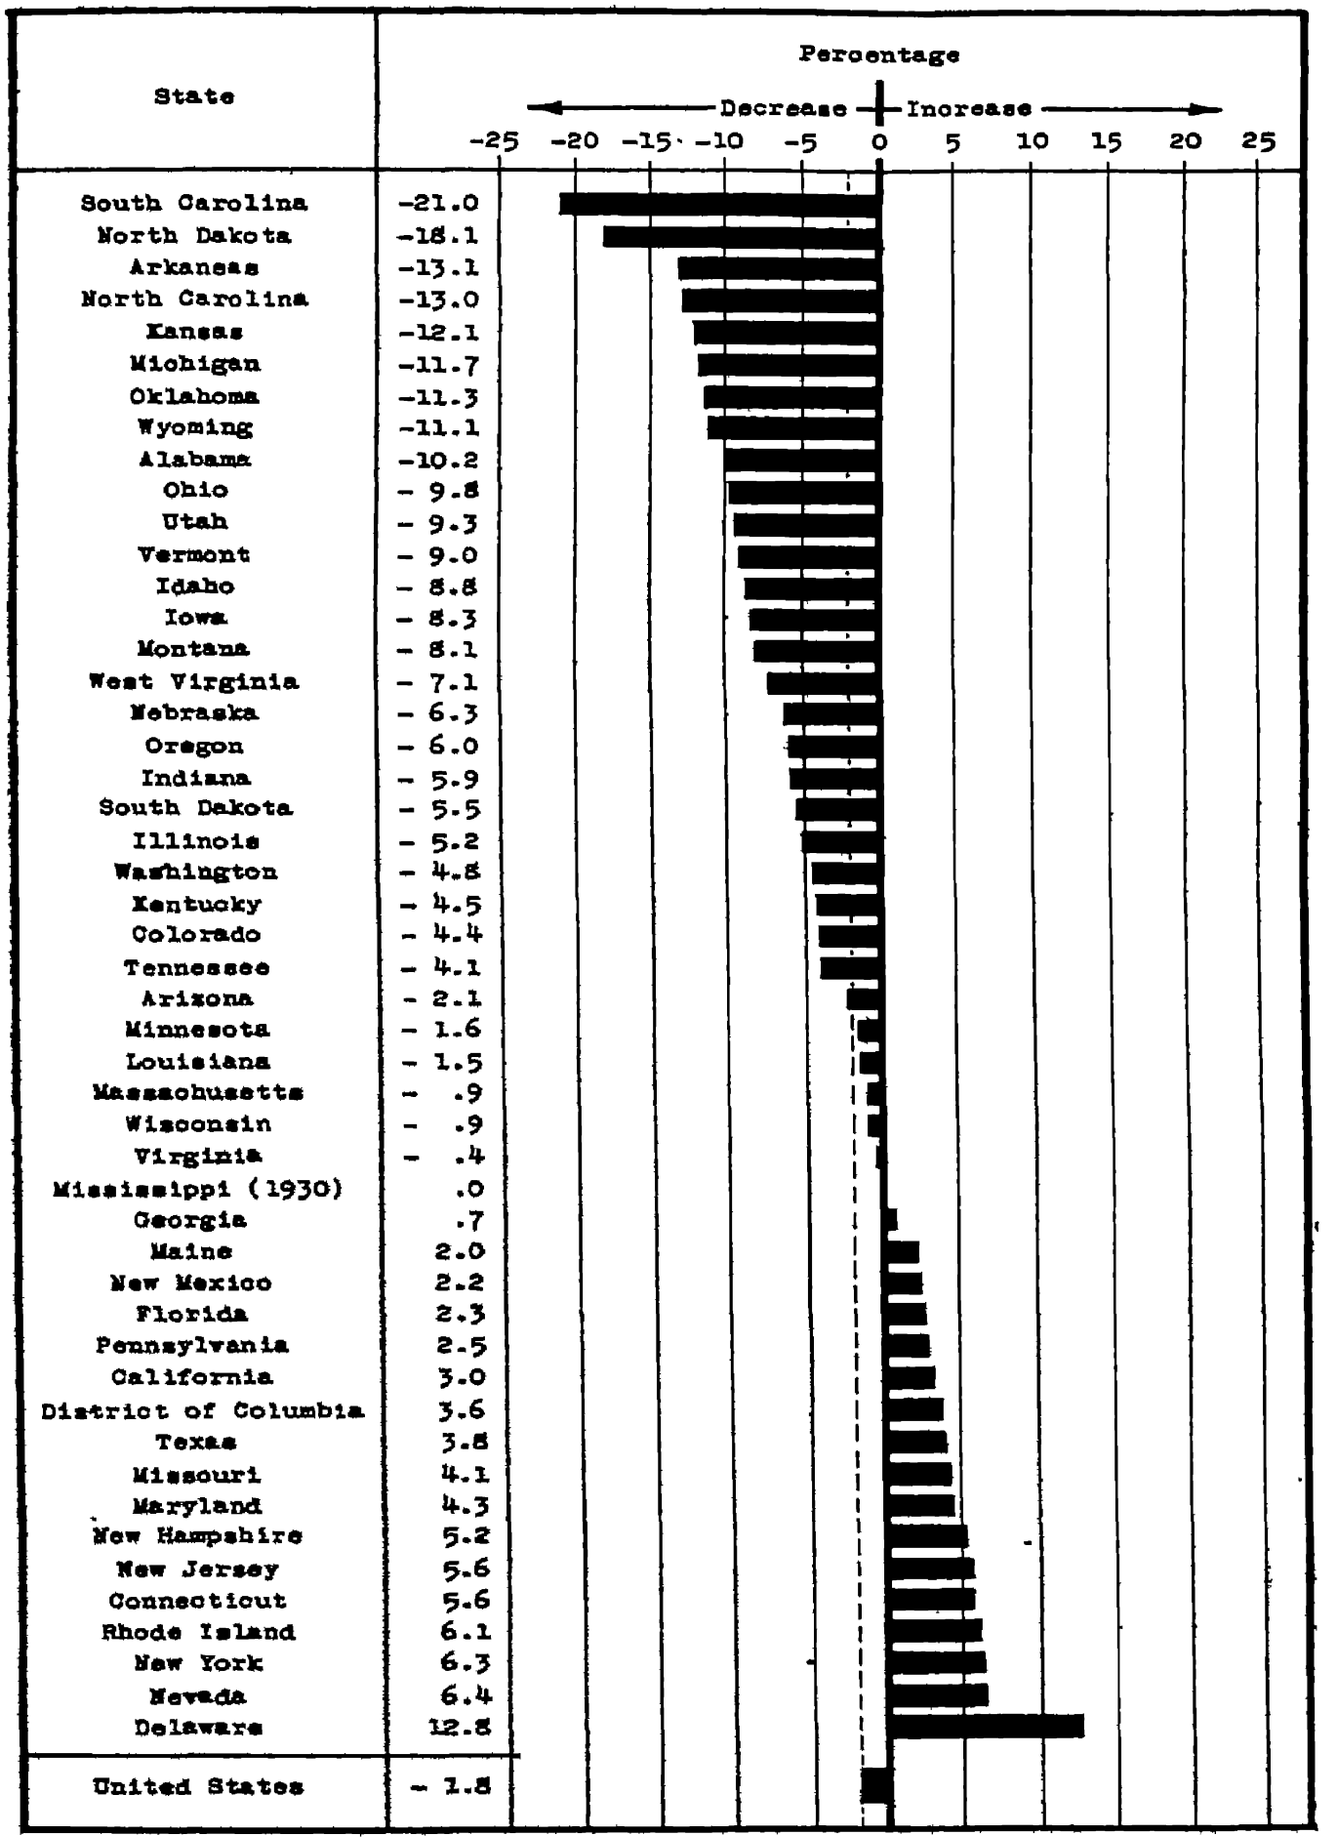

FIGURE 8.—Percentage increase or decrease in per capita costs for current expenses, by State, from 1930 to 1932.

from $31.70 in Arkansas to $152.85 in New York. The cost per pupil for capital outlay in 1932 varied from 69 cents in Georgia to $60.16 in Delaware.

Based on current expenses the highest average annual cost per pupil in the United States since 1920 was in 1930, $91.05. From that time to 1932 the cost per pupil in average daily attendance has decreased $3.38, or 3.7 percent. The highest average annual cost per pupil for capital outlay since 1920 was $21.86 in 1925. The decrease from 1925 to 1932 was $12.38, or 56.6 percent. Not including interest the average annual cost per pupil in average daily attendance in 1930 was $86.70 and in 1932 $81.36, a decrease of $5.34, or 6.2 percent (table E).

SCHOOL PROPERTY

Value of school property.—The estimated value of school property—buildings, sites, and equipment—used for public, elementary, and secondary school purposes was $6,211,327,040 in 1930 and $6,581,539,756 in 1932, an increase of $370,212,716, or 5.6 percent (table 15).

Considerable variation exists among the States as to the value of school property for each child enrolled in school. The average value per pupil enrolled for the United States is $250. The lowest, $75, is in Mississippi, and the highest, $438, is in New York. In the following States the valuation of school property per pupil enrolled is less than $100: Alabama, $89; Arkansas, $90; Georgia, $74; Mississippi, $75; South Carolina, $87; and Tennessee, $99. In the following States it is more than $300: California, $391; Connecticut, $359; Delaware, $311; the District of Columbia, $416; Nevada, $312; New Jersey, $391; and New York, $438.

Number of school buildings.—In 1932, the various State officers reported an aggregate of 245,941 buildings used for school purposes (table 14). Of this number 143,445, or 57.8 percent, are 1-room schoolhouses. The following distribution gives the number of States having certain specified percentages of 1-room schools:

Percent:	Number of States	Percent:	Number of States
10–20 [1]	5	61–70	6
21–30	2	71–80	8
31–40	3	81–90	1
41–50	13	91–100	1
51–60	9		

The number and percentage of 1-room buildings is shown by States (table 14).

Since there is no uniformly accepted definition of a consolidated school, it is practically impossible to present data showing the number of such schools in the country. However, such data as have been supplied by 43 States are included in table 14.

[1] District of Columbia has only 1.2 percent.

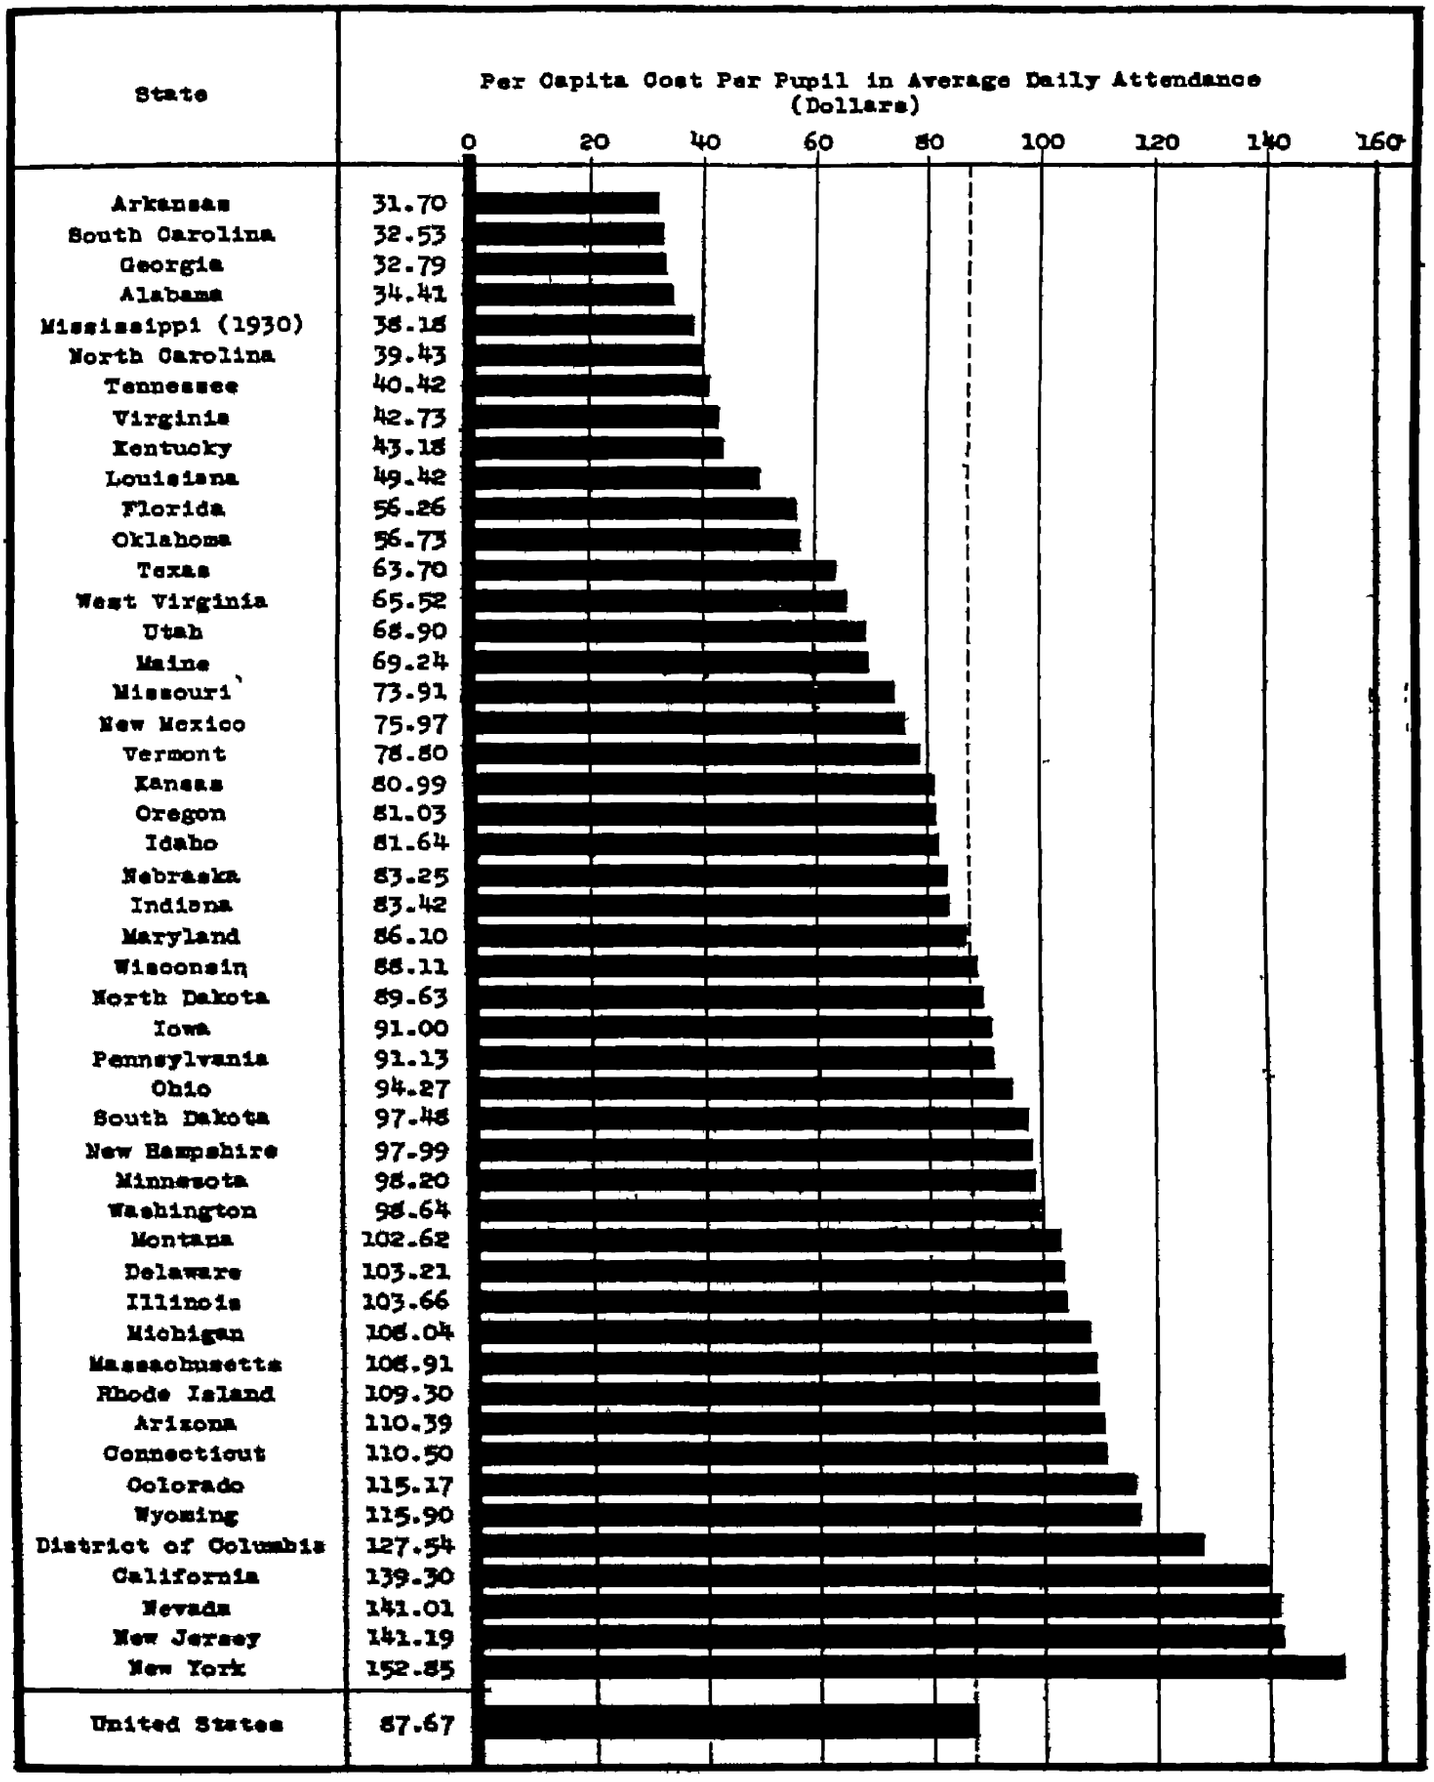

FIGURE 9.—Per capita cost per pupil in average daily attendance for current expenses, by State, 1931-32.

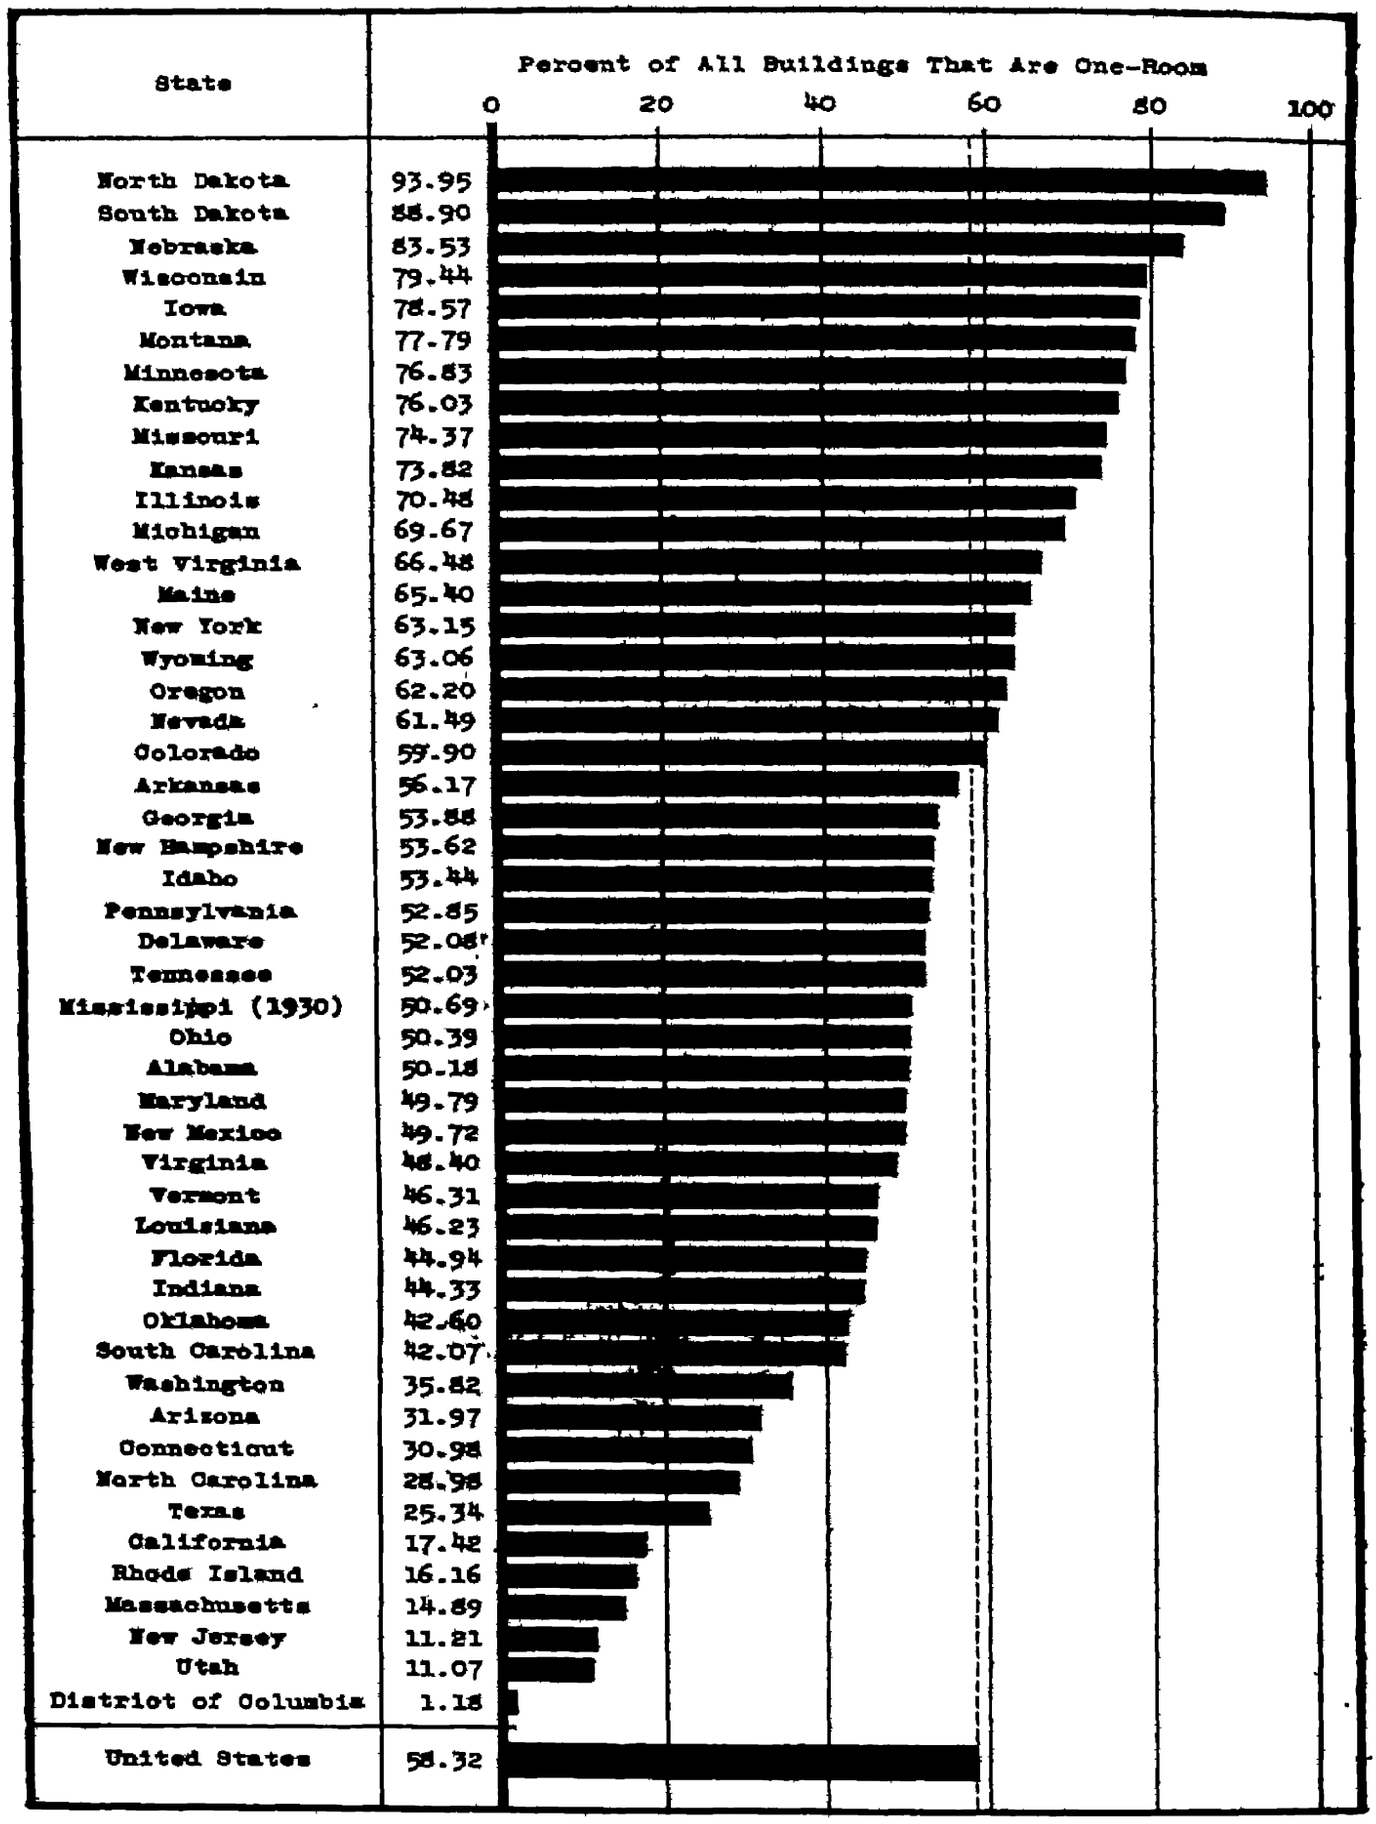

FIGURE 10.—Percentage of all school buildings in each State that are 1-room, 1931–32.

According to data furnished by 43 States in 1932 there were at that time 17,008 consolidated schools. In these States in 1930 there were 16,217 such schools.

SCHOOL DEBT

In 1930, the total amount of bonds and other forms of indebtedness reported was $2,425,796,439. In 1932, the amount of such indebtedness reported was $3,121,538,276 The increase for the 2-year period was $695,741,837. The foregoing figures on school indebtedness should be regarded as approximate, since the amounts reported by several States are for cities only. The approximate total school debt of the country in 1932 was about 144.4 percent of the amount of money necessary to run the schools of the country for that year.

Table F shows the amount of indebtedness in each of the States in 1930 and in 1932 and the amount of indebtedness per pupil in average daily attendance. The amount of indebtedness per pupil in 1932 is also shown in figure 11. In 1932, the average indebtedness per pupil in average daily attendance was $140.32. The indebtedness per pupil in 1932 ranged from $19.91 in Georgia to $329.59 in New York.

STATISTICS OF NEGRO SCHOOLS

In the following paragraphs of this section comparisons between white and Negro schools are made with respect to enrollments, attendance, length of term, and such other items upon which data were compiled (tables 31 to 36).

School population and enrollment.—In 1932, there were in the 18 States in which separate schools are maintained for whites and Negroes, 9,174,600 white and 2,903,700 Negro children from 5 to 17 years of age, inclusive. It is seen, therefore, that about 24 percent of the children of school age are Negroes. The number of white children enrolled in these States in 1932 was 7,562,872, and the number of Negro children enrolled was 2,353,320. In 1932, the ratio of enroll-

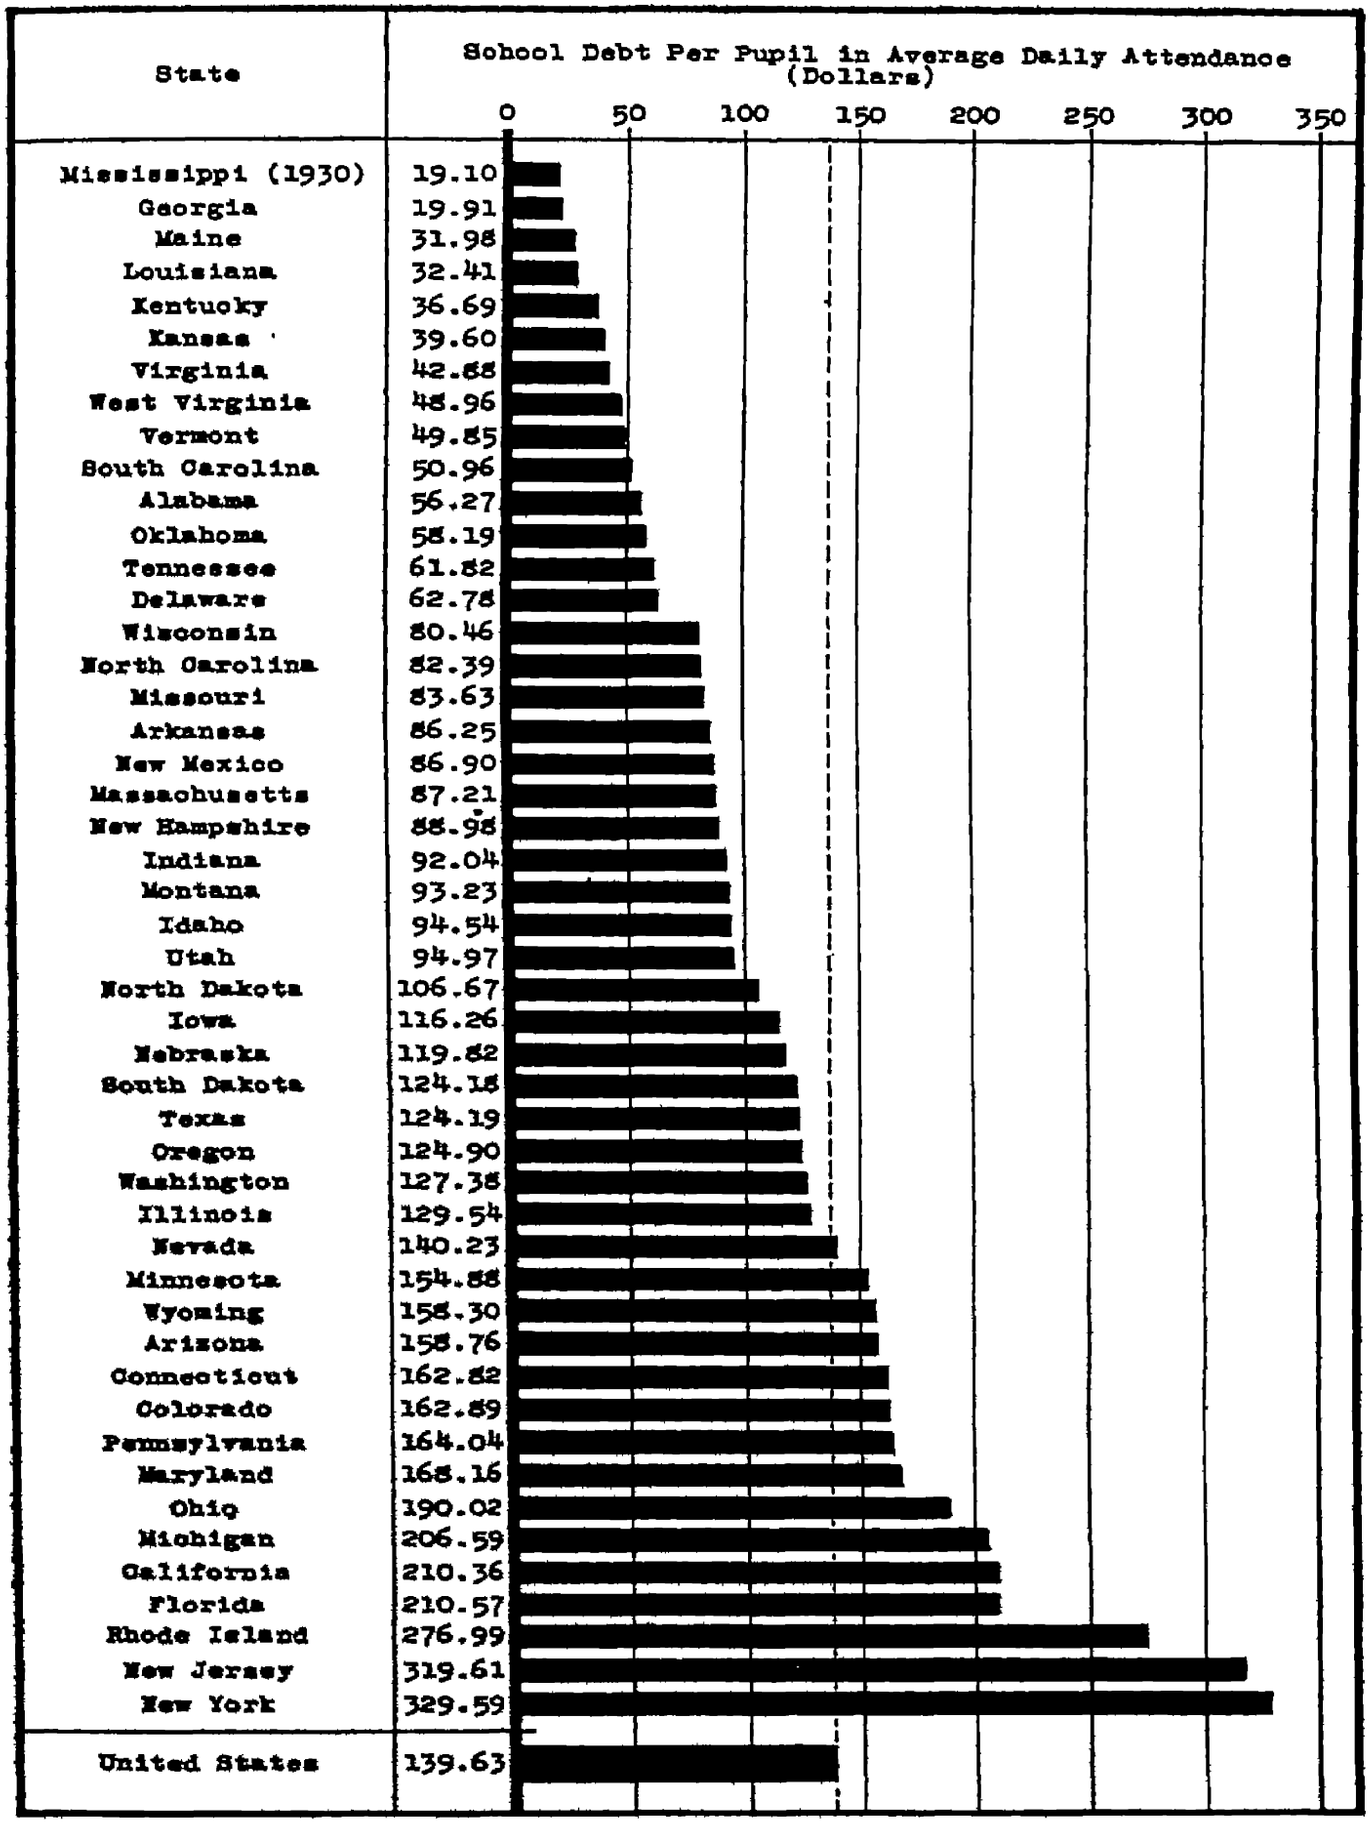

FIGURE 11.—School debt outstanding per pupil in average daily attendance, by State, 1931–32.

ment in public schools to school population was 82.4 for white children and 81 for Negro children. It is apparent, therefore, that a slightly greater proportion of white than of Negro children are enrolled in the public schools. In several States, however, as may be noted in table 31 the proportion of Negro children enrolled is practically the same as that of white children.

In 1930, there were enrolled in the kindergarten and elementary school grades 2,169,992 Negro pupils, and in 1932, the enrollment in these grades was 2,217,339, an increase of 65,055, or 3 percent. The enrollment of Negro pupils in the secondary school grades in 1930 was 112,586 and in 1932 it was 135,981 an increase of 28,069, or 24.9 percent.

Of the total enrollment in the Negro schools in 1932, 94.2 percent was in the kindergarten and elementary grades, and 5.8 percent in the high-school grades. In the white schools in these States 82.3 percent of the enrollment was in the kindergarten and elementary grades and 17.7 percent in the high-school grades. The Negro schools have an unusually large proportion of the children in the first grade, 33.5 percent compared with 17.7 percent in the first grade of the white schools.

Attendance and short term.—The average number of Negro children in average daily attendance in 1930 was 1,645,518, and in 1932 it was 1,802,846. During the biennium, the number in average daily attendance increased 7.8 percent and the number enrolled increased 3.1 percent. During the same period, the average daily attendance of white children in the States maintaining separate schools increased 3.7 percent, and the enrollment 1.6 percent. In 1930, the average length of the school term in white schools and Negro schools was, respectively, 162 and 132 days; in 1932, the average length of term was 165 and 134 days, respectively. The shorter school term for Negroes doubtless helps account for the retardation among the Negro children.

The average number of days attended by each pupil enrolled in the white schools in 1930 was 128 days, and in Negro schools 97 days; in 1932, the number of days attended in white schools was 134, and in Negro schools 103. In 1930, 79 percent of the white children and 73 percent of the Negro children enrolled were in average daily attendance. In 1932, 81 percent of the white children and 77 percent of the Negro children enrolled attended daily. In several States, the percentage of Negro pupils enrolled attending daily is practically the same as that of white pupils. On the whole, however, as the foregoing figures indicate, the Negro children do not attend school as regularly as do the white children.

Pupil-teacher ratio.—In 1930, the number of pupils enrolled per teacher in the white schools in the States having separate schools for whites and Negroes was 34, and in Negro schools 44; in 1932, the num-

ber of pupils per teacher in white and Negro schools was 36.1 and 43.4, respectively. The heavy teacher-load in the Negro schools may account in part for excessive retardation in such schools.

SOME URBAN AND RURAL SCHOOL STATISTICS

When a community ceases to be rural and to take on urban characteristics is a question not easily answered. For statistical purposes, however, incorporated places having a population of 2,500 or more are classed by the Bureau of the Census and the Office of Education as urban and the remainder of the country as rural. The collection of educational statistics for urban communities as thus defined and for the country as a whole is not a very difficult matter, but the collection of such statistics from rural communities to show totals by States and for the entire country for the nonurban area has been found to be most involved, since many of the State departments of public instruction in compiling educational statistics do not separate urban and rural, or if they do, they use a variety of bases in separating these communities. Probably the most reliable method thus far used in obtaining rural school statistics for the entire country is to subtract the totals for cities from the State totals reported by the several State departments of education. Since practically all cities having a population of 2,500 or more furnished school statistics in 1932 it is possible by the process just mentioned to obtain rather complete statistics for the remainder of the country generally classed as rural. It is evident, however, that educational statistics for rural and urban areas cannot be entirely separated by subtracting urban from State totals, since some of the incorporated places include rural territory and since the boundaries of some city school districts extending as they do beyond the boundaries of the municipal corporation, include rural areas. Then, too, the enrollment figures for many city school systems include nonresident pupils, especially secondary school pupils who live in rural communities. It is obvious that the statistics for rural areas as given in the tables are only approximate. Figures for the United States are shown in table G.

Population, enrollments, and attendance.—The census figures for 1930 show that 56.2 percent of the total population was urban and 43.8 percent was rural, and that 49.7 percent of the children 5 to 17 years of age lived in cities and 50.3 percent in rural areas at that time. There probably has not been any great change since 1930. Changes which have occurred would probably show a larger percentage of both adults and children living in rural communities, since the trend of population toward the cities has not been so great and since a movement toward the country has been in evidence since 1930.

TABLE G.—COMPARISON OF CITY AND RURAL DAY SCHOOLS, 1931-32

Schools	Population, 1930	Population, 5-17 years, both inclusive, 1930	Number of school buildings	Number of teaching positions[1]		Enrollment			Average daily attendance	Average size per school building		Number of pupils enrolled per position (teachers, supervisors, and principals)
				Men	Women	Boys	Girls	Total		Number of pupils	Number of teaching positions (teachers, supervisors, and principals)

[1] Supervisors and principals not included where given separately

Of the total enrollment in the schools of the country, 13,453,838, or 51.2 percent, are enrolled in city schools and 12,821,603, or 48.8 percent, in rural schools. A comparison of the number of children enrolled with the total population shows that 19.5 percent of the total urban population and 22.2 percent of the rural population are enrolled in the public schools. This differential is probably accounted for by the difference in ratios of adults to children and fewer private schools in rural districts. Since data are not at hand showing the number of children 5 to 17 years of age attending the public schools,

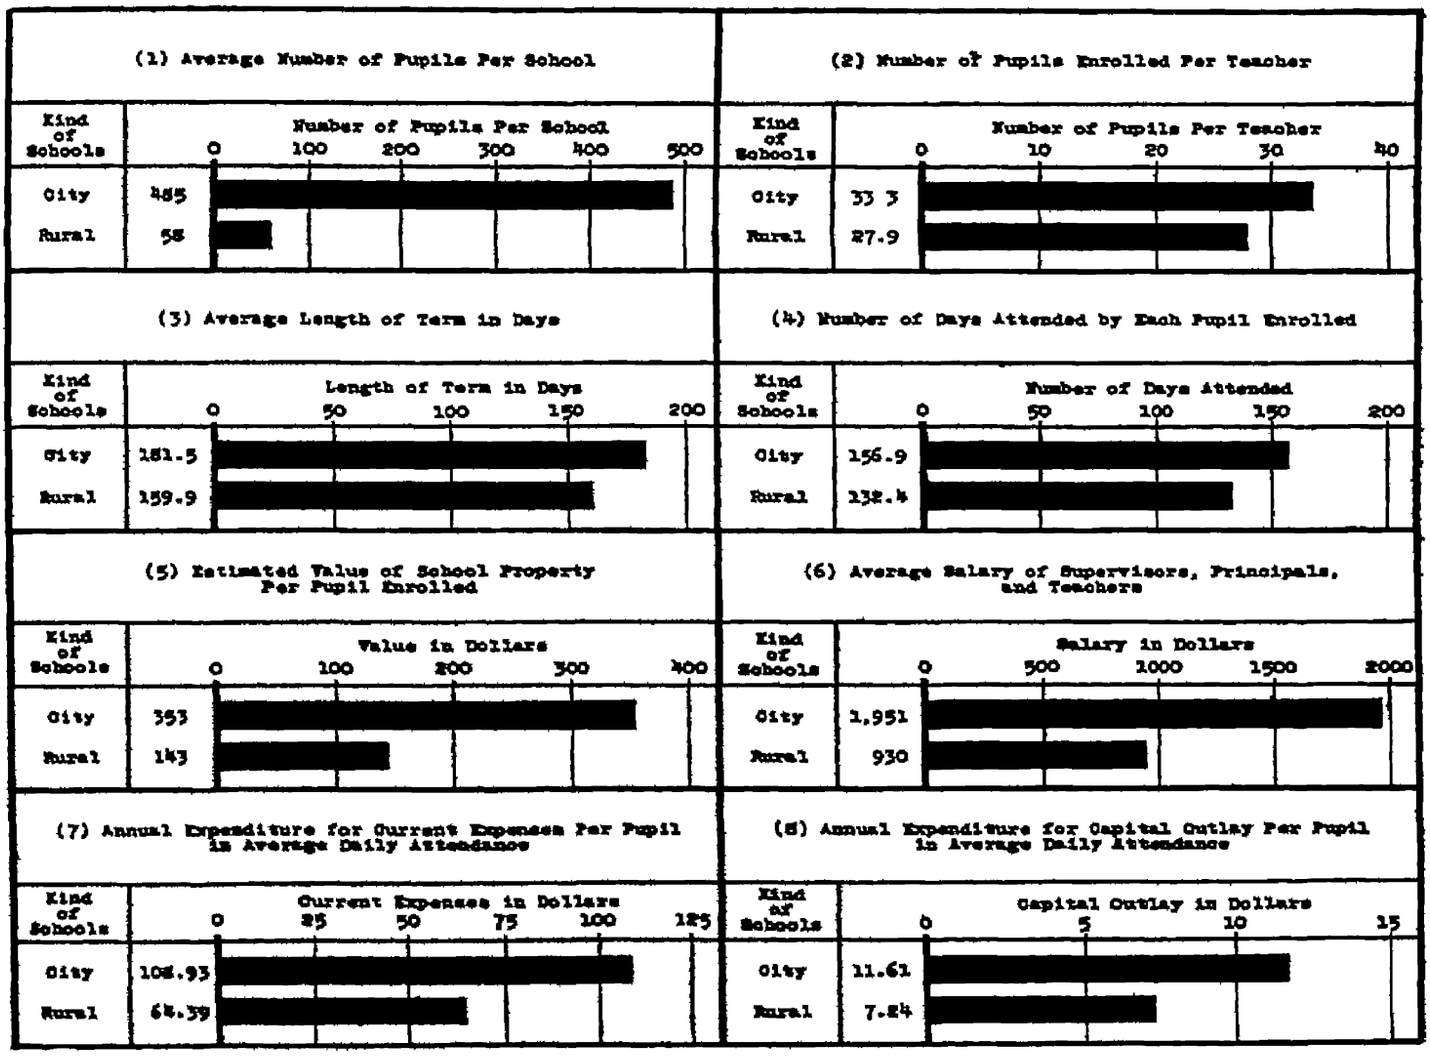

FIGURE 12.—Comparisons of city and rural schools on eight items for 1931–32

the total enrollment is compared with the number of children of that age. On this basis the ratio of enrollment in city schools to the number of city children 5 to 17 years of age is 85. 8, and the ratio of the total enrollment in rural schools to the number of rural children 5 to 17 years of age is 75.2. It would thus appear that rural children do not enroll in the same proportion as do city children, but the higher ratio for city children is doubtless due in part at least to the fact that many cities maintain kindergartens for children 4 or 5 years of age while very few rural communities maintain such schools; to the

fact that a larger percentage of city children than of rural children are in the last year of high school, many of whom are more than 17 years of age, and to the fact that many rural children attend city schools.

Since the total enrollment is compared with the number of children 5 to 17 years of age, it is possible for the ratio to equal or to exceed 100, as is the case in several States. The high ratios in several States may probably be questioned as to their correctness.

Enrollments by grades in rural and city schools present some significant contrasts (tables 38 and 39).

As is to be expected, the kindergarten has made relatively small progress in rural sections. In urban areas 1 of every 22 pupils attending the schools is enrolled in kindergarten; in rural sections only 1 pupil of every 147 enrolled is registered in kindergarten. The enrollment in first grade is much higher for rural schools than for schools in centers of 2,500 population or more. The drop in enrollment between first and second grades is especially marked in rural schools, probably due to a condition of excessive retardation in the first grade. The percentage loss in enrollment in successive grades in rural schools is greater than in urban schools. The half-way mark in the public-school system (which also coincides rather closely with the upper limit of the compulsory school age) is the place where the superior holding power of the urban school makes itself felt. The lines (fig. 13) indicating grade enrollments in the two types of schools cross between the sixth and seventh grades and draw farther apart through the remaining grades of elementary schools and high schools, as is shown in figure 13.

Of the 13,453,838 pupils enrolled in the public day schools of the cities, 11,625,461 are in average daily attendance, and of the 12,821,603 enrolled in the rural schools, 10,619,883 are in average daily attendance, or approximately one million and a half of the city and two million of the rural children enrolled are absent from school each day. Of the urban children enrolled 86.4 and of the rural children enrolled 82.8 percent are in average daily attendance.

As shown in table 40, the percentage of pupils in average daily attendance in several of the States is higher in their rural than in their city schools.

It is generally known that the city child has had the opportunity of attending school more days a year than has had the rural child, but the difference in the length of school term expressed in days is not so well known. In 1932, the city schools of the country were in session 181.5 days and the rural schools were in session 159.9 days. The city child thus had an opportunity of attending school 21.6 days more than had his country cousin. In several States, the length of school term in the cities of those States was about two months more than

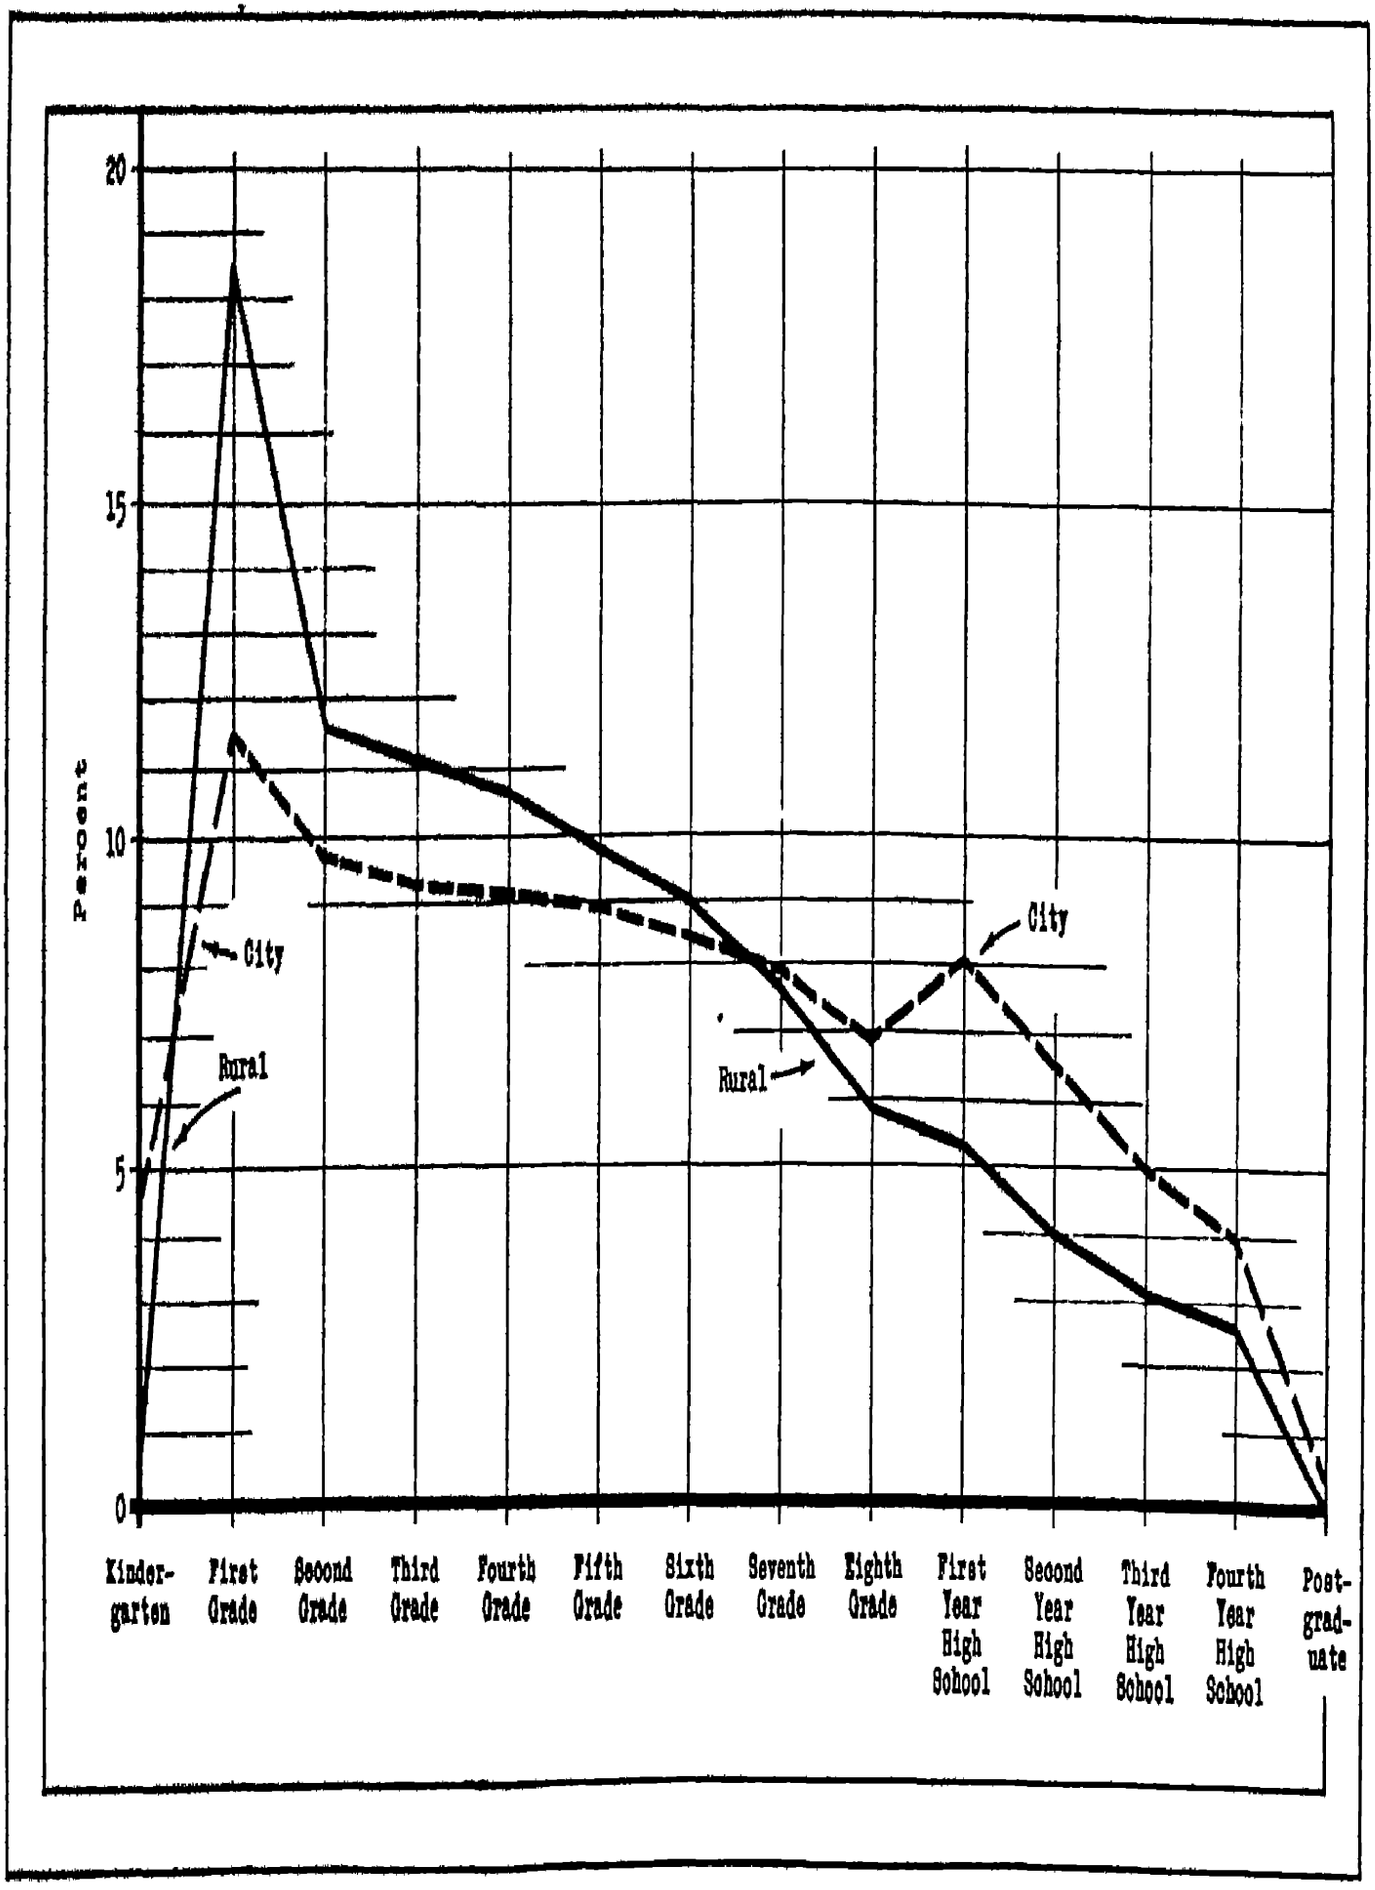

FIGURE 13.—Percentage of enrollments in successive grades in city and rural schools, 1931-32

in the rural communities. For example, in Alabama the city school term exceeded the rural by 38.1 days, in Arkansas by 47.2 days, in Mississippi by 47 3 days, and in South Carolina by 42.3 days.

Measured by the average number of days attended, the children enrolled in the city schools were in attendance 156.9 days and those enrolled in the rural schools were in attendance 132.4 days; in other words the city child is absent from school 24.6 days and the rural child 27.5 days during the year. In several States, as is shown in table 40, the rural school children attended school on an average of less than 100 days, while in these same States the city school children attended school between 140 and 145 days, or more than 40 days more than the number of days attended by children in the rural schools of these States.

The foregoing figures showing the difference in the length of school term and the difference in the number of days attended may not seem great for 1 year but, assuming that the child continues to live in the same community and that these figures hold good for each of the 12 years of the public-school course, the city child would have within these 12 years the opportunity of attending school 259.2 more days than has the rural child. Greater regularity of attendance would give the urban child a further advantage of 44.8 days; thus the city child on an average would attend school a total of 294 more days during the 12-year period than would the rural child. Counting 20 days to a school month, the city child has the opportunity of attending school 12.9 more months than the rural child in order to complete a 12-year course, and he actually attends school 14.7 more months than the rural child.

The following arithmetical problem may be presented: If a school term of 181.5 days a year is needed in order for the city child to complete the regular 12-year public-school course, how many years would it take for the rural child who has a school term of 159.9 days to complete the same course? Based on the number of days schooling offered, the answer is 13.6 years.

PUPIL-TEACHER RATIO

The pupil-teacher ratios given in the following paragraphs are calculated on the basis of the number of pupils enrolled and the number of positions, including teachers, principals, and supervisors. Since the part-time supervisory and administrative work that is done in rural schools is done by persons who are reported as teachers it seems more comparable to include the full-time persons in city schools who do these types of work. If the ratios were calculated on the basis of persons reported as teachers only, the ratios for cities would be considerably higher while the ratios for rural would increase very little.

Although there are more pupils enrolled in the city schools of the Nation than in the rural schools, there are fewer teaching positions, including principals and supervisors, in the cities than in the rural areas, the total number of such positions in urban communities being 426,176 and inrural communities, 466,769.

In the cities, the average number of pupils to a teaching position, including principals and supervisors, is 31.6 and in the rural communities the average is 27.5.

In only 13 States does the pupil-teacher ratio in city schools fall below 30, and in no State does this ratio in such schools fall below 25; in the rural communities of 31 States the pupil-teacher ratio is less than 30, and in 22 of them it is less than 25. A further analysis of the pupil-teacher ratio in the rural schools shows that in 10 States such ratio is less than 20. As pointed out in another section of this report, the low pupil-teacher ratio in some of the States is due to the many small one-teacher schools. Attention may also be called to the fact that the low pupil-teacher ratios in rural schools are, for the most part, in those States that maintain thousands of small rural school districts for administrative purposes.

Regardless of the question whether or not a low pupil-teacher ratio is desirable, it is evident that in the schools in which such ratio is low the cost per pupil will be comparatively high. A recent study by the Office of Education shows that the cost per pupil in the small one-teacher schools is much greater than in the larger schools.[1]

EXPENDITURE

In 1932, the current expense item in city schools amounted to $1,154,318,914 for the 13,453,838 pupils enrolled in these schools, and in the rural schools it amounted to only $655,620,102 for the 12,821,603 pupils enrolled. Based on the number of pupils in average daily attendance the cost per pupil in the city schools was $108.93 and in the rural schools $64.39. The cost per pupil in city schools ranged from $45.81 in South Carolina to $158.94 in New York, and in rural schools, from $25.93 in Georgia to $165.82 in Nevada (table 44). In 13 States the cost per pupil in average daily attendance in rural schools was less than $50, while in only 5 States was the cost per pupil in the city schools less than this amount. In none of the States did the cost per city school pupil fall below $40, while in 9 States the cost per rural school pupil fell below this figure.

The cost per rural school pupil is low despite the fact that the average pupil-teacher ratio in the rural schools is less than in the city schools.

[1] Gaumnitz, W. H. Economies through the elimination of very small schools. Washington, Government Printing Office, 1934. (U.S. Office of Education, Bulletin 1934, no. 3.)

Of the total amount for current expenses, $831,839,068 was used to pay the salaries of the 426,176 supervisors, principals, and teachers in city schools, and only $434,054,842 was used for the salaries of the 466,769 rural school supervisors, principals, and teachers. In other words, the city schools of the country expended almost twice as much for such salaries as did the rural schools and for fewer teachers.

A comparison of the average annual salaries of city school supervisors, principals, and teachers with those paid in the rural schools shows that the former were more than twice as great as the latter, the average annual city school salary in 1932 being $1,951, and the average rural school salary $930.

The average annual salary varies greatly among the States for both city and rural school teachers (table 43). The average salary in city schools ranges from $967 in Arkansas to $2,808 in New York, and the average salary in rural schools ranges from $485 in Arkansas to $2,152 in Connecticut.

On the basis of a minimum salary of $1,000 a year, the average salary for city teachers in all but 2 States equals or exceeds this amount, but in only 23 States does the average salary of rural school teachers equal or exceed $1,000. In 12 States the rural school salaries average less than $700 a year.

In 1932, capital outlay for city schools was $134,144,938 and for rural schools, $76,851,324, or $11.61 per city school pupil and $7.24 per rural school pupil. The cost per city school pupil for capital outlay varied from 59 cents in Mississippi to $51.87 in Delaware, and the cost per rural school pupil varied from 20 cents in Iowa to $68.35 in Delaware.

SCHOOL BUILDINGS AND RELATED ITEMS

The total number of rural school buildings in the entire country is 218,180 and the total number of city school buildings 27,761. Of the total number of schoolhouses 143,445 have but 1 room. Since nearly all of them are in rural districts more than half of the rural schoolhouses are of the 1-room type.

In the cities the average number of pupils to a building is 485, while in the rural area the average to a building is only 59. In the following States the average number of pupils to a building in rural communities is less than 30: Kansas, Montana, North Dakota, South Dakota, and Wyoming (table 42). The smallness of the rural schools is more definitely shown in United States Office of Education Bulletin 1934, No. 3, "Economies Through the Elimination of Very Small Schools."

The estimated value of city school property is more than twice as great as that of rural school property. The total estimated value of city school property is $4,764,517,579 and of rural school property

$1,817,022,177. The average value of school property per pupil enrolled in city schools is $353, and per pupil enrolled in rural schools $143. The value of city school property for pupils ranges from $144 in Georgia to $460 in New York and the value of rural school property for pupils enrolled ranges from $47 in Georgia to $460 in Nevada. In 12 States rural school property is valued at less than $100 per pupil enrolled.

SOME EFFECTS OF THE ECONOMIC SITUATION UPON THE SCHOOLS

The effects of the depression, which started about 1928 or 1929, began to be seriously reflected in the schools of the country between 1930 and 1932. At first only a school district here and there was affected, but within the biennium enough were affected to lower State and national averages in certain respects. The foregoing statement, it should be kept in mind, relates only to the biennium 1930–32. Since 1932 the effects of the economic situation upon the schools have been such as to be a matter of grave concern.

One of the effects between 1930 and 1932 was to lower the average length of the school term from 172.7 days to 171.2 days. The decrease of 1.5 days may not seem great, but this is an average To obtain a true picture of the situation, data for individual States and of school districts within the States should be noted. According to information furnished the Office of Education by 1,137 county school superintendents the school term in some counties was 50 percent less in 1932 than in 1930. In 6 States there were counties in which the school term was decreased more than 20 percent, and in 12 States the reduction was between 10 and 20 percent in some counties. A 20-percent decrease in a school term of 160 days would reduce the term to 128 days, and a 10-percent decrease to 144 days. It is thus evident that within the biennium when the effects of the depression were beginning to be felt in the schools the school term was reduced about a month in some of the school districts of the country.

As a result of the economic situation the cost per pupil in average daily attendance decreased 3.7 percent for the country as a whole. In only 7 States did the per capita cost increase. These States are Connecticut, Delaware, New Hampshire, New Jersey, New York, Rhode Island, and Texas. The greatest increase, 5.5 percent, was in Delaware. The decreases range from 1.5 percent in Maryland to 26.4 percent in South Carolina. These are only averages. According to data [2] compiled to show the amount of change in current expenses from 1930–31 to 1931–32 the decrease amounted to as much as 58 percent in some counties.

[2] Gaumnitz, W. H. Some effects of the economic situation upon rural schools. Circular No. 80, U.S. Office of Education, February 1933.

The per capita cost for capital outlay decreased in every State except Delaware, Maryland, Rhode Island, and the District of Columbia. The decrease ranged from 5.4 percent in Wyoming to 86 percent in Vermont. In many communities nothing or very little was expended for the purchase of land and the erection of schoolhouses in 1932. Yet the school enrollment in many of these communities was increasing.

One of the effects of the depression, it appears, has been to increase the enrollment, since fewer boys and girls are being employed and since many of those thrown out of employment in some of the States are compelled by the compulsory-attendance laws in these States to return to school. For the country as a whole the enrollment increased 2.3 percent from 1930 to 1932, which is a little greater than the increase from 1928 to 1930, and greater than the average increase from 1920 to 1930 (table I).

From 1930 to 1932 the number of pupils in average daily attendance increased 4.6 percent, while the number of teaching positions increased only 2.5 percent (table C).

Attention may again be called to the fact that the foregoing figures relate to the biennium 1930–32. Since 1932 up to the time of the preparation of this report the effects of the economic situation on the schools have been in many communities a cause of apprehension or even alarm among the people of the Nation with regard to the outlook for the schools.

School terms have been greatly reduced in thousands of school districts, classes have been much enlarged, teachers in many districts remain unpaid or they have been paid in warrants, salaries have been greatly reduced, many districts report lowered qualifications for teachers, current-expense budgets have been cut in practically all the school districts, amounting to as much as or more than 50 percent in some of them, and highly essential activities and services have been eliminated or curtailed. The elimination and curtailment include: Whole schools and classes for special purposes, such as kindergarten, night, continuation, and summer schools, and schools and classes for handicapped children; staffs for specialized services, such as those for supervision and health; and certain fields of instruction, such as music, art, home economics, manual training, and physical education.

The following is a brief summary of the situation in the schools made from reports of State and city school officials to the Office of Education in the fall of 1933:

770 schools are now closed with no provision for 175,146 children.
1,540 schools will have terms of 3 months or less.
10,982 schools will have terms of 3 to 6 months.
City schools employ 18,000 fewer teachers now than they employed in 1930
200,000 certified teachers are unemployed.

City school budgets average 20-percent reduction since 1930.
Schools now operate upon $368,000,000 less than in 1930.
Expenditures for new buildings have dropped 79 percent since 1930.
45,228 teachers will receive less than $300 this school year (if paid).
210,120 teachers will receive from $300 to $750 this school year (1 in 4 receive less than the minimum code wage).
Since 1930 in 700 typical cities the following reductions in instruction had been made:

Art, 103.
Music, 139.
Physical education, 109.
Health instruction, 111.
Home economics, 84.

TABLE 1.—STATISTICAL SUMMARY OF ELEMENTARY AND SECONDARY SCHOOLS COMBINED, 1870–1932

CHAPTER II

STATISTICS OF CITY SCHOOL SYSTEMS, 1931–32

Prepared by EMERY M. FOSTER, Chief of the Statistical Division, LESTER B. HERLIHY, assistant statistician, and LULA M. COMSTOCK and JULIA E. ISDELL, statistical clerks in the division; and by WALTER S. DEFFENBAUGH, Chief of the Division of American School Systems

THIS REPORT presents statistics of city public schools for the school year 1931–32. The cities are divided into four population groups on the basis of the 1930 census. Group I includes 93 cities having a population of 100,000 or more; group II, 236 cities having a population of 30,000 to 99,999; group III, 672 cities having a population of 10,000 to 29,999; and group IV, 2,157 cities having a population of 2,500 to 9,999. These 3,158 cities had a population in 1930 of 68,963,499, which was 56.2 percent of the total population of the country.

Cities are continually growing in size, but the census is taken only once in 10 years. The 1930 data for populations were not available at the time the tables were made for the statistics of city school systems, 1929–30; therefore, the present report is the first to be organized on the basis of city sizes as reported in the 1930 census. Since the number of cities in each group has increased, gross figures for a group in 1931–32 are not exactly comparable with given figures for 1929–30. Therefore, comparisons with previous bienniums, especially those relating to expenditures, have been made on the basis of the number of pupils in average daily attendance.

Since the present policy of the Office of Education is to publish city school statistics in considerable detail every 4 years, dating from 1930, and to publish an abridged report for the intervening biennium, this report for 1931–32 contains statistics for only a few items in detail for each city. Data relating to elementary and to secondary schools were compiled separately for only a few items and for only a sampling of cities.

In addition to the full report for 1930 and 1934 and an abridged report for 1932 and 1936, the usual per capita cost study will be published every year.

If material which is not given in the abridged publication is needed by school superintendents and others, it can be supplied by special tabulations made from the original reports on file in this Office. A series of circulars containing items not included in this report will be published. Some of those in progress or projected are as follows:

Grade enrollment, elementary and secondary, in city schools of various sizes
The housing of schools with respect to grades included.
Schools and classes for handicapped children.
Kindergartens in city schools
Costs for operation and maintenance by types of schools.
Expenditures for pensions and other items of fixed charges.
Statistics of small city schools, 2,500 to 10,000 population, and comparison of data with 1930.

ENROLLMENT

During the regular school session of 1931–32 there were enrolled in the city public day schools 13,454,582 pupils. Of this number 6,820,000 were boys and 6,634,582 were girls. The cities of group I enrolled 46.6 percent of the total number; group II, 16.5 percent; group III, 17.1 percent; and group IV, 19.8 percent.

In addition to the regular day-school enrollment there were 978,471 persons enrolled in night schools, 439,030 in summer schools, and 202,568 in part-time and continuation schools.

From 1929–30 to 1931–32 the enrollment in the public day schools increased from 12,790,023 pupils to 13,454,582, or 5.1 percent, but since the figures for 1931–32 embrace 308, or 10.8 percent, more cities than in 1929–30, the increase in enrollment is not so large as the figures indicate. From a sampling of 130 cities having a population of 10,000 or more it appears that the kindergarten enrollment in these sampling cities decreased about 7 percent, the elementary school enrollment decreased about 4.5 percent, the junior high school enrollment increased about 10 percent, and the senior and regular 4-year high school enrollment increased about 16 percent.

The decrease in kindergarten enrollment is due partly to changes in the age of admission. It is also due to curtailments in the number of kindergartens within school systems and, in some cases, to their elimination.

The decrease in enrollment in the elementary grades may be accounted for in part by the decrease in birth rate, and in part by the organization of junior high schools which have taken out of the elementary schools the seventh and eighth grade pupils reported in 1929–30 as belonging to these schools.

The increase in enrollment in the upper secondary-school grades is marked. Since the beginning of the downward trend in the number of persons employed in business and industry, many boys and girls of high-school age who cannot find employment remain in school. Many of those who have graduated from high school have returned for additional work. A new question, therefore, faces many communities: Would it not be better in those cities in which there is a rather large enrollment of postgraduate students to organize junior colleges rather than have the pupils earn extra credits in subjects offered on the high-school level?

Data were collected for 1931–32 showing the number of pupils enrolled in each grade from the kindergarten to the last year of high school. Since grade enrollments for certain cities were compiled in 1918, it is possible to show the percentage of increase in each grade for 17 cities having a population of 100,000 and more and for 46 cities having a population between 2,500 and 100,000. These comparisons

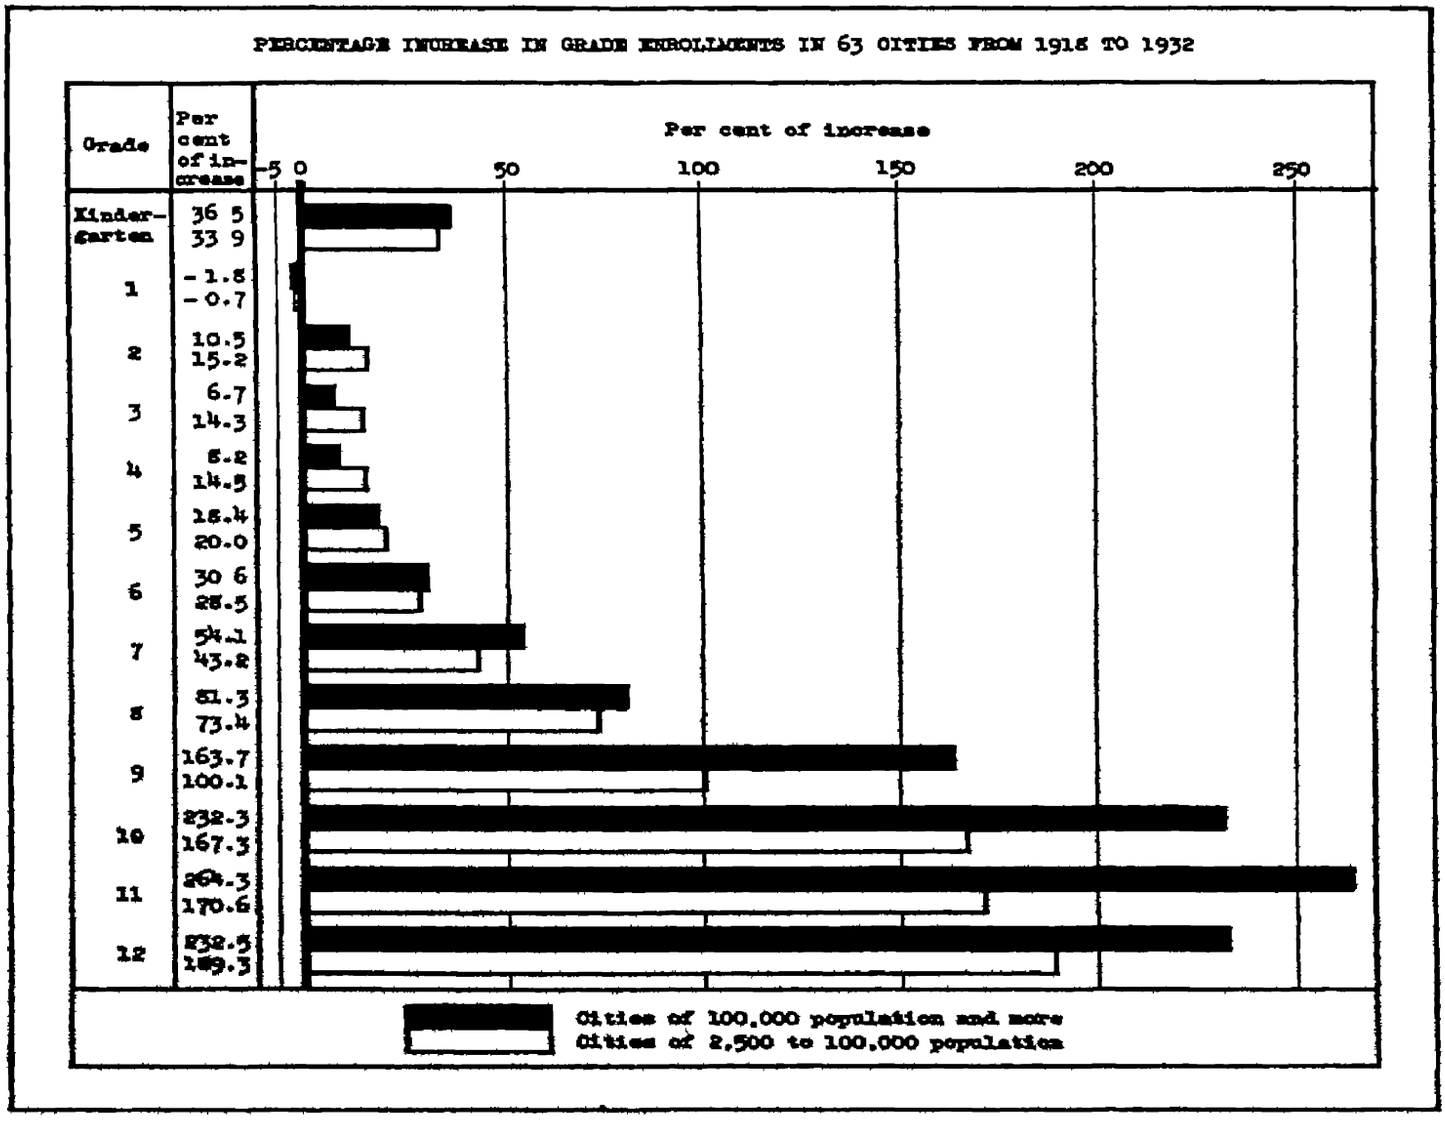

FIGURE 1.

show great variations in the relative increases in the four grade groupings.

As may be noted in table I and in figures 1 and 2 the percentage of increase in enrollments in the upper 6 grades greatly exceeds the percentage of increase in the first 6 grades. In the 17 cities having a population of 100,000 and more the kindergarten enrollment increased 36.5 percent within the 14 years; the enrollment in grades 1–6, 10.6 percent; the enrollment in grades 7–9, 89.9 percent; and the enrollment in grades 10–12, 241.6 percent. In the 46 cities having a population of less than 100,000, the kindergarten enrollment increased 33.9 percent; the enrollment in grades 1–6, 14 percent; the enrollment

in grades 7–9, 69.5 percent; and the enrollment in grades 10–12, 173.8 percent Grade 1 in each group shows a slight decrease.

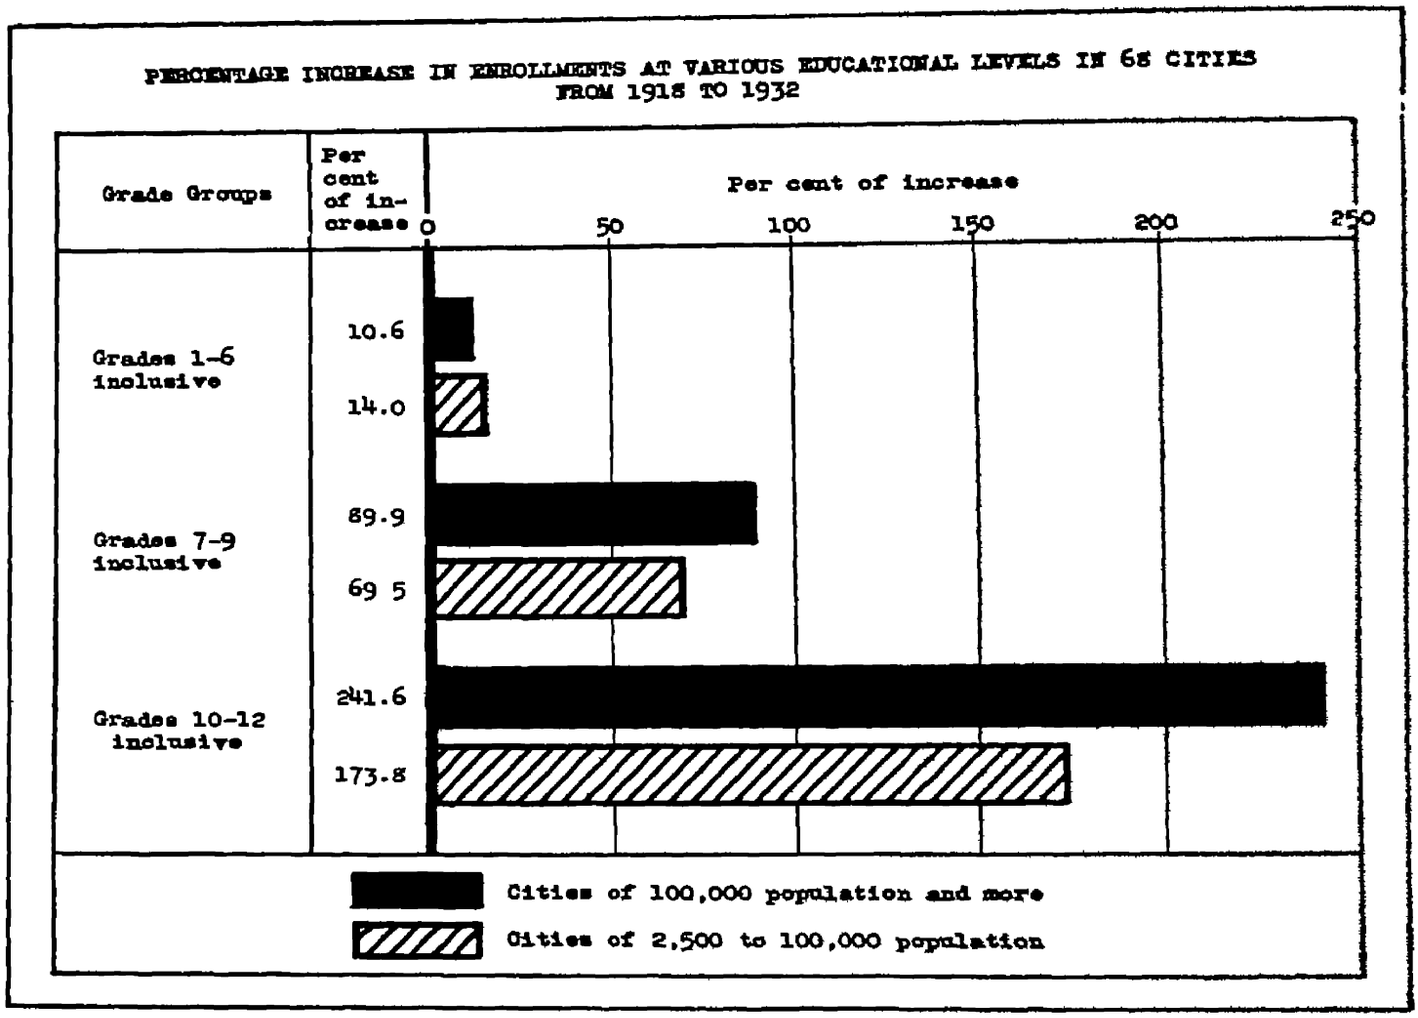

FIGURE 2.

TABLE I —*Percent of total enrollment in each grade 1917–18 and 1931–32, and percentage of increase in 63 cities*

Grade	Population, 100,000 and more (17 cities)			Population, 2,500 to 100,000 (46 cities)		
	Percent of total enrollment in each grade		Percent of increase	Percent of total enrollment in each grade		Percent of increase
	1917–18	1931–32	1917–18 to 1931–32	1917–18	1931–32	1917–18 to 1931–32
1	2	3	4	5	6	7
Kindergarten	7 8	7 6	36 5	4 5	4.4	33 9
1	15.2	11 0	—1 8	14.4	10.2	—.7
2	11.5	9.0	10.5	11.2	9 3	15.2
3	11.4	8.7	6.7	10.9	9.0	14.3
4	11.2	8.7	8.2	10.9	8.9	14.5
5	10 3	8.8	18.4	10.5	9.0	20 0
6	9 1	8 5	30.6	9 3	8 5	28.5

9	4 3	8.1	163.7	5.8	8.3	100.1
10	2.6	6 3	232.3	3.7	7.0	157.3
11	1.6	4.2	264 3	2.8	5.4	170.6
12	1 3	3.1	232.5	2.1	4.4	189.3

The second grade shows a greater increase than does the third grade in the 63 cities compared. Since there are only 63 cities represented, the greater increase in the second grade might seem accidental, but according to statistics for State school systems (rural and city combined) compiled in 1918 and in 1928 the percentage of increase in enrollment in the second grade was greater than for the third grade,[1] being 8 percent for the second grade and 5.5 percent for the third grade.

In the 17 cities having a population of 100,000 or more, 76.5 percent of the total enrollment in 1917–18 was in the kindergarten and first six grades; in 1931–32, only 62.3 percent was enrolled in these grades. The percent enrolled in grades 7–9 increased from 18.0 in 1917–18 to 24.1 percent in 1931–32, and in grades 10–12 from 5.5 to 13.6.

In the 43 cities having a population from 2,500 to 100,000, 71.7 percent of the total enrollment in 1917–18 was in the kindergarten and first six grades; in 1931–32 only 59.3 percent of the enrollment was in these grades. The percent enrolled in grades 7–9 increased from 19.7 percent in 1917–18 to 23.9 percent in 1931–32, and in grades 10–12 from 8.6 percent to 16.8 percent.

ATTENDANCE

Of the 13,454,582 pupils enrolled in the city public day schools in 1931–32, there were 11,626,095 in average daily attendance. In round numbers, not adjusting for duplications in enrollment between cities, 1,800,000, or 13 percent, of the children enrolled were absent from school each day.

The percentage of children enrolled who were in average daily attendance has, however, been increasing. In 1900 the attendance was 74.6 percent of the enrollment; in 1910, 79.6 percent; in 1918, 79.8 percent; in 1922, 82.5 percent; and in 1932 it was 86.4 percent. Or, within 32 years, the percent of pupils enrolled in average daily attendance rose from 74.6 to 86.4.

Table II shows what the percentage of attendance is of enrollment by groups of cities for 1922, and by bienniums from 1922 to 1932.

TABLE II.—*Percentage attendance is of enrollment*

Year	Size of city by groups				
	I	II	III	IV	Total
1	2	3	4	5	6
1922	82.3	82.6	83.3	82 6	82. 5
1926	81.7	83.2	83.1	84.1	82. 8
1928	81.2	83.7	84.6	84.6	83. 4
1930	83.8	84.3	85.1	85.3	84. 4
1932	86.3	86.3	86.8	86.4	86. 4

[1] U. S. Office of Education Bulletin, 1931, No. 20, Vol. 1, p. 67.

The increase in attendance in relation to enrollment may be attributed to several causes.

That children are attending school more regularly than they did in 1900 and in 1922 is doubtless due to the fact that the program of studies and methods of teaching are more nearly adapted to the interests and needs of the children. An elementary school of 1932 with its activity program and with its better-trained teachers should have much greater drawing and holding power than had the elementary school a few years ago when the program of studies consisted largely of unrelated subject matter and when the pupils were more like passive recipients than active participants.

The reorganization of the secondary school program may be given as one of the reasons for better school attendance. The junior high school with its general-survey courses and activities appeals to the adolescent youth, and the senior high school with its numerous courses of study adapted to meet the needs of pupils of different degrees of ability and of varying interests may be considered as another factor in holding pupils in regular attendance as well as retaining them in school for a longer period of years.

Another reason why attendance has been improving is because the city school attendance departments are better organized than they were a few years ago. They now look upon their work not merely as a matter of running down truants but as a matter of helping to keep children in regular attendance.

Not only to attendance officers, but to visiting teachers and school nurses should be assigned part of the credit for better school attendance, especially in the elementary school grades. In the junior and senior high schools the home-room teachers and counselors should receive some of the credit for improved attendance.

School attendance in relation to enrollment is better in the secondary school grades than in the elementary according to data compiled from a sampling of 124 cities having a population of 10,000 or more, as may be noted in table III which shows the percent attendance is of enrollment for 11 cities in group I, 29 cities in group II, and 84 cities in group III.

TABLE III.—*Percent of pupils enrolled in average daily attendance at different school levels, 1931–32*

Size of city	Grade					
	Kindergarten	Elementary school [1]	Junior high school	Junior-senior high school	Senior high school	4-year regular high school

Group III	64.0	85.4	89.5	90.7	87.0	89.0
Total	61.3	88.3	90.0	88.1	89.7	92.7

[1] Includes some schools having grades 7 and 8.

THE CITY SCHOOL TERM AND DAYS ATTENDED

Although the fact is not generally known, in the early days of the city school systems of the country their sessions continued practically the year round. Vacations were short and holidays were few. The prevailing custom was to divide the school year into four terms of 12 weeks each, with a vacation of a week at the end of each term. In some cities all the vacation came in summer, with the exception of about a week at Christmas. The summer vacation was extended gradually, usually about a week at a time. The daily school sessions were also longer than they now are. The history of the Cincinnati public schools in this particular, as indicated in the early school reports of that city, may be given as a typical example.[2]

The common-school system of Cincinnati was established in 1830. The legislative act requiring the council to provide for the support of the schools at public expense fixed the annual term of 6 months, but an early report in which the act was reproduced contained a footnote saying, "The public schools of Cincinnati are kept open throughout the year." This was substantially if not actually true. The vacations were of 3 weeks succeeding the close of a school year, 1 week during the session of the college of professional teachers in October, and 1 week, including Christmas and New Year's Day. The holidays were every Saturday, Thanksgiving Day, and May Day.

This arrangement continued for several years. Then, apparently without any change in the regulations or in the city ordinance which restricted school vacations to 5 weeks in any one year, the public exhibition marking the close of the school term was held in 1840 on June 19, and the opening of the following term was set for July 20.

In 1849 a formal rule fixed the length of the summer vacation at 5 weeks. Four years later (1853) a further extension was made, and the schools were ordered closed from the last day of June to the third Monday in August.

No substantial change was made for 7 years, but in 1860 another week was added to the vacation, which was made to extend from the last Friday in June to the fourth Monday in August. Another 7-year period elapsed, and again (1867) the vacation period was increased, this time until the first Monday in September.

On May 31, 1887, two additional holidays were introduced, namely Washington's Birthday and Decoration Day; and it was provided that the schools should not be opened on Friday following New Year's Day and Thanksgiving Day when those holidays fell on Thursday.

The regulation in effect in 1911 provided that the annual vacation should be from such date in June as might be designated by the board of education to the first Monday after the first Tuesday in September. The schools were actually taught 200 days in 1910–11, and 184 days in 1931–32.

II	183	181	151	157	32	24	17.4	13.3
III	181	180	151	156	30	24	16.6	13.3
IV	178	178	148	153	30	25	16.8	14.0
Total	183	182	151	157	32	25	17.4	13.7

From 1929–30 to 1931–32 the number of days school was in session decreased 4 days in group I, 2 days in group II, 2 days in group III, and 2 days in group IV. The decrease in the length of school term within the biennium may have been due partly to chance holidays, but the shortening of the school term by a week or two in a few of the cities probably accounts for most of the decrease. During the biennium the number of days attended by each pupil enrolled increased about 2 days.

In table 4 (pp. 40–62) the length of school term is given for individual cities in groups I, II, and III. From the detailed data contained in that table and from the average length of term (182 days) only a general conception as to the number of days that school was in session can be obtained. A clearer conception of the situation with respect to length of school term may be had by consulting table VII and figure 3 which show the distribution of 1,000 cities according to the number of days that the public schools were actually in session.

It appears, therefore, that in this typical city the actual reduction in school time per year has been from 233 to 184 days.

Table IV taken in part from the Report of the Commissioner of Education for 1891–92,[3] shows that the conditions in Cincinnati are representative of the entire country:

TABLE IV.—*Length of school term and of daily sessions, 1841–42*

City	In 1841–42 or thereabouts			In 1891–92			Length of school term in 1931–32
	Length of school term [1]	Length of daily sessions	Time given to recesses daily	Length of school term	Length of daily sessions	Length of recesses	
1	2	3	4	5	6	7	8
		Hours	*Minutes*	*Days*	*Hours*	*Minutes*	*Days*
New York, N.Y.	49 weeks	6–7		202½	5	20	184
Chicago, Ill.	48 weeks	6		192	5	15	195
Philadelphia, Pa.	251½ days	7		201	5	10	180
Brooklyn, N.Y.	11 months			202			184
Boston, Mass.	224 days	[2] 5½ [3] 6	30	200	5	20	182
Baltimore, Md.	11 months	[2] 6 [3] 7	30	203	5	30	190
Cincinnati, Ohio	do	[2] 6 [3] 7	30	190	5¼	15	184
Cleveland, Ohio	43 weeks			190	5	15	183
Buffalo, N.Y.	12 months			195			185
Washington, D.C.	238 days	[2] 6 [3] 7	30	180	5	15	180
Detroit, Mich.	259 days	6		196	5½	20	177

[1] The exact number of days cannot be stated in all cases, because of the uncertainty as to the length of the week or the month mentioned in the original documents. It is presumed, however, that the calendar week or month was intended.
[2] In winter.
[3] In summer.

The reduction in the length of the school term has come so gradually that the extent of it has not been realized and is rarely discussed.

Although the length of the school term has been reduced since the early days of city school systems, the number of days attended by each pupil enrolled has increased. Data on attendance in the early days are not at hand, but data compiled from the report of the Commissioner of Education for 1879–80 show that although the school term was longer in most cities than at present the number of days attended was less, as may be noted in table V, which shows the number of days school was in session in several of the large cities and the number of days attended by each pupil enrolled in 1879–80 and in 1931–32.

From 1922 to 1932 the number of days that school was in session decreased in each group of cities except in group IV. For all cities combined the term decreased from 183 to 182 days and the number of days attended increased from 151 to 157, a loss of 1 day in length of term and a gain of 6 days in average number of days attended. The average number of days of the term each pupil enrolled was out of school decreased from 32 to 25 days, and the percent of time out of school from 17.4 in 1921–22 to 13.7 in 1931–32, as shown in table VI.

186–190	13	13.9	38	16 2	81	12.1	132	13.2
191–195	8	8.7	12	5.2	19	2.8	39	3.9
196–200	4	4 4	1	.4	4	.6	9	.9
Total	93	100.0	236	100 0	671	100 0	1,000	100.0

Of the 1,000 cities represented in table VII and in figure 3 about 5 percent have a school term varying from 156 to 170 days, which represents a school term of about 8 to about 8½ months; about 90 percent have a school term varying from 171 to 190 days, or a term of about 9 to 9½ months; only about 5 percent have a term from 191 to 200 days, or a 10 months' term.

In only 9 cities in 1931–32 was the school term from 196 to 200 days, or what might be considered 10 full months of school, counting 20 days to a school month. In 1879–80, according to the report of the Commissioner of Education for that year, the schools in 95 of the cities having a population of 7,500 and more were in session 196 days or more, and in several of the 95 cities schools were in session more than 200 days.

On the whole the number of days that the city schools are in session is not increasing. The number of days attended by each pupil enrolled is, however, increasing; but even with the increase in attendance, the average number of days attended is only 157. In other words, only about one half the city school children attend school more than 157 days, and the greatest number of days that only a very few children have an opportunity of attending school is 200.

If a child attends school 200 days a year for 6 hours a day, the best that is offered to only a few, he is in school 1,200 hours a year. In a year of 365 days there are 8,760 hours. This fortunate child is thus in school only 13.6 percent of the time. Counting 10 hours for sleep, he is in school only 23.5 percent of the time that he is awake; the home has the child with an exceptionally long school term and with an exceptional attendance record 76.5 percent of the time he is awake.

As a matter of fact city children are on an average in school only 157 days a year. The child who attends school 6 hours a day for 157

days is in school only 942 hours a year. Allowing 10 hours for sleep the child's time for 365 days is distributed as follows: 10.7 percent in school, 41.7 percent in sleep, and 47.6 percent at his parents' or his own disposal.

Although 12 years of public schooling are offered, the average child attends school only 9 years. The distribution of his entire time for the 12 years that he might be in school is, therefore, 8.1 percent in school, 41.7 percent in sleep, and 50.2 percent at his own or his parents' disposal. These facts are presented in figure 4.

In considering the proportion of time the child is directly under the influence of the school and under the influence of the home, it should be remembered that for the first 5 or 6 years of the child's life, a very

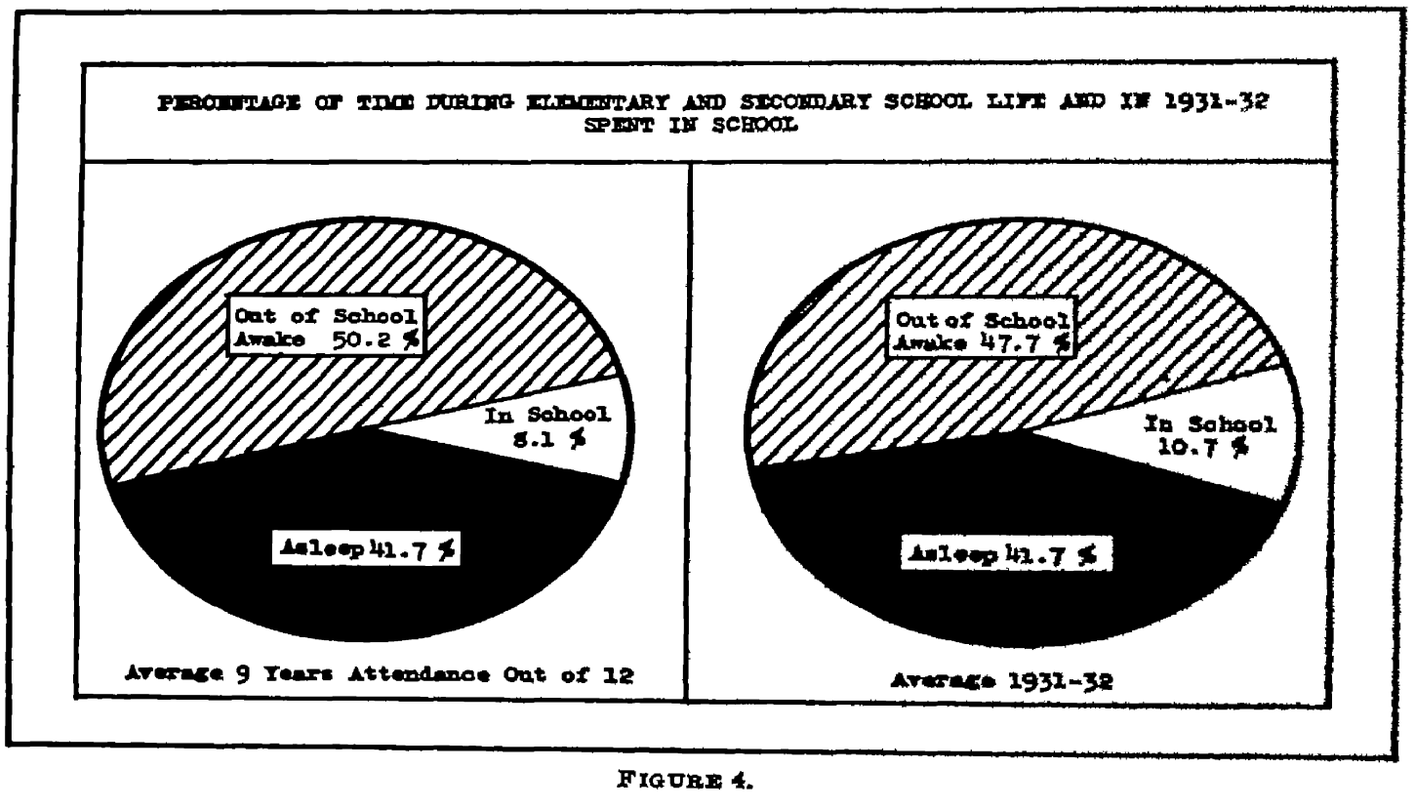

FIGURE 4.

important period in habit formation. he is directly under other than school influences.

This analysis of the school child's time emphasizes the joint responsibility of the home, the school, and community institutions for his all-round education.

SUPERVISING AND TEACHING STAFF

In the public day schools of cities having a population of 2,500 or more, 3,557 superintendents and assistant superintendents, 21,786 supervisors and principals, and 404,462 teachers were employed in 1931–32. From 1921–22 to 1931–32 the number of superintendents and assistants in the day schools increased 11.2 percent, the number of supervisors and principals increased 12.7 percent, and the number of teachers increased 37 percent. From 1929–30 to 1931–32 the

number of superintendents and assistants increased 10.2 percent, the number of supervisors and principals decreased 3.1 percent, and the number of teachers increased 6.4 percent. Since the cities in the statistical report of the Commissioner of Education for 1921–22 and 1929–30 were those classified as such in the 1920 census, the increase of about 10 percent in the number of cities in the 1930 census should be considered in interpreting the percentage of increase in personnel.

Of the 404,462 teachers in the day schools of all groups of cities in 1931–32 there were 59,423 men and 345,039 women, or 14.4 percent men and 85.6 percent women. The percentage of men teachers has, however, increased, as may be noted in table VIII.

TABLE VIII.—*Percentage of men teachers, 1922 to 1932 (day schools)*

Year	Group				Total
	I	II	III	IV	
1	2	3	4	5	6
1922	11.2	9.7	9.4	11.0	10 7
1924	11.3	10.3	10.4	11.9	11.1
1926	12.2	11.1	10.8	12.2	11 8
1928	13.1	11.9	11.4	12.7	12.3
1930	13.8	12.6	12.3	13.7	13.3
1932	14.9	13.8	13.8	15.6	14.4

The proportion of men teachers in public city schools has greatly increased in the last 30 years. In 1899–1900 men teachers represented only 7.5 percent of the instructional staff; in 1910 they constituted 8.7 percent.

Data were not compiled to show for all cities the ratio of men to women teachers by type of school, but data on this point were compiled from a sampling which included 11 cities in group I, 29 cities in group II, and 84 cities in group III. The results of this sampling are presented in table IX.

TABLE IX.—*Percentage of men teachers in each type of school in 124 cities, 1931–32*

Type of school	Group			Total
	I	II	III	
1	2	3	4	5
Elementary	4.7	2.1	2.8	3.9
Junior high	24.7	26.2	17.3	23.9
Senior high	39.1	39.1	34.0	38.2
4-year regular high	41.0	36.6	33.8	39.1

Comparing the percentages obtained from the sampling for 1931–32 with the percentages for all cities having a population of 10,000 or more for 1921–22 it appears that the percentage of men teachers in the elementary schools in the 10-year period increased from 3.7 to 3.9 percent, in the junior high school from 17.8 to 23.9 percent, and in the high school from 34 2 to 39.1 percent. From 1930 to 1932 there was an increase in the proportion of men teachers in the elementary school of about 0.5 percent, in the junior high school of about 1.9 percent, and in the high school of about 3 percent.

The number of teachers per supervisor, including principals, remained practically the same for each group of cities from 1922 to 1930 From 1930 to 1932 there was a slight increase in the teacher-supervisor ratio, as may be seen in table X.

1932	20	16	16	23	19

PUPIL-TEACHER RATIO

From 1921–22 to 1931–32 the number of pupils in average daily attendance per teacher for all schools combined remained practically the same for each group of cities. The number enrolled per teacher was about 1 less in 1931–32 than in 1921–22. From 1930 to 1932 there was no change in the number enrolled per teacher. The number in average daily attendance per teacher increased by 1 pupil. A decided increase in the pupil-teacher ratio for 1932–33 over 1931–32 is indicated from such figures as are available from cities for 1932–33.

Table XI shows the pupil-teacher ratio for each group of cities by bienniums from 1922 to 1932.

No complete tabulation was made to show the total number of pupils and total number of teachers in each type of school, but a tabulation was made of these two items for 30 cities in group I, 45 cities in group II, and 55 cities in group III in order to ascertain the pupil-teacher ratio by type of school for 1931–32. A similar tabulation was made for these same cities for 1929–30, thus making it possible to compare changes within the biennium by type of school. Table XII shows the number of pupils enrolled per teacher by type of school in 1929–30 and in 1931–32.

TABLE XI.—*Number of pupils enrolled and in average daily attendance per teacher*

Year	Group I		Group II		Group III		Group IV		Total	
	Enrolled per teacher	Average daily attendance per teacher	Enrolled per teacher	Average daily attendance per teacher	Enrolled per teacher	Average daily attendance per teacher	Enrolled per teacher	Average daily attendance per teacher	Enrolled per teacher	Average daily attendance per teacher
1	2	3	4	5	6	7	8	9	10	11
1922	36	30	33	28	34	29	34	28	35	29
1924	38	30	34	28	35	29	34	30	36	30
1926	36	29	33	27	34	28	33	28	35	29
1928	35	29	32	27	33	28	33	28	34	28
1930	35	30	32	27	33	28	32	28	33	28
1932	35	30	32	28	33	28	32	28	33	29

TABLE XII.—*Number of pupils enrolled per teacher by type of school for 130 cities*

Type of school	Group I		Group II		Group III		Total	
	1930	1932	1930	1932	1930	1932	1930	1932
1	2	3	4	5	6	7	8	9
Kindergarten	65.1	55.2	48.8	53.4	50.0	47.1	62.8	54.8
Elementary school	39.1	38.0	35.2	35 4	36.3	34.9	38.5	37.6
Junior high school	28.7	30.9	25 9	27.3	27 4	28.3	28.1	30.1
High school	26.8	29.3	26.0	28 2	26.3	30.6	26.6	29.2

Except in group II the number of pupils per teacher in the kindergarten and in the elementary grades was less in 1931–32 than in 1929–30. The comparatively large number of pupils enrolled per kindergarten teacher is partly due to the fact that many kindergarten teachers are assigned 2 sections, 1 in the morning and 1 in the afternoon.

In the junior high school and in the high school there was within the biennium an increase of about two pupils per teacher.

Since the number of pupils per teacher in the elementary grades has always been high compared with the number per teacher in the secondary school grades it would seem that any readjustments in pupil-teacher ratio would be effected in the secondary school grades. The pupil-teacher ratio in the high schools has been less than in the elementary grades partly because many high-school subjects are elective, resulting in some very small classes, and partly because the secondary school accrediting agencies had in general set the maximum pupil-teacher ratio at 30. During the biennium special interpretations of the standard on pupil-teacher ratios have been allowed by some of these agencies.

182163°—33——2

CURRENT EXPENSE PER PUPIL IN AVERAGE DAILY ATTENDANCE

In 1929–30 the average cost per full-time day school pupil in average daily attendance in cities having a population of 2,500 or more for current expenses was $100.95; in 1931–32 the cost per pupil in these cities was $98, or 2.9 percent less than in 1929–30.

Table XIII shows the cost per day school pupil in each group of cities by bienniums from 1922 to 1932.

TABLE XIII.—*Annual current expense per pupil in average daily attendance 1922–32 (full-time day schools)*

Year	Size of city by population groups				Total
	I	II	III	IV	
1	2	3	4	5	6
1922	$89 62	$78. 72	$68. 85	$64. 51	$78. 73
1924	97. 86	85 30	75. 31	65. 11	84. 78
1926	105 19	90. 15	79. 98	74. 69	91 98
1928	114. 20	94. 97	82. 82	75. 69	97. 11
1930	119 17	98. 03	85. 75	79. 02	100. 95
1932	114. 86	97 02	82. 04	73. 09	98. 00

From 1922 to 1930 there was an increase in per capita cost from biennium to biennium in each group of cities, but from 1930 to 1932 there was a decrease in each group of cities amounting to 3.6 percent in group I, 1 percent in group II, 4.2 percent in group III, 7.5 percent in group IV, and 2.9 percent for all cities. These average decreases are not great. There were, however, some cities in which the school expenses for 1931–32 were much less than for 1929–30. A comparison between per capita costs in 180 cities in 1929–30 and in the same cities in 1931–32 shows that 46, or 25 percent, reduced the per capita for current expenses by 10 percent or more. Two of the 180 cities show a decrease of as much as 30 percent. Only 6, or 3.9 percent, of the 180 cities show an increase of 10 percent or more.

Table XIV shows the number of cities in each group on the sampling of 180 that decreased or increased the per capita expenses from 1929–30 to 1931–32, and the percentages of change.

The median decrease in the annual cost per pupil for the 39 cities compared in group I was 2.0 percent; for the 53 cities in group II, 5.7; for the 51 cities in group III, 5.6 percent; and for the 37 cities in group IV, 7.1 percent. The median decrease for the 180 cities was 4.7 percent.

Table XV shows the annual cost per pupil in average daily attendance for each current expense item for each group of cities, totaling 3,158 cities.

TABLE XIV.—*Changes in annual cost per pupil by certain percentages in 180 cities from 1929–30 to 1931–32*

Size of city	Number of cities showing											Total
	Decreases							Increases				
	30 to 34.9 per-cent	25 to 29.9 per-cent	20 to 19 9 per-cent	15 to 19.9 per-cent	10 to 14 9 per-cent	5 to 9 9 per-cent	0 1 to 4 9 per-cent	0 1 to 4 9 per-cent	5 to 9 9 per-cent	10 to 14.9 per-cent	15 to 19 9 per-cent

Auxiliary agencies and coordinate activities	3.56	3.17	2.85	3.37	3.34
Fixed charges	4 00	1.79	1.60	1.50	2.73
Total current	114.86	97.02	82.04	73 09	98.00

In order to discover the approximate range of per capita costs for each current-expense item, table XVI was prepared from data for 290 cities.[4] In group I, for example, the per capita cost for general control ranges from $1.02 to $6.76, for instruction from $46.03 to $135.66, and for total current expense from $54.79 to $166.97. Among the 290 cities the lowest per capita cost for current expense was $28.92 and the highest was $227.85.

TABLE XVI.—*Range in annual expense per pupil in average daily attendance in 290 cities, 1931–32*

Item	Group			
	I (65 cities)	II (75 cities)	III (75 cities)	IV (75 cities)
1	2	3	4	5
General control	$1.02 to $6.76	$1.05 to $9.04	$1.13 to $11.96	$2.04 to $12.05
Instruction	46.03 to 135.66	28.09 to 166.83	24.35 to 113.15	26.53 to 138.98
Operation	3.46 to 18.46	2.13 to 32.45	1.84 to 29.63	2.02 to 52.72

[4] U. S. Office of Education Circular No. 78. Per Capita Costs in City Schools for 1931–32.

The per capita cost of instruction only varies with the type of school. Data relating to instruction expense were not tabulated by type of school for all cities, but a tabulation was made from a sampling of cities in groups I, II, and III in order to ascertain approximately the per capita cost of instruction. A sampling was made including 11 cities from group I; 27 from group II; and 84 from group III. The per capita costs for instruction derived from the sampling are shown in table XVII.

TABLE XVII.—*Cost per pupil for instruction only in elementary, junior high, and high schools, 1931–32, in 122 cities*

Type of school	Group I	Group II	Group III	Groups I, II, III combined
1	2	3	4	5
Elementary school	$81.03	$65.45	$43.06	$71.69
Junior high school	86.40	78.06	66.55	81.34
Senior and 4-year high school	117 44	105 65	72.33	107 73

Table XVIII shows the cost per pupil for each current expense item, for capital outlay, and for interest by bienniums from 1921–22 to 1931–32 for cities of groups I, II, and III, and for the three groups combined. For the combined groups, the per capita cost for general control decreased 2.2 percent from 1929–30 to 1931–32; for instruction, 2.1 percent; for operation, 4.4 percent; for maintenance, 22.9 percent; for auxiliary agencies, 2.6 percent.

Fixed charges increased 11.4 percent per capita. Capital outlay showed a decrease of 46.5 percent, and interest an increase of 10.1 percent.

TABLE XVIII.—*Cost per pupil for each current expense item, for capital outlay, and interest, 1921–22 to 1931–32 (day schools)*

GROUP I

Year	General control	Instruction	Operation	Maintenance	Auxiliary agencies	Fixed charges	Total current expenses	Capital outlay	Interest

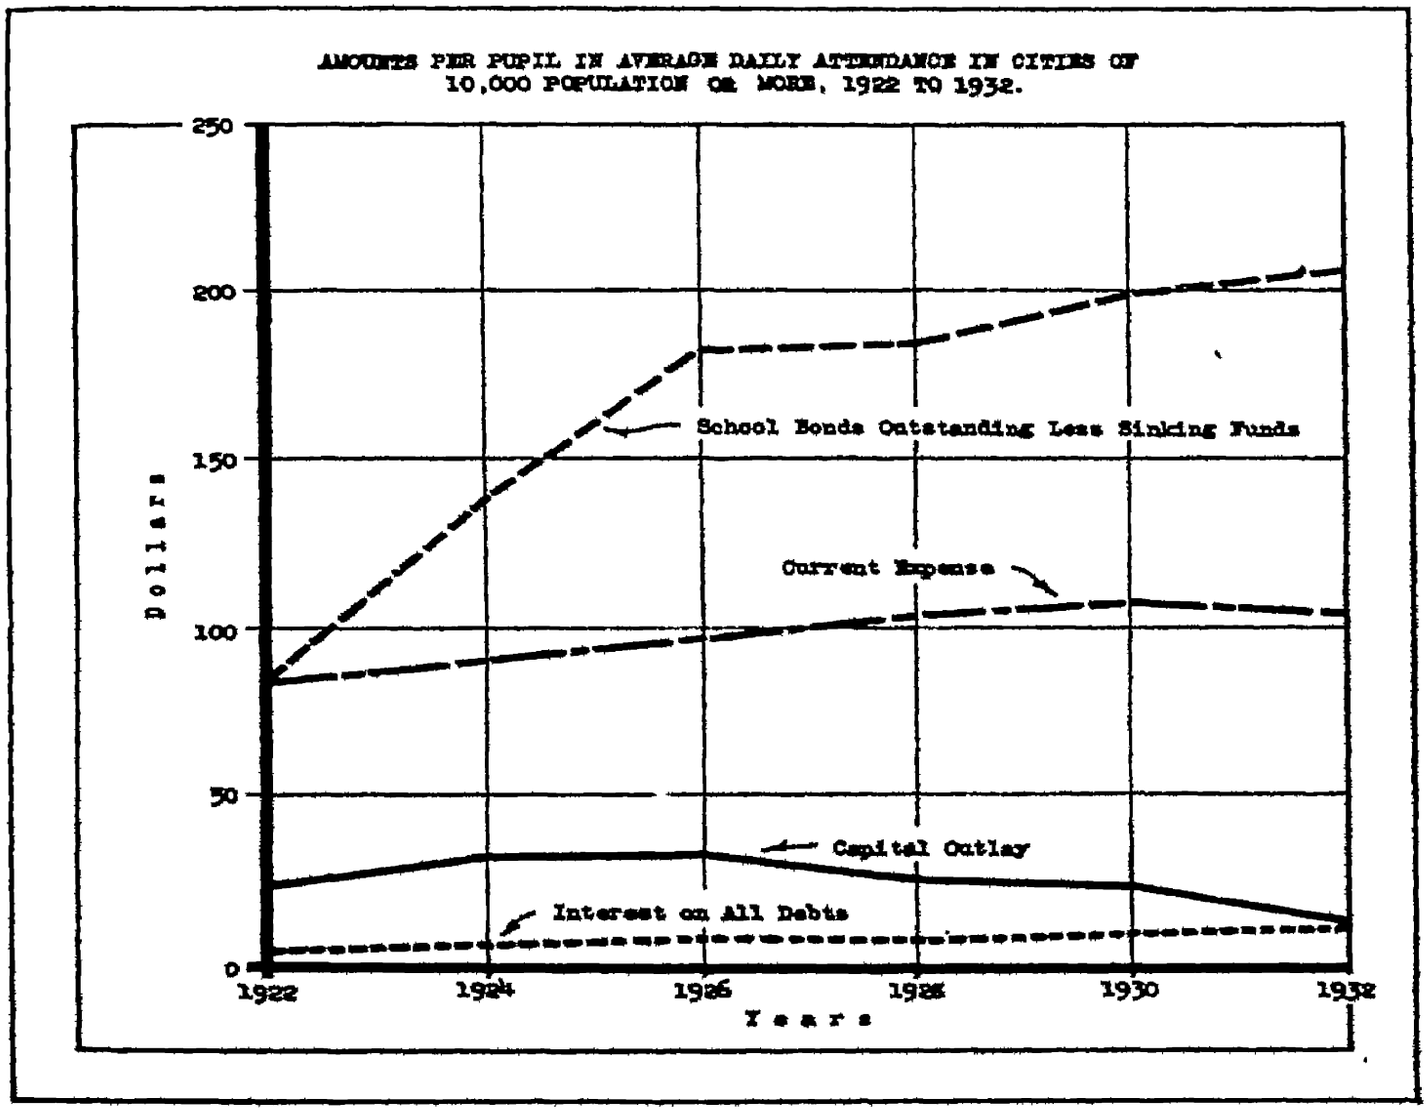

FIGURE 5.

Figure 5 shows by the bienniums from 1922 to 1932 the comparative changes in current expenses, capital outlay, bonded indebtedness, and interest per pupil in average daily attendance in cities having a population of 10,000 or more.

PERCENTAGE OF DISTRIBUTION OF THE CITY SCHOOL DOLLAR

Table XIX shows for 1931–32 for each group of cities the distribution for the six current expense items, and also the percent that total current expenses, capital outlay, and interest are of the grand total expenditure, exclusive of payment on bonds.

TABLE XIX.—*Percentage distribution of the current expense and total expense dollar in cities of groups I, II, III, and IV in 1931–32*

[For basic figures see table 1]

Purpose	Group				Total
	I	II	III	IV	
1	2	3	4	5	6
Current-expense dollar					
General control	3.1	3.5	4.3	6.4	3.8
Instruction	78.2	78.0	75.8	72.6	77.1
Day schools, full time	74.4	76.3	75.3	72.5	75.2
Part time [1]	1.0	.8	.2	(2)	.7
Night [1]	1.3	.7	.2	.1	.9
Summer [1]	.5	.2	.1	(2)	.3
Operation	8.7	10.4	11.3	11.2	9.7
Maintenance	3.6	3.1	3.2	3.1	3.4
Auxiliary agencies and coordinate activities	3.0	3.2	3.5	4.6	3.3
Fixed charges	3.4	1.8	1.9	2.1	2.7
Current expense	100.0	100.0	100.0	100.0	100.0
Total-expense dollar.					
Current expense	82.0	81.2	83.6	85.0	82.5
Capital outlay	10.2	10.4	7.9	7.7	9.6
Interest	7.8	8.4	8.5	7.3	7.9
Total	100.0	100.0	100.0	100.0	100.0

[1] Includes a small amount in some cities for operation and maintenance.
[2] Less than 0.05 percent.

TABLE XX.—*Range in percent of amount devoted for each current expense item in 290 cities, 1931–32*

Purpose	Group			
	I (65 cities)	II (75 cities)	III (75 cities)	IV (75 cities)
1	2	3	4	5
General control	1.7 to 8.3	1.7 to 6.0	2.3 to 9.5	2.4 to 11.4
Instruction	71.2 to 86.3	70.2 to 86.9	56.3 to 86.4	48.9 to 85.6
Operation of plant	4.8 to 14.4	5.0 to 18.8	6.2 to 17.7	5.2 to 26.8
Maintenance of plant	1.4 to 10.1	.7 to 5.9	.8 to 9.5	.1 to 7.6
Auxiliary agencies and coordinate activities	2 to 6.6	.1 to 10.4	.1 to 12.9	.1 to 14.0
Fixed charges	.1 to 8.7	.1 to 5.5	.1 to 8.7	.1 to 5.5

In general, as the size of city increases the percentage of current expenses for general control, operation, and auxiliary agencies decreases, and the percentage for instruction and maintenance increases. The percentage for fixed charges is greater in groups I and IV than in each of the other two groups.

The percentage of the current expenses for each item varies considerably among the cities of the country, as is shown in table XX, which was compiled from data for 290 cities.

The cities having the highest per capita costs do not always devote the largest proportion of school funds to instruction. For example, the city in group III (table XX) in which the per-capita cost is highest devotes only 56.3 percent of the current expenses to instruction, and the city in group II in which the per-capita cost is highest devotes only 48.9 percent to instruction. In group I the city in which the per-capita cost is least devotes 85.4 percent of the current expense to instruction, which is considerably more than the average for the group.

Table XXI shows the percentage distribution of the school dollar by bienniums from 1922 to 1932 for cities having a population of 10,000 or more.

Figure 6 shows the distribution of the current-expense dollar for 1932 and the total-expense dollar for 1930 and 1932.

TABLE XXI.—*Percentage distribution of the current expense and total expense dollar in cities of 10,000 population or more, 1922 to 1932*

Purpose	Percentage by years					
	1922	1924	1926	1928	1930	1932
1	2	3	4	5	6	7
Current expense dollar						
General control	3.6	3.2	3.4	3.2	3.3	3.3
Instruction	78.7	78.0	77.9	77.4	77.2	77.8
Day school, full time	76.7	75.8	75.6	75.0	74.8	75.5

Maintenance	4.6	4.6	4.6	4.4	4.3	3.4
Auxiliary agencies and coordinate activities	2.1	2.9	2.8	3.1	3.1	3.2
Fixed charges	1.2	1.7	1.6	2.2	2.5	2.8
Total	100.0	100.0	100.0	100.0	100.0	100.0
Total expense dollar:						
Capital outlay	21.0	24.5	21.9	18.5	16.7	9.8
Interest	3.5	4.3	5.8	5.1	6.6	8.1
Current expense	75.5	71.2	72.3	76.4	76.7	82.1
Total	100.0	100.0	100.0	100.0	100.0	100.0

Within the 10-year period there was but little change in the proportion of the current expense dollar devoted to each item. In general, the cities that distribute their school budget for current expenses so that from 3 to 4 percent is for general control, from 72 to 80 percent for instruction, from 9 to 10 percent for operation, from

SCHOOL EXPENDITURES IN CITIES OF 10,000 POPULATION AND MORE, 1930-1932

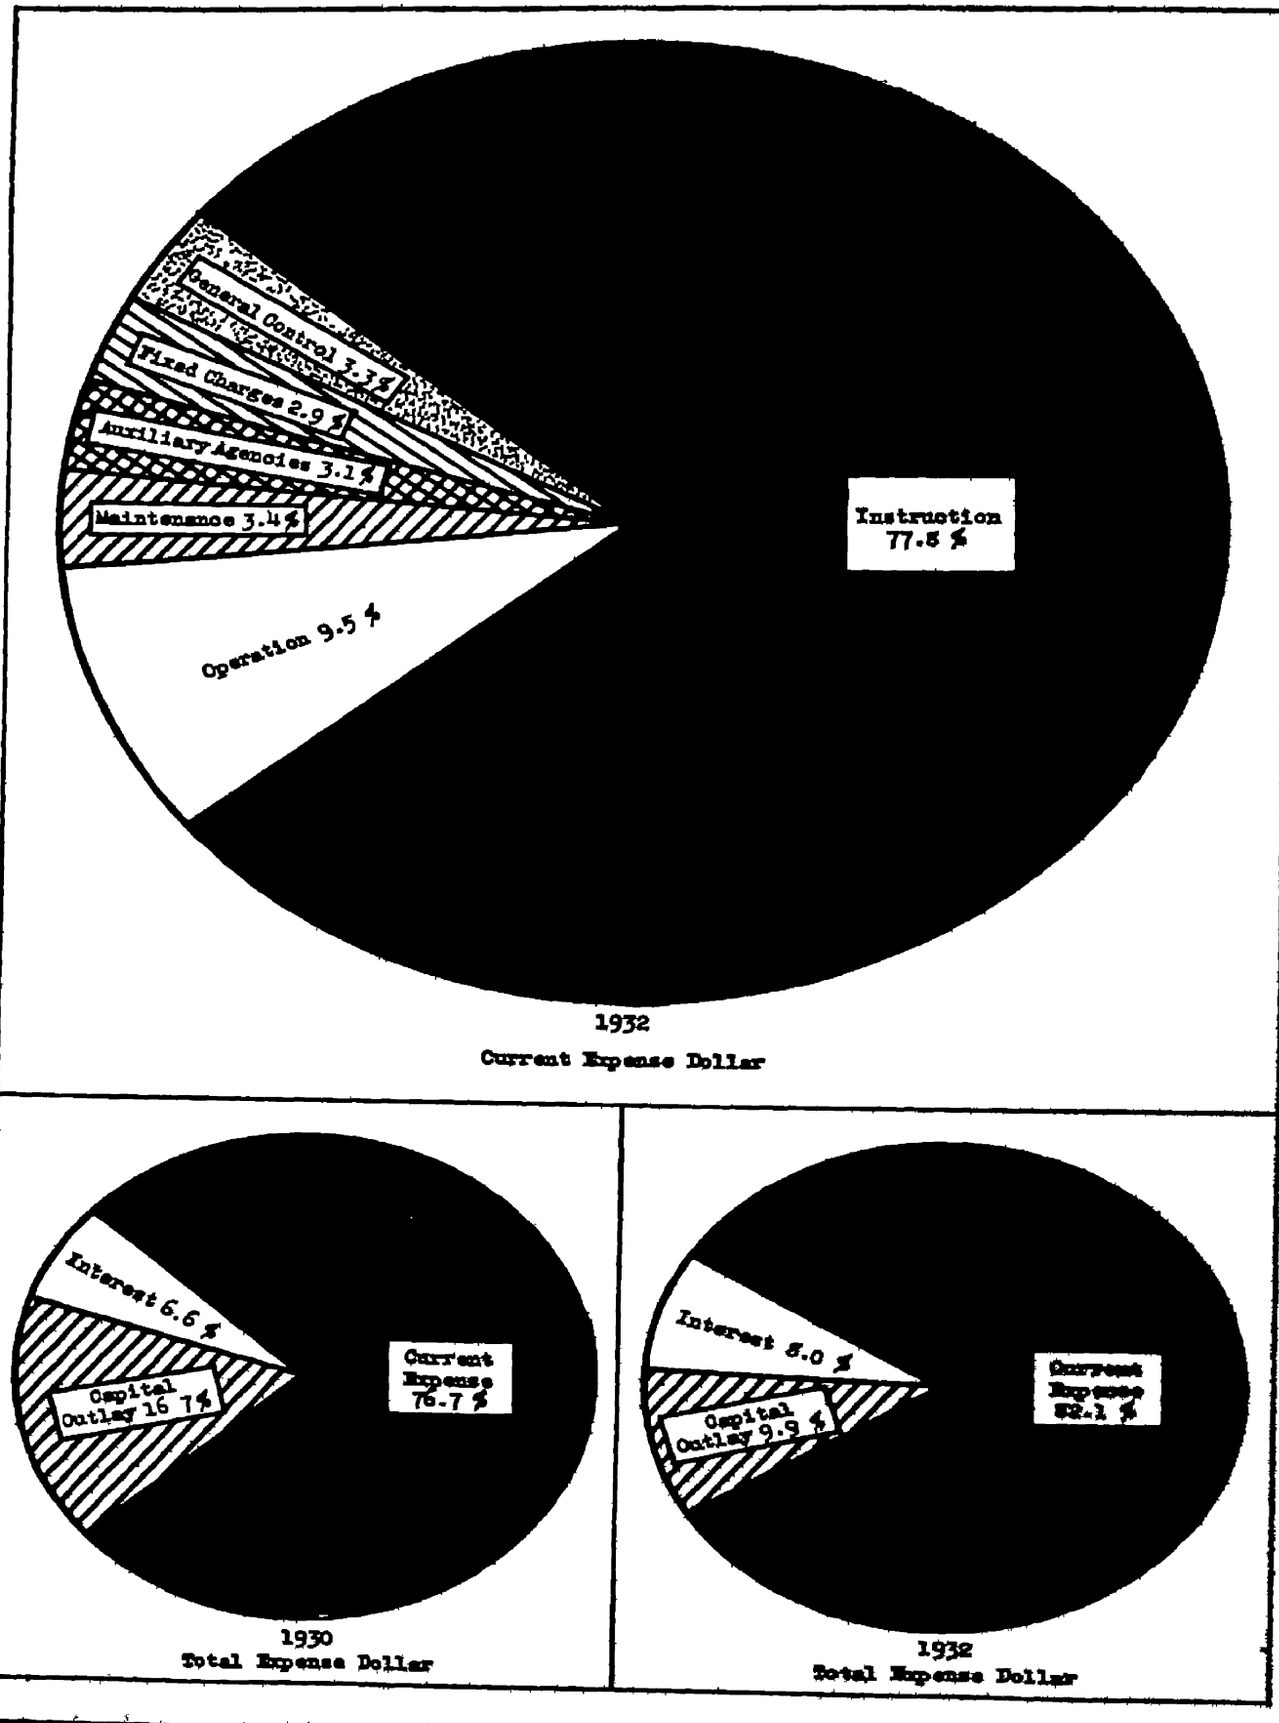

FIGURE 6.

3 to 5 percent for maintenance, from 2 to 4 percent for auxiliary agencies, and from 1 to 3 percent for fixed charges are conforming rather closely to general practice. No hard and fast rule can, however, be made as to what percent of the total amount of the budget should be devoted to each current expense item, since conditions vary. For example, some city because of geographical conditions may find it necessary to spend a relatively large amount for the operation of the school plant, and some city in which the cost of living is relatively high and some city in which the standard qualifications of teachers are relatively high may find it necessary to spend larger amounts for instruction than do those cities in which living costs and the standard qualifications of teachers are lower.

THE CITY SCHOOL DEBT

In cities having a population of 2,500 or more the total amount of school bonds outstanding, less the amount in the sinking fund, was $2,218,294,000 in 1931–32. The interest on all indebtedness was $112,051,977.

The increase in the amount of indebtedness for a period of years can be given only for cities having a population of 10,000 or more. From 1922 to 1932 the amount of net bonded indebtedness in these cities increased from $547,432,000 to $1,918,417,000, and the interest on all indebtedness increased from $25,409,726 to $97,495,400.

Since the figures for 1932 are for several hundred more cities than for 1922, the percentage of increase should not be calculated upon total amounts but rather upon amount of bonds outstanding per pupil. In 1922 the amount of bonds outstanding per pupil in average daily attendance was $83.61 and in 1932 the amount per pupil was $205.85, or an increase of about 146 percent. From 1930 to 1932 the net bonded indebtedness increased from $199.68 per pupil to $205.85, or an increase of about 3 percent within the biennium. Since capital outlay, as is shown in table XXI, has been decreasing since 1924, it would seem that within a few years the amount of bonded indebtedness will also begin to decrease.

Table XXII shows the amount of bonds outstanding, less the amount in the sinking fund, in cities of groups I, II, and III in thousands of dollars and the amount per pupil in average daily attendance.

Based upon the amount of bonds outstanding per pupil in average daily attendance, the increase in group I from 1930 to 1932 was 2.7 percent; in group II, about 6 percent; and in group III there was a decrease of 0.8 percent.

TABLE XXII.—*Bonds outstanding, less amount in sinking fund, in cities of 10,000 population or more, 1922 to 1932*

Year	Group I		Group II		Group III		Groups I, II, and III combined	
	Amount in thousands of dollars	Per pupil in average daily attendance	Amount in thousands of dollars	Per pupil in average daily attendance	Amount in thousands of dollars	Per pupil in average daily attendance	Amount in thousands of dollars	Per pupil in average daily attendance
1	2	3	4	5	6	7	8	9
1922	287,717	$76 25	166,517	$119 27	93,198	$67.60	547,432	$83.61
1924	573,570	140.44	229,766	150 70	182,954	120 47	986,290	138.51
1926	832,630	195 10	289,732	176 22	244,865	154.01	1,367,227	182.26
1928	867,004	192.63	313,766	180.59	283,217	164 81	1,463,987	183 99
1930	1,017,501	216 03	355,202	191 21	298,790	105 71	1,671,493	190 68
1932	1,200,888	222.04	389,855	203 25	327,074	164.41	1,918,817	205 85

SCHOOLS, SCHOOL BUILDINGS, AND PROPERTY INVESTMENTS

A school as defined and used in these statistics is an organization such as a kindergarten, elementary school, junior or senior high school, and is counted as a separate unit whether housed separately or not. There were 36,573 schools in the 27,763 buildings in all cities in 1931–32.

The size of schools of different types and in different size cities varies considerably as shown in a sampling tabulation made for 124 cities summarized in table XXIII.

TABLE XXIII —*Number of pupils per school in 124 selected cities*

Type of school	Group I (11 cities)	Group II (29 cities)	Group III (84 cities)	Total (124 cities)
1	2	3	4	5
Elementary	513	371	324	438
Junior high school	1,507	805	587	1,073
Junior-senior	1,512	903	570	1,185
Senior high school	2,338	1,634	637	1,445
4-year regular high school	1,820	1,127	627	1,210

All types of high schools in group I cities are from three to four times as large as the elementary schools. The largest schools in any group are the senior high schools in the reorganized systems, averaging about 1,450 pupils per school. The other high schools have only from 1,100 to 1,200 students and the elementary schools have about 435

Four and three-quarters billion dollars is invested in city school property. The estimated value of school properties reported by bienniums from 1922 to 1932 for each group of cities is given in table XXIV.

TABLE XXIV.—*Estimated value of school properties in city school systems, 1922–32*
(*thousands of dollars*)

Year	Group				All cities
	I	II	III	IV	
1	2	3	4	5	6
1922	890,280	391,315	344,964	394,710	2,030,269
1924	1,177,958	487,707	461,083	537,535	2,664,283
1926	1,535,727	615,159	562,141	672,249	3,385,276
1928	1,767,106	693,969	648,841	740,227	3,850,143
1930	2,015,525	778,507	703,119	804,940	4,302,091
1932	2,405,253	837,529	775,344	736,911	4,755,037

Part of the increase in groups I, II, and III from 1930 to 1932 is accounted for by the reclassification of cities according to the 1930 census placing more cities in each of these groups. The 10.5 percent increase in value is probably offset in part by the 10 percent increase in the number of school systems.

In cities of group I the estimated value of school property in 1932 is $2,405,253,000, or 50.5 percent of the total for all cities; in group II, $837,529,000, or 17.5 percent; in group III, $775,344,000, or 16.5 percent of the total; and in group IV, $736,911,000, or 15.5 percent of the total for all cities.

The value of school property in all cities increased from $2,030,269,000 in 1922 to $4,755,037,000 in 1932, or an increase of 134 percent.

TABLE XXV.—*Number of school buildings and value of average plant, including grounds, buildings, and equipment, 1922–32*

Year and items	Group				All cities
	I	II	III	IV	
1	2	3	4	5	6
1922					
Number of buildings	6,211	3,524	4,812	9,315	23,862
Average value	$144,788	$111,043	$71,688	$42,373	$85,084
1924					
Number of buildings	6,245	3,635	5,042	9,537	24,459
Average value	$188,624	$134,170	$91,448	$56,368	$108,928
1926					
Number of buildings	6,391	3,782	5,167	9,901	25,241
Average value	$240,295	$162,654	$108,794	$67,897	$145,660
1928					
Number of buildings	6,370	3,929	5,340	9,974	25,613
Average value	$277,411	$176,627	$121,506	$74,216	$150,320
1930					
Number of buildings	6,657	4,005	5,378	10,198	26,238
Average value	$302,768	$194,384	$130,740	$78,931	$163,964
1932					
Number of buildings	8,334	4,345	6,007	9,077	27,763
Average value	$288,607	$192,757	$129,073	$81,184	$171,272

The number of school buildings and the value of the average school plant including grounds, buildings, and equipment is shown by city sizes and bienniums from 1922 to 1932 in table XXV. The transfer of cities from one group to another accounts in part for the increase in number of buildings and decrease in the average value in the first three groups between 1930 and 1932.

In 1932 the average school plant was valued at about $170,000. This valuation is double the average in 1922, although the increase in the number of plants was only 16.3 percent during the decade. The average building in group I with its grounds and equipment was valued at about $290,000; in group II, $190,000; in group III, $130,000; and in group IV, only $80,000.

The value of school property per pupil in average daily attendance is given in table XXVI by groups and bienniums.

TABLE XXVI.—*Value of school properties per pupil in average daily attendance in city school systems, 1922–32*

Year	Group				Total
	I	II	III	IV	
1	2	3	4	5	6
1922	$238	$280	$250	$204	$239
1924	288	320	304	247	287
1926	360	374	354	286	349
1928	393	399	377	320	375
1930	428	419	390	333	399
1932	445	437	338	319	409

The estimated value of school property per pupil in average daily attendance increased $170, or 71.1 percent, from 1922 to 1932. The increase from 1930 to 1932 amounted to $10 per pupil, or 2.7 percent. In cities of groups III and IV there was from 1930 to 1932 a decrease in the value of school property per pupil in average daily attendance, amounting to 13.3 percent in group III and to 4.3 percent in group IV.

NIGHT SCHOOLS

In 1931–32 only 561, or about 18 percent, of the cities of the country reported night schools. Eighty, or 86 percent, of the cities of group I reported such schools; 156, or 66.1 percent, of group II; 214, or 30.7 percent, of group III; and 111, or 5.1 percent, of group IV, reported such schools.

Of the total enrollment, 74.5 percent is in group I; 17.5 percent is in group II; 5.7 percent in group III; and 2.3 percent, is in group IV.

The peak of the night-school movement from 1922 to 1932 was reached in 1928 with respect to the number of cities reporting such schools; and in 1930, with respect to enrollment, the number of supervisors and teachers, and expenditures. From 1930 to 1932 the number of cities reporting night schools decreased 15.5 percent, the enroll-

ment, 4.8 percent, the number of supervisors and teachers 1.2 percent, and the amount expended for such schools 21.9 percent.

From table XXVII, which shows the number of cities reporting night schools, enrollments, teachers, and expenditures, 1922 to 1932, the fluctuations of night schools may be noted. If data for 1932–33 were available the decline from 1930 would doubtless be very marked, indeed.

TABLE XXVII.—*Night and Americanization schools in cities of 2,500 population or more, 1922–32*

Year	Number of school systems reporting	Enrollment	Number of supervisors, principals, and teachers	Expenditures for cities reporting this item
1	2	3	4	5
1922	504	842,863	21,553	$6,413,420
1928	711	993,985	23,604	9,496,170
1930	664	1,038,052	24,071	10,682,349
1932	561	978,471	23,675	8,342,352

SUMMER SCHOOLS

Of the 3,158 city school systems in the country only 278, or 8.8 percent, reported summer schools in 1931–32. Fifty-seven, or 61.3 percent, of the cities of group I reported such schools; 89, or 37.3 percent, of group II; 84, or 12.8 percent, of group III; and only 48, or 2.2 percent, of group IV reported summer schools.

The summer school movement reached its peak in 1928 with respect to the number of cities reporting such schools, and in 1930 with respect to the number of supervisors and teachers, enrollment, and expenditures. From 1930 to 1932 the number of cities reporting summer schools decreased 25.6 percent, the number of supervisors and teachers 8.4 percent, the enrollment 10.8 percent, and the expenditures 7 percent. Since the enrollment has decreased so much less than the number of school systems reporting, it is possible that there has been very little if any decrease in enrollments in the cities still maintaining their summer schools.

Table XXVIII shows the number of cities reporting summer schools, enrollment, teachers, and expenditures, 1922 to 1932.

TABLE XXVIII.—*Summer schools in city school systems having a population of 2,500 or more, 1922–32. All groups*

Year	Number of city systems reporting	Number of supervisors, principals, and teachers	Enrollment	Total expense for schools reporting this item
1	2	3	4	5
1922	381	9,748	280,807	$1,662,981
1928	447	14,577	456,089	3,262,655
1930	374	14,681	462,636	4,043,433
1932	278	13,253	430,080	3,760,821

SOME EFFECTS OF THE ECONOMIC SITUATION ON CITY SCHOOLS

The effects of the depression began to be reflected in city school current expense budgets between 1930 and 1932, or several years after it began to be felt by the industrial and commercial world. However, it should be remembered that it was also several years after the beginning of the prosperous years before the prosperity of the Nation was reflected in the schools. The question may be raised whether the effects of the depression were not felt by the schools sooner than the effects of rising prices during and after the World War. Both in periods of business prosperity and in periods of business depression the schools do not feel the effects at once.

As may be noted in the foregoing sections of this report, general reduction in school expense began some time between 1930 and 1932. The average reduction was not great, but by referring to table XIV it may be noted that in some cities the cost per pupil in average daily attendance was much less in 1932 than in 1930.

Since city school statistics are collected by the Office of Education every 2 years and in even numbered years, no data are at hand to compare expenses in 1933 with similar expenses in 1930 and 1932. However, in the fall of 1932 the Office of Education sent an inquiry form to all cities having a population of 2,500 or more requesting figures on budgets for current expenses, teachers' salaries, and capital outlay for the years 1930–31, 1931–32, and 1932–33. The data furnished by about 1,095 cities were compiled and published in Circular No. 79, Some Effects of the Economic Situation on City Schools. In order to supplement the data presented in the foregoing sections of this report, some of the data supplied regarding school budgets for 1931–32 and 1932–33 are presented herewith.

Current expense budget.—From 1931–32 to 1932–33 the paring down of school budgets began in earnest. The depression was making itself felt in the current expense budget in all groups of cities and in all sections of the country as may be noted in table XXIX.

TABLE XXIX.—*Percentage of change in budgets for current expenses in city schools from 1931–32 to 1932–33*

Region	Size of city				Average for all cities
	Group I	Group II	Group III	Group IV	
1	2	3	4	5	6
North Atlantic	−1 9	−6 0	−4.7	−6 3	−3 0
North Central	−10. 5	−8 9	−9. 7	−11. 0	−10. 1
South Atlantic	−8 3	−7. 6	−10 6	−7. 5	−8. 3
South Central	−17 9	−3 5	−18. 0	−13 0	−15. 6
Western	−13 9	−11. 9	−12. 9	−10. 8	−13. 1
United States	−5 7	−7 7	−8 7	−9 3	−6 8

The greatest reduction was in group III in the South Central States, amounting to 18 percent. The least reduction was 1.9 percent in group I of the North Atlantic States. Considering the average for all cities by geographical divisions, the greatest decrease, 15.6 percent, was in the South Central States, and the least, 3 percent, was in the North Atlantic States.

If data for individual States are examined in table XXXV extreme cases of budget reduction will be found. The cities of one State reported a 29 percent decrease in 1932–33, and those of another a 25 percent decrease. Four others show reductions ranging from 15 to 20 percent. In 19 other States the average decrease ranges from 10 to about 15 percent. In other words, the cities in 25 States have within a year reduced their school budget for current expenses from 10 to about 30 percent.

Teachers' salary budget.—Table XXX shows that the allotment of the current expense budget for teachers' salaries averaged 5 percent less in 1932–33 than in 1931–32. The median decrease was, however, 7.5 percent. The South Central States had the greatest average decrease, 15 percent, and the North Atlantic States the least, 0.7 percent. The percent of reduction for the country as a whole increases as the size of the city decreases.

TABLE XXX.—*Percentage of change in budgets for teachers' salaries in city school systems from 1931–32 to 1932–33*

Region	Size of city				Average for all cities
	Group I	Group II	Group III	Group IV	
1	2	3	4	5	6
North Atlantic	−0.5	+0.5	−3.7	−1.5	−0.7
North Central	−12.3	−9.1	−8.1	−10.4	−10.3
South Atlantic	−2.9	−7.8	−12.2	−7.9	−5.2
South Central	−17.7	−2.6	−14.9	−14.1	−15.1
Western	−12.7	−11.2	−12.0	−13.3	−12.3
United States	−4.2	−4.7	−7.6	−7.7	−5.0

Since the national, regional, and even the State averages do not show the extent to which budgets for teachers' salaries have been cut in individual cities, calculations were made for each city reporting in order to show for each group the number of cities that have within the past year changed their salary budgets by certain percentages and in order to show the extremes of decrease and of increase and also the central tendency.

Table XXXII shows in percent the range, from the largest decrease to the largest increase, the upper and lower quartiles and medians for each group of cities. While the range varies, the central tendency is much the same for all groups. This is especially true of the medians

varying only from a 6.5 percent decrease in cities of group II to a 7.9 percent decrease in cities of group IV.

TABLE XXXI.—*Change in budgets for teachers' salaries by certain percentages from 1931–32 to 1932–33*

Size of city	Number of cities showing							Total reporting	Total existing
	Decreases					Increases			
	40 to 43 percent	30 to 39 9 per-cent	20 to 29 9 per-cent	10 to 19 9 per-cent	0 1 to 9 9 per-cent	0 1 to 9 9 per-cent	10 to 18 9 per-cent		
1	2	3	4	5	6	7	8	9	10
Group I	0	1	4	7	21	9	0	42	93
Group II	0	0	5	30	43	24	1	103	234
Group III	0	3	17	87	126	39	3	275	675
Group IV	1	18	53	190	277	103	13	655	2,166
Total	1	22	79	314	467	175	17	1,075	3,165

It may be noted that one fourth of the cities reporting have decreased their salary budgets from 12.6 to 43 percent, that one half of them have decreased the budget from 1.8 to 12.6 percent, and the remaining fourth made reductions of less than 1.8 percent or increases up to 18.9 percent. The median for all cities, including those that increased their salary budgets, shows that one half of them have made reductions amounting to more than 7.5 percent.

TABLE XXXII.—*Range of decrease or increase in percents in budgets for teachers' salaries, 1931–32 to 1932–33*

Size of city	Largest decrease	Q_1 (decrease)	Median (decrease)	Average (decrease)	Q_3 (decrease)	Largest increase
Group I	37 7	11 7	7 6	4.2	0.8	9.0
Group II	29 5	11 4	6 5	4.7	.2	11.0
Group III	38 6	13.1	7.3	7.6	2.2	14.4
Group IV	43 0	12.7	7.9	7.7	2.0	18.9
Total	43 0	12.6	7.5	5.0	1.8	18.9

Table XXXIII shows by States the percentage changes in the budget for teachers' salaries in cities from 1931–32 to 1932–33 from the largest increase to the largest decrease.

Since the data given in table XXXIII are based upon budgets and not upon individual salaries, they do not show fully the actual cuts in salaries. No data were collected to show to what extent teachers are returning a portion of their salaries to their boards of education nor to what extent warrants are being discounted. If data on these points were available they would doubtless show that the actual income of teachers has been reduced much more than the percentages in the tables on salary budgets indicate.

TABLE XXXIII.—*Percentage changes in budgets for teachers' salaries in cities from 1931–32 to 1932–33. Extreme ranges and median*

[1] Smallest decreases indicated by −.

Budget for capital outlay.—The reduction in capital outlay began several years before the reduction in current expenses. Part of this reduction was undoubtedly due to the fact that some of the cities had completed most of their school-building programs by the time the depression began. From 1930–31 to 1932, budgets for capital

outlay were reduced 28.4 per cent; from 1931–32 to 1932–33 they were reduced 41.4 per cent. The greatest reduction during the latter year was in the South Central States, averaging 54 percent.

TABLE XXXIV.—*Percentage of change in budget for capital outlay in city school systems from 1931–32 to 1932–33*

Region	Size of city				Average for all cities
	Group I	Group II	Group III	Group IV	
1	2	3	4	5	6
North Atlantic	−46 7	−50. 4	−20 5	−24. 2	−42. 5
North Central	−40. 2	−50 3	−34. 5	−26. 7	−38 0
South Atlantic	−48. 0	[1] +35 4	−11 2	−3. 4	−34 7
South Central	−62. 1	− 9	−61 1	−35. 9	−54. 1
Western	−40. 7	−60 5	−56 3	−30. 1	−44. 5
United States	−46 8	−49 4	−31 0	−24 4	−41. 4

[1] One of the cities in Virginia spent nothing for capital outlay in 1931–32, but budgeted $100,000 for 1932–33.

Table XXXIV shows that the changes in the budget for capital outlay in 1932–33 vary greatly among the States, ranging from 5.6 percent in one State to 96.2 percent in another. The capital outlay was decreased by more than 50 percent in 18 States, from 30 to 50 percent in 11 States, from 10 to 30 percent in 11 States, and by less than 10 percent in 5 States for the year 1932–33.

TABLE XXXV.—*Percentage of change in certain factors affecting city schools from 1931–32 to 1932–33*

[1] One of the cities in Virginia spent nothing on capital outlay in 1931–32, but budgeted $100,000 for 1932–33.

THE EFFECT OF REDUCED SCHOOL BUDGETS

The reduction in budgets naturally had serious effects on the schools. Fewer teachers were employed in spite of the fact that the enrollment increased. In some cities the school term was shortened. Textbooks and other educational supplies were curtailed. Very few cities reported that they are building new classrooms. Of 1,266 cities furnishing information, only 70, or 5.5 percent, reported that new classrooms were under construction, the total number of such reported being only about 2,000. Many pupils were reported attending school part time or housed in portable buildings because of lack of school buildings. A fact of significance to be noted is that many pupils on part time and in portables were in cities in which no new classrooms were being built. Data for 466, or 47.5 percent, of the cities having a population of 10,000 or more were analyzed, and it was found that there were about 35,000 children on part time and about 33,000 housed in portables in those cities in which no school buildings were under construction.

One of the most serious effects of the depression on the schools has been the elimination or curtailment of highly essential activities and services. The elimination and curtailments include: (1) Whole schools and classes for special purposes, such as kindergarten, night, continuation, and summer schools, and schools and classes for handicapped children; (2) staffs for specialized services, such as those for supervision and health; and (3) certain fields of instruction, such as music, art, home economics, manual training, and physical education. In brief, some of the most essential services and subjects of instruction are disappearing from the schools.

The necessity for readjustment may result in some good to the schools if the opportunity is seized to study the whole educational program from bottom to top to see what should remain and what should be eliminated, not merely for financial reasons but in order that an educational program may be developed to meet the needs of the individual and of society more nearly than does the present program. Simply lopping off here and there indiscriminately may result in a distorted school system. The world is changing; the schools must also change, since new and greater demands will be made of them.

CHAPTER III

STATISTICS OF HIGHER EDUCATION, 1931–32

Prepared by EMERY M. FOSTER, Chief, Division of Statistics, HENRY G. BADGER, assistant statistician; FREDERICK J. KELLY, Chief, Division of Higher Education, and WALTER J. GREENLEAF, specialist in higher education, assisted by MARGARET J S. CARR, NATHALIE LEVEQUE, BLANCHE K. CHOATE, and MAUDE FARR, statistical clerks

PART I. GENERAL FINDINGS AND INTERPRETATIONS

HIGHER EDUCATION AND THE DEPRESSION

Colleges and universities feel the full force of economic depressions later than do business and industry. The close of the year ending June 30, 1932, found business in almost complete stagnation, and unemployment at about its worst. Colleges and universities for the year ending the same time, collected in student fees 6½ million dollars more than they did 2 years earlier. To be sure, this gain in fees was a little more than offset by a decrease of 7½ million dollars in income from endowments. A depression registers its blighting effect upon endowments quickly, while students can draw upon reserves for fees a while longer.

Even the income from public sources held up for the year ending June 30, 1932, to 3 million more than 2 years earlier. Probably this was due in part to the fact that the appropriations were made either during the spring of 1931 or earlier, and it will be recalled that even though the depression had lasted over a year at that time, the people were unwilling to believe that it was to be as severe or as prolonged as it has proved to be. The legislative bodies, eager to maintain first-class colleges and universities, made increased appropriations for maintenance, even though public income was already showing clear signs of dwindling.

(The comparisons in the above two paragraphs are based upon differing numbers of institutions for the 2 years covered, as shown in table 3. The discrepancies thus produced are not serious, however, because the institutions not included in the 1929–30 totals have relatively small items of income.)

This phenomenon of lag which characterizes the entrance of educational institutions into the depression may well forecast a lag, likewise, in emerging from the depression. In fact, the experience of educational institutions in past depressions lends weight to the expectation that the worst years for the colleges will come a year or two after the worst of the depression has passed in business and industry. Indeed there is ample and sorry evidence at this writing that when we

come to tell the story of higher education's finances for the year 1934, the account will show greatly reduced income, the cutting in half of the salaries in many institutions, and inability to pay even the reduced amounts.

THE DUAL SYSTEM OF CONTROL OF HIGHER EDUCATION

The drop in income from endowment at the same time that student fees and income from public sources increases, reminds us that higher education is maintained in this country under a dual system of control. Let us examine a few figures bearing upon this dual control.

If the junior colleges and the teachers colleges and normal schools are omitted from the computations, we find that 140 publicly controlled and 671 privately controlled colleges and universities submitted financial reports, and 134 publicly controlled and 695 privately controlled institutions submitted enrollment and faculty reports. Disregarding these discrepancies in the numbers of institutions reporting we get the following picture of the two parts of our dual system. The number of institutions is about 5 to 1 in favor of the privately controlled institutions. In the regular session, the publicly controlled institutions enrolled 366,000 and the privately controlled 538,000 students, a ratio of almost exactly 2 to 3. The publicly controlled institutions provide for 40 percent of the students and the privately controlled ones, 60 percent.

Turning to the income figures we find that the publicly controlled institutions received 123 million from public sources. The privately controlled ones received 57 million from endowment sources. Of course, not all the public funds are used for instruction purposes. Neither is all the endowment income so used. Nevertheless, this is a wide difference which must be made up largely by higher student fees in the privately controlled institutions.

This question of student fees for the support of higher education is naturally made more acute by the depression. Students and parents have insufficient funds to meet high tuition rates. They offer notes in lieu of currency for their fees. Institutions therefore suffer from greatly reduced income, and their very existence seems jeopardized in many cases. The privately controlled institutions received 109 million dollars from student fees in 1931–32, and the publicly controlled ones received 28 million. This is a ratio of nearly 4 to 1. This is the way the difference is largely made up between public support of publicly controlled institutions and endowment support of privately controlled ones. Of course certain other figures are necessary if the entire income is to be considered, but these are not essential for our purpose here.

By comparing the foregoing figures with figures for 10 years ago, some significant trends can be discerned. (Here as in the foregoing

NUMBER OF STUDENTS IN RELATION TO TOTAL POPULATION

One hears the comment often these days that there are too many young people going to college. There is of course no way to determine how many should go to college, but it may be useful to point out certain facts that bear upon it.

The total enrollment of resident students during the regular 9-months session in all the 1,460 institutions reporting was 1,154,117. This number is just about half as large as the number of young people 18 years old in this country. In other words, if all the 18-year-old youth were to enter college, they alone would fill all the colleges twice over. On the average, only about one-tenth of the young people of college age are in college.

Is this too many?

Comparisons are frequently made with university enrollments in Europe. Such comparisons are usually very misleading. Students in most European countries have completed the equivalent of our freshman college year—and in many cases the sophomore year also—before entering the universities. Furthermore, European figures do not usually include students in normal schools and technological institutions. When comparisons are made with enrollments in the classes above the sophomore, and omitting normal schools, our proportion of students while still nearly twice that of Europe, is not so fantastic as usually reported.

Liberally estimated, the number of students above sophomore year in degree-granting institutions in this country (calculated at 45 percent of the total) is 450,000. This means about 1 student for each 275 of the total population. Comparable figures for certain European countries are:[1] Germany, 504; Sweden, 563; France, 574; Norway, 583; Holland, 672; Italy, 867.

But should this differential be interpreted as meaning that we are educating too many? Our curricula and those of Europe are organized so differently that only very general comparisons can be made. Certain it is, however, that we have many more engineering students and business administration students than have European universities. Perhaps our social life calls for more. In proportion to population we have more automobiles, more heavy farm machinery, more mechanical equipment in our homes, more people engaged in complicated business organizations, etc. In short, our needs for professionally trained engineers and business men are probably much greater than are the similar needs in most European countries.

Probably other professions would exhibit similar differences if they were analyzed. At any rate, the need for trained men and women bears a direct relationship to the social life of the people, and it is

[1] Numbers of students taken from: Rapport de la Conference D'Experts sur le surpeuplement des Universites, Geneva, August 1933, p. 24. Population figures taken from World Almanac, 1934.

unsafe to assume that the correct ratio of college and university students to total population in one country is the correct ratio in another. The real criterion is not to be found in comparisons with other countries. The above figures are given mostly to refute the oft-repeated assertions that we have five times as many students in college as have European countries.

Statistics may be used to shed light upon many educational questions only three of which have been briefly discussed above. In the interest of the busy reader it is advantageous also to draw out of statistical tables certain important figures, to make comparisons between related items, and to reveal trends. The following pages have been prepared for that purpose.

First a word about the data themselves.

ASSEMBLING OF THE DATA

Statistics of higher education have been collected and published by the Office of Education since 1870. These reports, originally on an annual basis, have been published biennially beginning with 1918. Earlier reports attempted segregation of institutions by type of curricular offering, with the result that an occasional institution was carried on more than one list and a grand total exclusive of duplications was almost impossible. In later years these various lists have been merged one by one with the general list, although up to 1930 separate textual discussions of various types of colleges continued to appear in publications of this Office.

In the present report, for the first time, statistics of all institutions of higher education, including junior colleges, are here summarized in one publication. This includes material previously carried in three separate chapters: (1) On universities, colleges, and professional schools; (2) on teachers colleges and normal schools; and (3) on land-grant colleges and universities. A unified statistical view of the higher educational situation in the United States is thus afforded.

A total of 1,460 institutions are reported, including universities, colleges, professional schools of various types including teachers colleges and normal schools, and junior colleges offering at least 2 years of work above the secondary level and enrolling at least 50 college students. The figures presented were obtained by means of printed questionnaires, copies of which were sent to every institution of college grade in continental United States of whose existence the Office of Education had information. Approximately 20 percent of the institutions were visited by representatives of the Office, who assisted in making the returns. Questionnaires were also sent to and replies received from institutions of college grade in the outlying parts of the United States, but these institutions are not included in the general summaries.

DISTRIBUTION OF INSTITUTIONS

The number of institutions of various types in the different States is shown in the accompanying table A.

TABLE A.—NUMBER OF INSTITUTIONS REPORTING PERSONNEL DATA

State	Universities, colleges, and professional schools				Teacher-training institutions				Total
	Publicly controlled		Privately controlled		Publicly controlled		Privately controlled		
	4-year	Junior	4-year	Junior	Teachers colleges	Normal schools	Teachers colleges	Normal schools

Wyoming	1								1
United States	134	159	695	183	145	106	10	28	1,460
1929–30	117	129	684	148	134	139	6	52	1,409

Here it will be noted that 6 States report 60 or more institutions each, while at the other end of the scale 13 States report not more than 10 institutions each.

The total of 1,460 institutions carried in 1931–32 is 51 more than the number reporting for 1929–30. This increase is due in part to an increase in the number of institutions supplying data requested by the Office of Education. It is also due partially to the opening of new schools, principally those of the junior college type.

The very noticeable decrease in teachers colleges and normal schools is due to two factors: (1) The actual closing of a number of normal schools, and (2) the transfer of several institutions from the list of teachers colleges and normal schools to that of universities, colleges, and professional schools.

Worthy of special comment is the increase in number of junior colleges reporting. In 1930 reports were received from 129 publicly controlled and 148 privately controlled institutions of this type, a total of 277 institutions. In 1932 reports were received from 157 publicly controlled and 183 privately controlled, or a total of 340 junior colleges. The increase from 1930 to 1932 is 63.

There were in 1932 but 5 States (in addition to the District of Columbia) from which no junior college reports were received: Maine, Nevada, Rhode Island, Vermont, and Wyoming.

DISTRIBUTION OF PROFESSIONAL SCHOOLS

Many of the 1,460 institutions reporting maintain professional schools or departments as a part of their organization. Considering each of these as well as the separate independent schools, there were in 1932 a total of 1,350 professional schools. The distribution of these professional schools is shown in the accompanying table B. Professional courses in colleges of liberal arts are not included in this tabulation.

TABLE B.—DISTRIBUTION OF 1,350 DEGREE-GRANTING PROFESSIONAL SCHOOLS, 1931–32

State or outlying part	Agriculture	Architecture	Commerce and business	Dentistry	Education [1]	Engineering	Fine arts	Forestry	Home economics	Journalism	Law	Library science	Medicine	Music	Nursing	Osteopathy	Pharmacy	Theology	Veterinary medicine	Other [1]

[1] Includes teachers colleges but not normal schools.

[2] Detail given in table 2.

LIMITATIONS OF THE DATA

There are two limitations of the data here presented. First, the authorities of certain institutions furnish only incomplete data; second, there is some lack of uniformity in the interpretations placed by different schools on the items contained in the questionnaires.

For the completeness and accuracy of the data here presented the Office of Education depends almost wholly on the voluntary cooperation of the authorities of the various institutions of higher education over the country. Of the 1,460 institutions, only the land-grant colleges and universities are under any legal obligation to report to this Office.

STEPS TOWARD STANDARD REPORTS

In the field of higher educational finance, while there is not yet complete agreement as to the meaning or relative importance of the items on which information should be collected, great strides have been made in that direction in recent years. Probably the greatest single contribution in this field is that made by the National Committee on Standard Reports for Institutions of Higher Education. The recommendations of this committee have been adopted in general by some of the regional accrediting agencies and denominational boards of higher education. There is an ever-widening acceptance of its major recommendations among institutions over the country. The methods suggested by it have been followed in principle by this Office and form the basis of the financial data here presented.

A study which is closely related to the work of the national committee was made by Aziere.[2] This study deals with some of the difficulties encountered in attempting to standardize financial procedure in institutions sponsored by the Roman Catholic Church and suggests certain basic principles and accounting procedure looking toward comparability between Catholic and non-Catholic institutions. Attention is given in it to the financial evaluation of non-salaried service, joint use of properties by two or more corporate units, and classification of accounts in general.

COMPARATIVE SUMMARY, FACULTY, STUDENTS, AND DEGREES, 1900–32

Table 1, page 25 gives an historical summary of certain items relating to staff, students, degrees, and other items of general interest for institutions of higher education from 1899–1900 to 1931–32.

Part 1 of this table is a continuation of the summary table which formerly introduced the statistics of universities, colleges, and professional schools.

---

[2] Aziere, Charles. Accounting for Catholic Institutions of Higher Education. National Benedictine Educational Association Bulletin, 16: 29–57, December 1933.

Part 2 continues the summary hitherto carried in the chapter on teachers colleges and normal schools.

Because of the changes in the forms used for collecting data in 1931–32 from those formerly used, the trends which appear must be interpreted with caution. Because of these differences, the data carried in the two parts of this table should be studied in connection with those presented in table 2 (staff, students, and degrees, 1931–32).

FACULTY, STUDENTS, AND DEGREES, SUMMARY, 1931–32

Table 2, page 28, gives a general summary of staff, resident students of college grade, and degrees conferred, at institutions of higher education during the year 1931–32. The institutions are also classified according to type of control, curricular offering, and whether they grant degrees or not.

From this general summary table a few observations of special interest may be made.

FACULTY OR TEACHING STAFF

The 1,460 institutions in the country required the equivalent of more than 100,000 full-time staff members, including administrative officers, teachers, extension and research workers, and other professional employees, but not including clerical or custodial employees.

Comparison should not be attempted between this figure and any figure for previous years for the reason that 1931–32 was the first year for which information concerning full-time equivalence was collected.

A percentage analysis, by sex, of the staff members of the different types of institutions follows:

TABLE C.—PERCENTAGE ANALYSIS OF TEACHING STAFF, 1931–32, BY TYPE OF SCHOOL AND BY SEX

Item	Universities, colleges, and professional schools			Teachers colleges and normal schools			All institutions reporting		
	Public	Private	All	Public	Private	All	Public	Private	All
1	2	3	4	5	6	7	8	9	10
Degree-granting:									
Men	32.0	45.2	77.2	40.7	2.5	43.2	32.9	41.0	73.9
Women	9.8	3.10	22.8	54.6	2.2	56.8	14.2	11.9	26.1
Total	41.8	58.2	100.0 (82,749)	95.3	4.7	100.0 (9,065)	47.1	52.9	100.0 (91,814)
Non-degree-granting:									
Men	27.9	22.8	50.7	19.8	8.9	28.7	25.6	17.4	43.0
Women	20.2	29.1	49.3	65.1	11.2	76.3	33.0	24.0	57.0
Total	48.1	51.9	100.0 (6,435)	84.9	15.1	100.0 (2,540)	58.6	41.4	100.0 (8,975)
All institutions:									
Men	31.7	43.6	75.3	36.1	2.8	38.9	32.2	38.9	71.1
Women	10.5	14.2	24.7	56.9	4.2	61.1	15.9	13.0	28.9
Total	42.2	57.8	100.0 (89,184)	93.0	7.0	100.0 (11,605)	48.1	51.9	100.0 (100,789)

Resident instruction as distinguished from extension instruction and research claimed the services of 65,828 men and 24,247 women, or 90,075 persons in all, in 1931–32. (These figures are not reduced to a full-time basis.) These included 79,314 persons thus employed in the university, college, and professional school group and 10,761 in the teacher-training school group. Of the total number reported, 88,172 were in work of collegiate grade and 2,957 in secondary instruction; 1,054 instructors (all but 7 of whom were in the university, college, and professional school group) divided their time between secondary and collegiate work and are listed in both categories.

The following tabulation shows the increase in total number since 1921–22.

TABLE D.—RESIDENT INSTRUCTIONAL STAFF (ABOVE SECONDARY GRADE), 1921–22 TO 1931–32

Year	Number	Increase over previous report		Year	Number	Increase over previous report	
		Number	Percent			Number	Percent
1	2	3	4	1	2	3	4
1921–22	56,486			1927–28	76,080	5,406	7 6
1923–24	63,999	7,513	11 5	1929–30	82,386	6,306	8. 3
1925–26	70,674	6,675	10 4	1931–32	88,172	5,786	7 0

The following items relating to staff engaged in special work are presented for the first time in National and State summaries. The significance of these services is suggested by the national totals: Summer session 1931, 26,139; correspondence work, 3,896; extension class and course instruction, 5,105; agricultural and home economics extension, 2,032; county, home, and club agents, 4,046; agricultural and experiment station staff, 2,924; other research workers, 1,449. (See table 7, p. 59.)

STUDENTS

Institutions of higher education enrolled a total of more than 1,100,000 resident students of above secondary grade during the regular session from September 1931, to June 1932, and more than 414,000 for the summer session of 1931.

More than 530,000 were listed as undergraduates in arts and sciences and more than 42,000 as graduates in arts and sciences. Professional schools enrolled nearly half a million undergraduates and more than 35,000 graduates.

The total enrollment has increased continuously. The rate of increase is shown in the following tabulation:

TABLE E.—RESIDENT COLLEGE ENROLLMENTS IN ALL INSTITUTIONS OF HIGHER EDUCATION, 1919–20 TO 1931–32, SUMMER SESSIONS EXCLUDED

Year	Enrollment	Percent of increase in 2 years	Year	Enrollment	Percent of increase in 2 years
1919–20	597,857		1927–28	1,053,955	14.9
1921–22	681,076	13.9	1929–30	1,100,737	4.4
1923–24	823,063	20.8	1931–32	1,154,117	4.9
1925–26	917,462	11.5			

Four of every seven resident college students are men. The percentage of men goes higher in the university, college, and professional school group, reaching its maximum of 63.1 percent in the degree-granting institutions of this type. Among the teacher-training institutions the reverse is true, women outnumbering men 2 to 1 in teachers colleges and nearly 5 to 1 in normal schools.

These and similar facts may be noted in the accompanying percentage analysis, of resident college students, by sex.

TABLE F.—PERCENTAGE ANALYSIS OF RESIDENT COLLEGE STUDENTS, BY TYPE AND CONTROL OF INSTITUTION AND BY SEX, 1931–32

Item	Universities, colleges, and professional schools			Teachers colleges and normal schools			All institutions reporting		
	Public	Private	All	Public	Private	All	Public	Private	All
1	2	3	4	5	6	7	8	9	10
Degree-granting:									
Men	25.4	37.7	63.1	32.2	1.0	33.2	26.3	32.9	59.2
Women	15.1	21.8	36.9	64.7	2.1	66.8	21.7	19.1	40.8
Total	40.5	59.5	100.0 (904,694)	96.9	3.1	100.0 (138,254)	48.0	52.0	100.0 (1,042,948)
Non-degree-granting:									
Men	39.5	14.1	53.6	15.6	1.4	17.0	33.9	11.1	45.0
Women	29.7	16.7	46.4	72.4	10.6	83.0	39.8	15.2	55.0
Total	69.2	30.8	100.0 (85,063)	88.0	12.0	100.0 (26,106)	73.7	26.3	100.0 (111,169)
All institutions:									
Men	26.6	35.7	62.3	29.6	1.0	30.6	27.0	30.8	57.8
Women	16.4	21.3	37.7	65.9	3.5	69.4	23.4	18.8	42.2
Total	43.0	57.0	100.0 (989,757)	95.5	4.5	100.0 (164,360)	50.4	49.6	100.0 (1,154,117)

The enrollment figures so far given do not include the following students of less than college grade enrolled at institutions of collegiate rank in 1931–32: 20,891 men and 16,087 women in elementary and secondary grades; 14,581 men and 5,692 women in correspondence courses; and 86,430 men and 68,218 women in extension courses.

DEGREES

The baccalaureate or the first degree in professional work was conferred on more than 136,000 persons during the year under review; the master's (or an advanced degree in engineering) was conferred on more than 19,000; and 2,900 persons were admitted to the doctorate *in cursu*.

Tables 10 and 13 show 14,671 students in colleges of agriculture, with degrees conferred on 2,748. This compares with 2,333 degrees in agriculture conferred in 1930. Neither of these figures, however, includes graduates in arts and sciences with specialization in agriculture. The number of such persons in 1932 was 288; no data on this point were collected for 1929–30.

In professional schools of commerce and business there were enrolled 64,274 students, 7,293 degrees being awarded. The number of degrees conferred in this field in 1930 was 6,741, including 528 degrees of M.B.A. In 1932, in addition to the above, the number of degrees in arts and sciences with major in commerce and business was 3,417.

In dentistry 8,519 students were enrolled, 2,084 degrees being conferred, not including 166 granted to persons in predental courses in arts and sciences.

In engineering, 77,041 students and 12,004 degrees are reported.

The number of students and degrees in professional schools of home economics, law, medicine, nursing, pharmacy, theology, and other fields are shown in the tables. The number of graduates in arts and sciences with specialization in such of these fields as were reported are shown in table 10.

The total number of honorary degrees reported in 1931–32 was 1,167. In 1929–30 it was 1,347; in 1927–28 it was 1,245; and in 1925–26 it was 1,214. These figures cover only the university, college, and professional school group, as data on this point have not been collected from teachers colleges.

All but 146 of the honorary degrees conferred in 1931–32 were reported by institutions under private control.

As usual, the doctorate was in 1931–32 by far the most popular honorary degree, 1,062, or 91 percent of the total, being of this grade. Twenty-five different types of doctorate were conferred, but, as usual, the 4 most popular degrees were the LL.D., the D.D., the Sc.D., and the Litt.D., this order of popularity being the same for both 1929–30 and 1931–32.

Thirteen varieties of honorary master's degrees were conferred on 93 persons, the most popular degrees being the A.M. (56 persons) and the M.S. (18 persons). These were also the most popular master's degrees in 1929–30.

Nine persons received other honorary degrees in 1931–32—5 the M.E., 2 the C.E., and 1 each the E.E. and the Ph.C.

FINANCES, GENERAL SUMMARY

Table 3, page 31, summarizes the receipts, expenditures, and value of property of the 1,460 institutions of higher education reporting for the year under review. This table is drawn up with special reference to the two groups of schools carried in previous reports; divisions are also made according to type of control and level of work done. The grand total of all institutions reporting is given in the last section of the table.

The table also presents a comparison between 1929–30 and 1931–32 for such of the financial details as are fairly comparable. Caution must be exercised in interpreting these comparisons, however, because the forms for collecting data were changed in certain particulars for 1931–32 from what was used 2 years earlier. There is, for example, no figure in the 1929–30 report to compare with the 1931–32 item of $5,238,649 unitemized educational and general expenditures, neither is there in the 1931–32 set-up any item to compare with that of $151,094,497 identified in 1929–30 as "other items, including unitemized totals."

Educational and general receipts for all institutions totaled $451,996,833; receipts from auxiliary enterprises and activities, $103,268,891; receipts for other noneducational purposes, $10,997,781; those to be applied directly to extension of the physical plant, $56,256,818; and those for additions to the permanent funds $47,676,822.

Educational and general expenditures for all institutions reporting totaled $420,632,553. Expenditures for auxiliary enterprises and activities totaled $90,897,297, those for other noneducational purposes of a current character amounted to $24,993,022, and capital outlays totaled $98,388,697. This gives a grand total of $634,911,569, which represents an increase of $2,662,783, or 0.4 percent, over the corresponding total of $632,248,786 for 1929–30. Let it be recalled that 46 more schools reported expenditures for 1931–32 than for 1929–30.

The total number of bound volumes in libraries of the various institutions in the country increased from 48,461,498 in 1930 to 52,919,063 in 1932. This is an increase of 4,457,565, or 9.2 percent.

The total value of all property held in 1932, including buildings, grounds, improvements, funds, and other assets, was $3,824,982,967, which is an increase of $387,865,050, or 11.3 percent, over the 1930 total. Details of this increase are shown in the following tabulation.

TABLE G.—VALUE OF PROPERTY HELD, ALL INSTITUTIONS, 1930 AND 1932

Item	1930	1932	Percent of increase
1	2	3	4
Campuses, farms, buildings, and improvements	$1,654,174,028	$1,858,794,718	12.4
Equipment	270,921,232	348,499,859	28.7
Total physical property	1,925,095,260	2,207,294,577	14.7
Endowment (including student aid funds)	1,372,068,474	1,463,407,130	6.7
Other assets	139,945,183	154,281,260	10.2
Grand total	3,437,117,917	3,824,982,967	11.3

In table 4, page 40, are presented percentage analyses of educational and general receipts, educational and general expenditures (so far as itemized), and property held by institutions of higher education. The analyses of expenditures and property are drawn up in two forms each so as to facilitate comparison between schools of different types of organization or control.

EDUCATIONAL AND GENERAL FUNDS

Receipts.—Total receipts for educational and general purposes were $451,996,833. Of this amount $409,217,928 went to universities, colleges, and professional schools and $42,778,905 to teachers colleges and normal schools. Degree-granting universities, colleges, and professional schools received $391,485,575, teachers colleges $34,915,216, junior colleges $17,732,353, and normal schools $7,863,689. The total of educational and general receipts at publicly controlled institutions of all types was $220,015,154; at all privately controlled institutions it was $231,981,679. There is no figure in the 1929–30 reports which may be compared with the 1931–32 total here given; the total of $483,065,219 for the earlier year includes more than 70 million dollars classified as miscellaneous receipts and probably includes some items which are itemized in the 1931–32 reports.

Student fees, including matriculation, tuition, laboratory, library, and incidental fees for directly educational purposes, and including those collected from both resident and nonresident students, totaled $150,649,047. This is 4.5 percent greater than the corresponding receipts in 1929–30 and may be compared with the increase of 4.9 percent in resident college student enrollment already noted.

Student fees comprised one-third of the total educational and general receipts of all institutions. As might be expected, they ran much higher in privately controlled schools than in those under public control. The greatest extremes are to be found in the normal schools, where the percent among publicly controlled institutions is 4.4 and that among institutions under private control is 71.6.

Income from endowment amounted to $60,902,567, which apparently represents a decrease of $7,702,380, or 11.2 percent, from the amount reported for 1929–30. The earlier figure, however, included yield of student aid and annuity funds, which in 1931–32 were included under the heading "Other noneducational receipts." Endowment income accounted for 13.5 percent of the total educational and general receipts of all institutions reporting. As might be expected, it ran highest among privately controlled institutions, reaching 26 percent of the total among degree-granting privately controlled universities, colleges, and professional schools. It reached its lowest point among the publicly controlled teachers colleges, dropping to 0.1 percent; it amounted to only 1.1 percent of the total for all publicly controlled institutions above secondary grade.

Receipts from public sources for current expenses totaled $174,663,239, which is approximately three-eighths of the total educational and general receipts and exceeds the 1929–30 report for this item by $3,157,843, or 1.8 percent.

Receipts of this character ran highest among institutions under public control. It is noteworthy that they reached 4 percent of the total among privately controlled institutions in 1931–32, when they amounted to $9,197,526 and exceeded by $865,233, or 10.4 percent, the amount reported in 1929–30. Contributions of this character frequently do not take the form of unconditional subsidies; they are often to be viewed in the light of payment for services rendered, such as tuitions held at the disposal of public authorities, etc. In one institution, for example, the public grant is small and is conditioned on the opening of the college library to the residents of the local community.

Private gifts for current expenses amounted to $29,947,529, of which $27,064,506, or more than 90 percent, was reported by institutions under private control. This item amounted to 1.3 percent of the total educational and general receipts of publicly controlled institutions; among those under private control it came to 11.7 percent; and among all institutions reporting it was 6.6 percent. It exceeded the 1929–30 figure of $26,172,312 by $3,775,217, or 14.4 percent.

This increase, however, is more than offset by the inclusion in 1931–32 of more than 5 million dollars' worth of donated service, an item not previously carried in reports of this Office. The greater part of this item is, of course, reported by institutions under private control. The contributed administrative, teaching, and other service of the various religious bodies has long been recognized as an important factor in some institutions. It is also interesting to note that some publicly controlled institutions recognize this form of contribution and report nearly a quarter of a million dollars' valuation for it.

Doctors and dentists serving as faculty members without pay are illustrations of this practice.

Details of the number of schools reporting this item and the amounts reported by them appear in the accompanying table:

TABLE H.—ESTIMATED VALUE OF NONSALARIED PERSONAL SERVICE RENDERED, 1931–32

Item	Publicly controlled institutions		Privately controlled institutions		All institutions reporting	
	Number	Amount	Number	Amount	Number	Amount
1	2	3	4	5	6	7
A. Universities, colleges, and professional schools						
1. Degree-granting	4	$235,750	104	$4,466,362	108	$4,702,132
2 Junior colleges	2	5,800	26	319,323	28	325,123
Total	6	241,550	130	4,785,705	136	5,027,255
B. Teachers colleges and normal schools						
1 Teachers colleges	1	1,800			1	1,800
2. Normal schools			4	73,850	4	73,850
Total	1	1,800	4	73,850	5	75,650
C All institutions reporting:						
1. Degree-granting	5	237,550	104	4,466,382	109	4,703,932
2 Non-degree-granting	2	5,800	30	393,173	32	398,973
Total	7	243,350	134	4,859,555	141	5,102,905

Sales and services of educational departments, including hospital service and charges therefor, sales of products of farms operated primarily for instructional or research purposes, library fines, registrars' fees for transcripts of credits, collections of employment bureaus, charges for chemical or other analyses made by university staff or students for outside persons, and the like amounted to $21,008,513, or 4.7 percent of the total educational and general receipts.

Other receipts, such as interest on current funds (daily balances, etc.), rentals of property not held as part of the university dormitory system or through the endowment fund (such as rentals of college auditoriums or gymnasiums for noncollegiate meetings of one sort or another, rental of houses occupying sites planned for future buildings, etc.), money borrowed for current expenses, and other items not easily susceptible of classification, accounted for $14,825,938, or 3.3 percent of the total.

Comparison may now be made between publicly and privately controlled institutions with respect to sources of current educational and general income. Among the publicly controlled institutions as a whole public appropriations and tax levies account for 75.2 percent, student fees for 15.7 percent, and sales and services of educational

departments for 5.5 percent. Current private benefactions (private gifts for current expenses) and earnings of former benefactions (income from endowment) together yield less than one-fortieth of the total.

Among the privately controlled institutions the three most important sources of income are student fees, 50.1 percent; income from endowment, 25.2 percent; and private gifts for current expenses, 11.7 percent, the three coming to 87 percent, or approximately seven-eighths of the total.

Expenditures.—Educational and general expenditures for all the 1,357 institutions reporting totaled $420,632,553, of which $380,568,284 was expended by universities, colleges, and professional schools and $40,064,269 by teachers colleges and normal schools. Of the total amount $205,863,802, or 48.9 percent, was expended by the 500 institutions under public control and $214,768,751, or 51.9 percent, by the 857 under private control.

Of the total amount of expenditures just mentioned, $415,393,904 was itemized by function, the account headings being quite similar to those used in the 1929–30 report. Since the set-up for the earlier year did not include expenditures for extension among educational and general expenditures, but that for 1931–32 did include it, the percentage analysis of these expenditures for 1931–32 cannot be compared with a similar percentage analysis for 1929–30.

In reporting to this Office, the institutions were asked to prorate salaries and other items for employees whose time was divided among two or more functions. Provision was also made for estimating the value of nonsalaried personal service. In this way a more complete and reliable picture is provided than in former biennial reports.

Administration and general control cost $47,231,796, representing 11.4 percent of the total itemized educational and general expenditures.

Beginning with 1931–32 the resident instruction account is divided into two parts: (1) Colleges, schools, and departments, and (2) related activities. The first part includes salaries of professors, instructors, and other persons charged with direct instruction on the campus, as well as other expenses connected with direct classroom, laboratory, or seminar instruction. The second part includes expenses of conducting activities which are aids to instruction and research, but which render service also to the general public. Examples of this are hospitals operated in connection with medical schools, dental or legal clinics, agricultural school creameries, university museums, etc.

The item of colleges, schools, and departments entailed an expenditure of $232,645,009, or 56 percent of the educational and general total. That of related activities came to $21,297,061, or 5.1 percent of the total. If the two are added together and considered as instruction cost, the total is $253,942,070, or 61.1 percent of the total.

Organized research expenditures amounted to $21,977,741, or 5.3 percent of the total. A little more than two-thirds of this expenditure is reported by the institutions under public control, where a large amount of research is carried on in agricultural experiment stations.

The cost of conducting the libraries was $11,379,044, which includes salaries of library staff, and current expenditures of various sorts, except that new books and other permanent equipment for libraries are not included unless these articles are considered replacements.

This item is greater by $1,757,486, or 18.3 percent, than the corresponding item for 1929–30, when $9,621,558 was reported. In 1931–32 it came to 2.7 percent of the total of all educational and general expenditures. Libraries claimed a larger share of the total expenditures in privately controlled than in publicly controlled institutions.

Operation and maintenance of the physical plant cost $56,796,812, which was 13.7 percent of the total of all educational and general expenditures. This was a decrease of $3,625,370, or 6 percent, from the 1929–30 report.

Extension cost $24,066,441, or 5.8 percent of the itemized total. Since this includes not only general extension and correspondence instruction, but also agriculture and home economics extension work, which is an important item in the publicly controlled institutions, it runs to a much higher percent of the total among publicly controlled degree-granting institutions than elsewhere. Here it reaches 12.8 percent, or a little more than one-eighth of the itemized total. Among privately controlled degree-granting institutions it reaches 1.7 percent and among publicly controlled teachers colleges it comes to 1.6 percent.

AUXILIARY ENTERPRISES AND ACTIVITIES

In the evolution of the present-day institution of higher education there have developed certain activities which, while not strictly educational in their character, are widely recognized as legitimate functions of an educational institution. Prominent among these are the provision of food and shelter for students, the recreational- and health-service program, the operation of student bookstores, social organizations intended to appeal to the entire student body, and the like. These are listed in the present report under the heading of auxiliary enterprises and activities.

The operation of dormitories and dining halls involved the collection of $64,198,692 and the expenditure of $47,819,768. It appears from a scrutiny of reports of some institutions that this difference is partially a matter of bookkeeping whereby all the income for the dormitories and dining halls is credited to that account, but some of

the expenses of operation and maintenance are included in the general operation and maintenance accounts of the institution. In some other schools the differentiation between tuition and boarding rates is not clearly reflected in the financial records and reports.

The athletic program involved total receipts of $15,050,335 and total expenditures of $15,266,162 during the year under review.

Other activities, including student health service, operation of college bookstores, student unions, Young Men's and Young Women's Christian Associations, college print shops, and the like, showed receipts of $24,019,864 and expenditures of $27,811,367.

The total of all receipts for auxiliary enterprises and activities came to $103,268,891; the total of all expenditures $90,897,297. There are no corresponding figures for 1929–30 from which comparisons may be drawn.

OTHER NONEDUCATIONAL TRANSACTIONS

Receipts for other noneducational purposes totaled $10,997,781. These included income from investments held as endowment of scholarships, fellowships, or prizes, earnings of funds held under annuity agreements, money received to be awarded directly as scholarships, fellowships, or prizes, and similar collections.

Expenditures under this heading totaled $24,993,022. These included payment of annuities, interest on indebtedness, repayment of money borrowed prior to 1931–32, payment of expenses incident to the conducting of financial campaigns, and amounts granted to students in the shape of scholarships, fellowships, etc., which do not involve repayment or the rendering of service to the institution concerned. The fact that money borrowed is listed in this report under educational and general receipts, whereas its repayment falls under noneducational transactions explains part of the great disparity between receipts and expenditures for other noneducational purposes.

PLANT FUNDS

Institutions of higher education received a total of $56,256,818 which was specially designated for expansion of their physical properties. The total expenditures for this purpose were $98,388,697, showing that large funds were used for plant extension which were not earmarked for that purpose.

The total expenditure for capital outlay is less by $26,717,711, or 21.4 percent, than the corresponding expenditure for 1929–30.

CAPITAL FUNDS

Receipts intended for increase of the permanent funds (endowment, student aid funds, etc.) amounted to $47,676,822, which is less by $15,835,386, or 24.9 percent, than in 1929–30.

BENEFACTIONS OF $100,000 OR MORE

During the year under review 105 institutions received benefactions totaling $100,000 or more. These institutions were scattered over 35 States. This compares with 161 insitutions in 40 States, which reported total benefactions of this magnitude in 1929–30.

PROPERTY

Nearly 53 million bound volumes are reported in the libraries of higher educational institutions. These figures do not include unbound pamphlets and papers not preserved in permanent form. Over 50 million volumes are at degree-granting institutions. Of the total number 35 3 percent are available at publicly controlled institutions and 64.7 percent ar at institutions under private control.

Campuses and farms held for instructional purposes in 1932 were valued at $331,293,862; buildings and improvements at $1,527,-500,856; and equipment (including library books, scientific and other instructional apparatus, furniture and fixtures, etc.) at $348,499,859. This makes a total of $2,207,294,577 invested in physical property.

The campuses and farms item amounts to 15 percent of the total of all physical property and varies widely among the different types of schools. In the privately controlled teachers colleges and publicly controlled normal schools it stands at 6 9 percent, but it goes to 22.2 percent among privately controlled junior colleges and to 24.7 percent among privately controlled normal schools. With the single exception of the teachers colleges, it runs higher among privately controlled schools than among those under public control.

Endowment funds, exclusive of student-aid funds and those held subject to annuity, totaled $1,372,348,965, or 35.9 percent of the total of all property reported. Among the privately controlled institutions the percent ran nearly four times as high as it did among those under public control.

Among privately controlled degree-granting universities, colleges, and professional schools the amount of endowment held is a little greater than the total investment in physical properties, the percent of the total being slightly more than 46.1 for each item.

Student-aid funds amounted to $91,058,165, or 2.4 percent of the grand total. They ran consistently higher among privately controlled schools than in those under public control. They ran proportionately much lower in the teacher-training schools than in the university, college, and professional school group.

Other assets amounted to $154,281,260, or 4 percent of the grand total. This item includes annuity funds, funds whose final disposition was still undecided upon at the time of making the report, office, dining room, or other supplies on hand, and minor items not easily classifiable.

Total receipts from all sources	5,236,856	14,688,220	[22] 31,395,389	[22] 70,016,988	[22] 69,983,932	[22]59,069,316

[1] Not tabulated by sex.
[2] Collegiate, professional, and graduate departments.
[3] Not tabulated separately.
[4] Includes 982 men and 1,239 women teaching in other departments.
[5] Includes 27 men and 91 women teaching in other departments.
[6] These figures not comparable with those of former years. "Collegiate" in 1932 figures means only colleges of arts and sciences, whereas formerly the term included engineering, education, commerce, etc., limiting "professional" in former years to theology, law, medicine, dentistry, pharmacy, osteopathy, and veterinary medicine.
[7] Includes graduate students in both academic and professional departments.
[8] See table B for types of professional work included.
[9] Undergraduate enrollments only.
[10] Includes 27,333 men and 38,328 women in other departments.
[11] Includes 16,399 men and 22,751 women in other departments.
[12] Includes 15,923 men and 14,225 women in other departments.
[13] Not including subcollegiate students.
[14] Baccalaureate and first professional degrees
[15] Included with baccalaureate and graduate degrees.
[16] Includes advanced professional degrees.
[17] Data not requested for this year.
[18] Entire instructional staff, September to June.
[19] Entire instructional staff, summer session, 1931.
[20] Data not available in tabular form.
[21] Includes receipts from other than public funds for increase of plant.
[22] Expenditure figures used for city normal schools.

TABLE 2.—FACULTY, STUDENTS, AND DEGREES, 1931-32 (1,460 INSTITUTIONS)

TABLE 18.—FACULTY, STUDENTS, AND DEGREES, 1931-32—Continued

PART 8—COUNTY NORMAL SCHOOLS, PUBLICLY CONTROLLED

State	Number of schools reporting	Number of—					
		Instructors		Teacher-training students		Graduates from 1-year teacher-training course	
		Men	Women	Men	Women	Men	Women
1	2	3	4	5	6	7	8
Michigan	20	4	56	72	416	56	317
Wisconsin	16	16	49	168	628	114	462

[1] Undergraduate, graduate, and special.
[2] Negro.
[3] Not reduced to full-time basis.
[4] Included in preceding column.
[5] Including some women
[6] Included in columns 13 and 14
[7] Duplicated under Catholic University.
[8] Men and women
[9] Included under Atlanta University
[10] Includes affiliated and corporate institutions.
[11] Duplicated under Columbia University
[12] Includes university class students, some of which are professional
[13] Does not include medical school faculty.
[14] Includes 18 degrees "Rabbi".
[15] Including 43 degrees "graduate of chiropody" (men, 39; women, 4).
[16] Includes special and unclassified students.
[17] 1929-30 statistics
[18] Includes 14 doctors' degrees.
[19] Includes 3 doctors' degrees

[1] Architecture, students 106, degrees 17; fine arts, students 37, degrees 3, veterinary medicine, students 66, degrees 8.
[2] Music.
[3] Architecture, students 186, degrees 35; chemistry, students 328, degrees 43, library science, students 69, degrees 7.
[4] Forestry, students 138, degrees 14; music, students 16, degrees 3, Veterinary medicine, students 146, degrees 28; vocational education, degrees 40; unclassified, students 122.
[5] Professional course of study offered at United States service schools.
[6] Architecture, students 72, degrees 9; journalism, students 66, degrees 6.
[7] Architecture, students 128, degrees 33; general science, students 47, degrees 21, unclassified, students 13, degrees 1.
[8] Landscape architecture, students 15, degrees 1; forestry, students 64, degrees 8; journalism, students 97, degrees 16; veterinary medicine, students 42, degrees 11; applied art, students 39; physical education, students 47.
[9] Sugar technology.
[10] Geology, students 26, degrees 4; metallurgy, students 15, degrees 2; forestry, students 121, degrees 17.
[11] Architecture, students 271, degrees 40; fine arts, students 126, degrees 9; journalism, students 115, degrees 46; library science, students 164, degrees 119, music, students 140, degrees 8.
[12] Forestry, students 78, degrees 8; physical education, students 120, degrees 7; botany, degrees 1.
[13] Landscape architecture, students 71, degrees 13; forestry, students 138, degrees 19; journalism, students 25, degrees 4; veterinary medicine, students 188, degrees 44.
[14] Architecture, students 70, degrees 13; veterinary medicine, students 177, degrees 19.
[15] Fine arts, students 97, degrees 16; music, students 177, degrees 44.
[16] Forestry, students 83, degrees 8; journalism, students 121, degrees 9; library science, students 33, degrees 22; music, students 91, degrees 5, coaching, students 42, home demonstration, students 16, degrees 6.
[17] Forestry, students 117, degrees 24; chemistry, students 38, degrees 9.
[18] Veterinary medicine, students 78, degrees 10; forestry, students 57, degrees 18.
[19] Architecture, students 202, degrees 48; forestry, students 69, degrees 32; music, students 216, degrees 49; oral hygiene, students 10; anaesthesia, students 5.
[20] Architecture, students 66, degrees 26; forestry, students 249, degrees 30; dental hygiene, students 69; unclassified, students 19.
[21] Architecture, students 26; journalism, students 389, degrees 154; music, students 55, degrees 9; general science, students 19, degrees 4; fine arts, students 38, degrees 4.
[22] 1-year general course.
[23] Forestry, students 136, degrees 20; journalism, students 124, degrees 20; music, students 30, degrees 5.
[24] Architecture, students 5; fine arts, students 117, degrees 11; music, students 100, degrees 29; industry and survey, students 9, degrees 5.
[25] Forestry.
[26] Architecture, students 7, degrees 1; fine arts, students 1.
[27] Forestry, students 91, degrees 10; landscape architecture, students 19, degrees 3; sciences, students 63, degrees 13; textiles, students 137, degrees 40.
[28] Library science.
[29] Architecture, students 40, degrees 9; chemistry, students 110, degrees 17.
[30] Unclassified.
[31] Architecture, students 26, degrees 2; fine arts, students 77, degrees 10; music, students 84, degrees 14.
[32] Architecture, students 74, degrees 15; fine arts, students 30, degrees 30; music, students 26, degrees 3; veterinary medicine, students 184, degrees 40; applied optics, students 70, degrees 14; arts-education, students 30; unclassified graduate students 361.
[33] Secretarial science.
[34] Architecture.
[35] Architecture, students 79, degrees 10; unclassified graduate students, 9.
[36] Fine arts, students 173, degrees 29; music, students 126, degrees 32.
[37] Forestry, students 199, degrees 35; science, degrees 7; unclassified graduate students 158.
[38] Architecture and arts, students 210, degrees 6; journalism, students 209, degrees 8; music, students 134, degrees 3; applied social science, students 65; physical education, students 144.
[39] Architecture, students 68, degrees 18; forestry, students 117, degrees 23.
[40] Chemistry, students 66, degrees 5; textiles, students 157, degrees 26.
[41] Journalism.
[42] Fine arts, students 8, degrees 1; music, students 34, degrees 1.
[43] Industrial education.
[44] Dental hygiene.
[45] Veterinary medicine, students 34, degrees 6; vocational teaching, students 106, degrees 52.
[46] Chemistry.
[47] Fine arts, students 181, degrees 19; music, students 128, degrees 20; veterinary medicine, students 78, degrees 16; physical education, students 209, degrees 21, military, students 1.
[48] Forestry, students 136, degrees 26; library science, students 46, degrees 42.
[49] Music, students 47, degrees 14; physical education, students 169, degrees 17.

[41] Architecture, students, 132; degrees, 37, journalism, students, 157; degrees, 79; library science, students, 268; degrees, 184; optometry, students, 48; degrees, 20, practical arts, students, 2,452.
[42] The graduate school of education is an integral part of the graduate school of the university.
[43] Architecture, including fine arts and landscape architecture, students, 182, degrees, 28; veterinary medicine, students, 225, degrees, 46.
[44] Seminary College of Jewish studies.
[45] Architecture, students, 436; degrees, 9; fine arts, students, 733, degrees, 12; music, students, 90, degrees, 5; retailing, students, 830, degrees, 49
[46] Chemistry
[47] Architecture, students, 89, degrees, 10; fine arts, students, 289, degrees, 50; journalism, students, 113, degrees, 19; library science, students, 105, degrees, 47, music, students, 444, degrees, 48, speech, students, 90, degrees, 19.
[48] Including 18 degrees, Rabbi.
[49] Architecture, students, 71, degrees, 6; library science, students 107, degrees, 82, applied social sciences, students, 500, degrees 33.
[50] Fine arts, students 14; music, students 17, degrees 6.
[51] Fine arts, students 12; music, students 21, degrees 4.
[52] Music, students 20, degrees 6; health education, students 26, degrees 2.
[53] Architecture, students 162, degrees 27, fine arts, students 177, degrees 38; library science, students 74, degrees 36; music, students 142, degrees 35; special work, students 29; drama, students 91, degrees 11; unclassified, students 164, degrees 14.
[54] Chemistry, students 38, degrees 10; bacteriology, students 11, degrees 3; pharmacognosy, students 1, degrees 1.
[55] Music, students 116, degrees 2; oral hygiene, students 42; chiropody, students 110, degrees 43.
[56] Fine arts including architecture and music, students 354, degrees 81; veterinary medicine, students 131, degrees 25; oral hygiene, students 52.
[57] Retail training.
[58] Dental hygiene.
[59] Architecture, students 80, degrees 17; physical education, students 97, degrees 4.
[60] Including schools of religious education, of sacred music, and of missionary training.
[61] Fine arts, students 84, degrees 9, applied science, students 144, degrees 37.
[62] Applied science.
[63] Fine arts, students 42, degrees 3; music, students 5, degrees 1.
[64] Music, students 99, degrees 27; paper chemistry, students 20, degrees 14.

TABLE 20.—RECEIPTS, 1931–32

PART 1.—UNIVERSITIES, COLLEGES, AND PROFESSIONAL SCHOOLS, PUBLICLY CONTROLLED

Name of institution and location	Educational and general fund							Auxiliary enterprises and activities				Receipts for other non-educational purposes	Receipts for extension of physical plant	Receipts for increase of permanent funds
	Student fees	Income from endowment	Receipts from public sources for current expenses	Private gifts and grants for current expenses	Sales and services of educational departments	Other receipts for educational purposes	Total	Dormitories and dining halls	Athletics	Other activities	Total

[1] Negro.
[2] Figures duplicated under University of Georgia.
[3] Of this total, $182,641 was assigned for plant extension.
[4] In addition to above amount.
[5] Includes College of Pharmacy, Detroit Teachers College, and College of City of Detroit.
[6] Received from State appropriation at close of fiscal year.
[7] Figures for 1929–30
[8] Year ends Dec. 31, 1931.
[9] Report does not include University Medical School and University Hospital.
[10] Included in column 9.
[11] Includes room and board.
[12] Dental school.
[13] Federal funds.
[14] See Morehouse and Spelman.
[15] Figures refer to the central corporation of St. Louis University and exclude those of the corporate and affiliated institutions
[16] Teachers College and Woman's College of the University not included
[17] None available during 1931–32
[18] 18 institutions.
[19] 14 institutions.
[20] All for student aid fund
[21] Including other than local public sources for tuition
[22] Including high-school funds.
[23] Incomplete data.
[24] Included in column 2

[1] Negro.
[2] Data not available.
[3] Includes Georgia State College of Agriculture and the Mechanic Arts.
[4] Included in report for University of Georgia.
[5] Includes $152,542 expended for departmental equipment, new and replacements.
[6] Includes some capital expenditures.
[7] Detailed analysis of educational and general expenditures not available.
[8] Included in next column.
[9] Includes athletics.
[10] Includes related activities, organized research, and extension.
[11] Included in resident instruction: Colleges, schools, and departments.
[12] Estimated from budget.
[13] Statistics of calendar year 1931.
[14] Includes dormitories and dining halls.
[15] Included in physical plant operation and maintenance.
[16] Statistics of 1930.
[17] Includes administration and general control.
[18] Includes preceding column.
[19] Includes extension and some charges for administration and general control.
[20] Includes libraries.
[21] Estimated
[22] Includes research.
[23] Included with administration.
[24] Includes extension.
[25] Formerly Mount St. Charles College.
[26] Report for 10-month period ending June 30, 1932.
[27] Includes related activities.
[28] Includes Union College, Albany Law School, and Albany Medical College.
[29] Report for 8-month period ending Apr. 30, 1932.
[30] 18 institutions.
[31] Includes $24,404 unitemized educational and general.
[32] 14 institutions.
[33] Includes $36,146 unitemized educational and general

TABLE 23.—CAPITAL OUTLAY AND PROPERTY, 1931-32

PART 1—UNIVERSITIES, COLLEGES, AND PROFESSIONAL SCHOOLS, PUBLICLY CONTROLLED

Name of institution and location	Capital outlay			Number of bound volumes in library	Value of property						
	Buildings and grounds	Equipment	Total		Value of campus and farms	Value of buildings and improvements	Value of equipment	Endowment funds	Student-aid funds	Other assets	Total
1	2	3	4	5	6	7	8	9	10	11	12
Alabama College, Montevallo	$2,577	$7,898	$10,475	25,412	$48,000	$1,395,000	$292,000	$582,722			$2,317,722
